MANAGEMENT REPORT

The Management of Banco Bmg S.A. and its subsidiaries ("Bank"), in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standard Board (IASB), is presenting the Financial Statements under IFRS for the period ended September 30, 2026, along with the independent auditors' report.

Banco Bmg

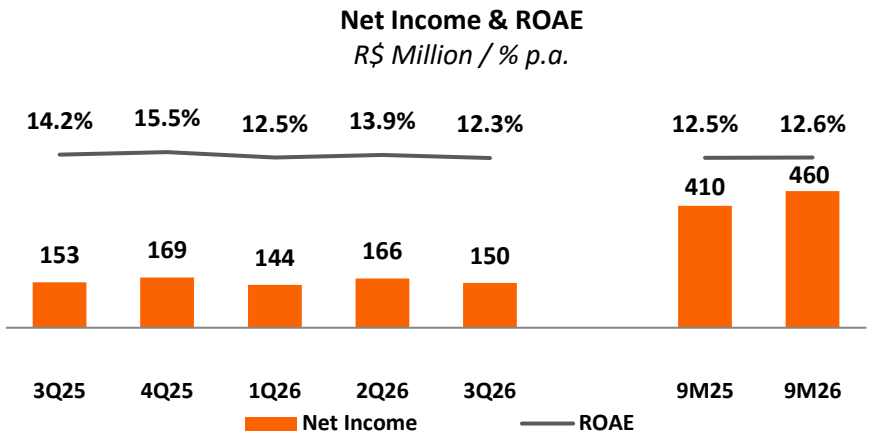

Throughout nearly a century of operation, Banco Bmg has maintained as its central guideline proximity to its clients, offering financial solutions suitable to their needs, combining technology, operational efficiency, and humanized service. This approach has sustained the building of trusting relationships and strengthened our presence in the credit and financial services market.

We serve millions of clients throughout the country, including retirees and pensioners, salaried employees, and investors. We offer a diversified portfolio comprised of payroll loans, personal loans, insurance, assistance services, and solutions for investors. We operate in a complementary manner through physical and digital channels, integrating technology, convenience, and empathy in our relationships.

Our main verticals are **Retail, Wholesale, and Insurance**, evolving to become an increasingly relational Bank, with the client at the center of the strategy, expansion of business opportunities and sustainable profitability.

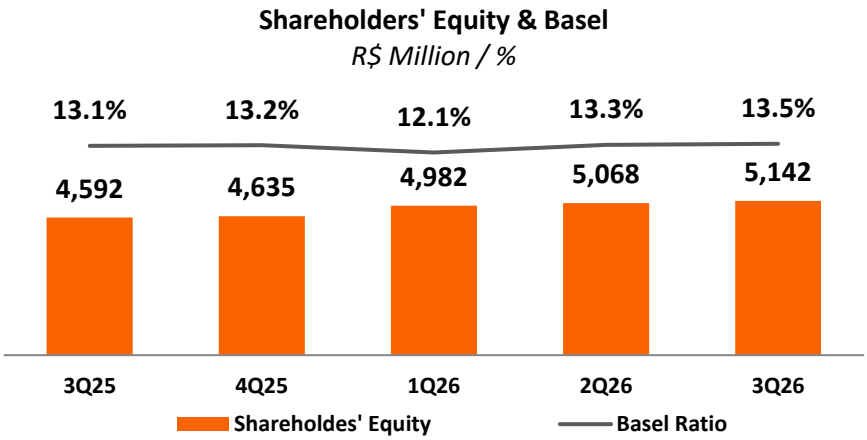

Financial Performance

The net income attributable to the parent company in the period ended September 30, 2026, was R$ 460 million, an increase of 12.3% compared to the same period of 2025. The Return on Average Equity (ROAE) was 12.6% per year in the period ended September 30, 2026.

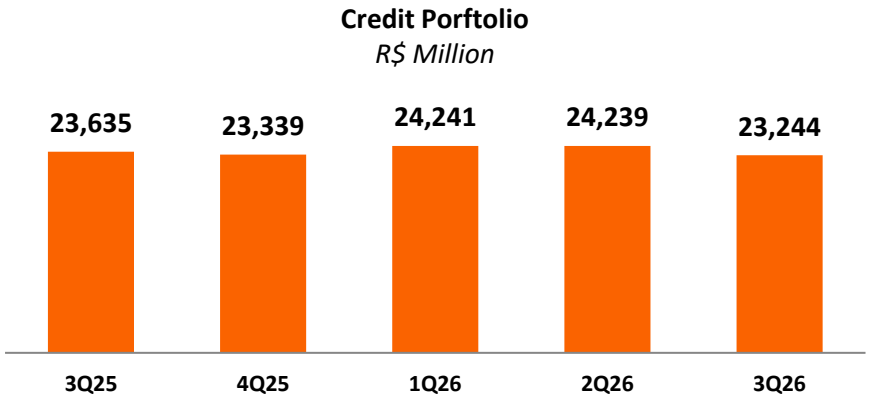

Consolidated Shareholders' Equity attributable to the parent company on September 30, 2026, amounted to R$ 5,142 million, the capitalization ratio of risk-weighted assets (Basel Ratio) was 13.5%, and the tier 1 capital reached 10.2%.

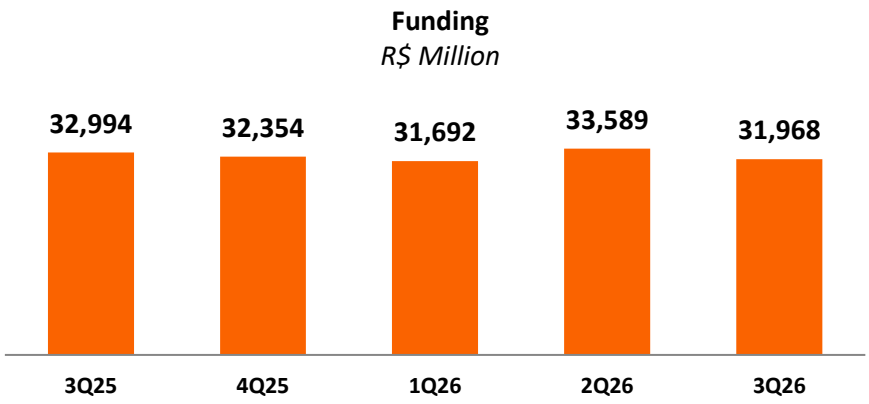

The Bank provisioned R$ 194.4 million in Interest on Shareholders' Equity related to the period ended September 30, 2026, of which R$ 64.0 million were declared relating to the third quarter of 2026 and will be paid on December 04, 2026.

The total consolidated portfolio ended September 30, 2026, with a balance of R$ 23,244 million, a reduction of 1.7% compared to the same period of 2025. In the quarter, the reduction in the credit portfolio was mainly due to the assignment without retention of risks and benefits from the INSS payroll card and benefit payroll card. On the other hand, there was growth in private payroll loans and personal credit, reflecting the change in the asset mix that the Bank has been implementing.

The consolidated funding balance totaled R$ 31,968 million in September 30, 2026, representing a reduction of 3.1% compared to the same period of the previous year. Time deposits, the major source of funding, accounts for 69.1% of funding. Furthermore, the Bank's strategy is to be a recurring issuer in the capital market, with the aim of approaching institutional investors, promoting Bmg's liquidity and creating a reference interest curve in the institutional market. In October 2026, the Bank concluded the funding of R$ 426 million in its 8th public issuance of Financial Bills for a term of 2-year and ten days at an interest rate of CDI + 1.15% p.a. and a term of 3 years at an interest rate of CDI + 1.25% p.a., representing the Bank’s lowest risk premiums in these category.

In September 30, 2026, the Bank's investments in subsidiaries totaled R$ 171 million, the main variation being the balance of investments in AF Controle S.A. and variation of other investments.

ESG Principles

The Bank remains focused on delivering financial solutions to live well as they age. This strategic guideline directs product development, the value proposition, and the service model, reconciling business growth with a positive impact for customers and society. In this context, with the aim of strengthening financial citizenship through ethical and inclusive practices, the ESG agenda remains a cross-cutting pillar of the business model, integrating governance, customer service, and value proposition.

We are also one of the sponsors of the Marina and Flávio Guimarães Institute (IMFG), which centralizes the social actions of the Bmg Group. Founded to drive social transformation, IMFG promotes human development and the strengthening of the communities in which it operates.

Bmg is signatory of important movements such as UN Global Compact, the Pact for the Promotion of Racial Equality, the Business Network for Social Inclusion, the Women 360 Movement, Women on Board (WOB), Business and LGBTI+ Rights Forum, OUTstand Brasil and Business Pact for Integrity and Against Corruption (Clean Company) of the Ethos Institute.

Learn more about our ESG initiatives on the website: https://www.bancobmg.com.br/compromisso-ASG/.

Corporate Governance

The Bank has a robust corporate governance structure. In addition to the obligations established in Level 1 of corporate governance of B3 S.A – Brasil, Bolsa, Balcão, the Bank adopted some of the obligations set forth in the Novo Mercado: (i) the 100% tag-along right, guaranteeing all shareholders the same price and conditions offered to the controlling shareholder in case of sale of control; (ii) simultaneous disclosure in Portuguese and English earnings results and material facts; and (iii) Board of Directors composed of 2 or 20% (whichever is greater) of Independent Members, and currently 44% is composed of independent members, including the chairwoman. Furthermore, the Bank has: (i) an Audit Committee composed of one independent member, (ii) five other committees directly subordinated to the Board of Directors, all with the presence of independent members; and (iii) a permanent Fiscal Council approved at the Shareholder's Meeting.

Based on best risk management practices, the Bank has developed policies, systems and internal controls to mitigate and control possible losses arising from exposure to the risks to which its activities are exposed, with a set of appropriate processes and routines applied to its operating modalities.

For more information on corporate governance, please visit: www.bancobmg.com.br/ir.

Relationship with Independent Auditors

The adopted policy adheres to the principles that preserve the independence of the auditor, in accordance with internationally accepted criteria, ie, the auditor should not audit his or her own work and neither perform managerial functions at his client nor promote its interests. In the period ended September 30, 2026, the Bank did not contract

Docusign Envelope ID: 3E65D4B1-84AC-856A-809D-8387566F9855

and did not have services rendered by PricewaterhouseCoopers Auditores Independentes not related to the external audit, at a level higher than 5% of the total relative fees to external audit services.

Capital Management

The assessment of capital adequacy is made to ensure that the organization maintains a strong capital base to support its activities. It also considers a prospective vision, designed to anticipate possible changes in market conditions.

Acknowledgements

All these achievements reflect the firm commitment of the Shareholders and Management to continually strive to exceed expectations and always offer its clients high quality service and a healthy environment for its employees. These gains have been possible thanks to our clients' support and trust and the dedicated efforts of our collaborators and partners/correspondents.

To them all, our deep appreciation.

Report on review of consolidated interim financial statements

To the Board of Directors and Stockholders
Banco Bmg S.A.

Introduction

We have reviewed the accompanying consolidated interim balance sheet of Banco Bmg S.A. ("Bank") and its subsidiaries, at September 30, 2026 and the related consolidated statements of income and comprehensive income for the quarter and nine-month period then ended, and the consolidated statements of changes in equity and cash flows for the nine-month period then ended, and notes, comprising material accounting policies and other explanatory information.

Management is responsible for the preparation and fair presentation of the consolidated interim financial statements in accordance with the International Accounting Standard (IAS) 34 - Interim Financial Reporting of, the International Accounting Standards Board (IASB). Our responsibility is to express a conclusion on these interim financial statements based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 - "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", and ISRE 2410 - "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial statements referred to above do not present fairly, in all material respects, the financial position of Banco Bmg S.A. and its subsidiaries, at September 30, 2026, and the consolidated financial performance for the quarter and nine-month period then ended and the consolidated cash flows for the nine-month period then ended in accordance with the International Accounting Standard (IAS) 34 Interim Financial Reporting, of the International Accounting Standards Board (IASB).

Other matters

Statement of value added

The interim financial statements referred to above include the consolidated statement of value added for the nine-month period ended September 30, 2026. This statement is the responsibility of the Bank's management and presented as supplementary information. This statement was subjected to review procedures performed together with the review of the interim financial statements for the purpose concluding whether it is reconciled with the interim financial statements and accounting records, as applicable, and if its form and content are in accordance with the criteria defined in the accounting standard CPC 09 - "Statement of Value Added". Based on our review, nothing has come to our attention that causes us to believe that this statement of value added has not been prepared, in all material respects, in accordance with the criteria established in this accounting standard, and that it is consistent with the consolidated interim financial statements taken as a whole.

1. General Information

Banco BMG S.A. ("Bank" or "Institution") and its subsidiaries (together, "the Group" or "Consolidated") is authorized to operate as a multiple service bank with commercial, credit, financing and investment portfolios. The benefit of the services provided between these companies and the costs of the operational and administrative structures are absorbed, in accordance with the practicability and reasonability of having them allocated, together and individually, and they are deemed adequate by the management of the institutions.

The Group is formed by the subsidiaries described in the consolidation note – 2.2 a) (i).

Pursuant to the EGM held on February 7, 2025, approved by the Central Bank of Brazil, we hereby announce a change in the corporate name of the Company Banco Cifra S.A. to Banco BMG Soluções Financeiras S.A..

Banco BMG S.A. ("BMG" or "Bank"), controlled by the Pentagna Guimarães Family, and located at Avenida Presidente Juscelino Kubitscheck, nº 1.830, São Paulo/SP, Brazil.

In December 2018, the Bank obtained its register as a public company with the Brazilian Securities and Exchange Commission (CVM).

The interim consolidated financial statements prepared under the IFRS were completed and approved by the Bank's management on November 05, 2026.

2. Summary of significant accounting policies

The significant accounting policies applied in the preparation of these interim consolidated financial statements are set out below. These policies have been consistently applied to the periods presented, unless otherwise stated.

2.1 Basis of preparation

These interim consolidated financial statements of Banco BMG S.A. and its subsidiaries were prepared taking into consideration the provisions in Resolution nº 4,818/20 of the National Monetary Council ("CMN"), which requires the preparation of consolidated financial statements in accordance with the International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board (IASB), currently referred to by the IFRS Foundation as "IFRS accounting standards" (IFRS® Accounting Standards, including interpretations issued by the IFRS Interpretations Committee (IFRIC® Interpretations) or by its predecessor body, Standing Interpretations Committee (SIC® Interpretations) and show all relevant information specific to the interim financial statements, and only that information, which is consistent with that used by management in its management. The Bank observes, for disclosures in interim periods, the international accounting standard IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board (IASB).

For the purposes of disclosing these financial statements, the Group complies with the provisions of IAS 1 – Presentation of Financial Statements, presenting the balance sheet in order of liquidity and the segregation between current and non-current assets in an explanatory note.

The Financial statements have been prepared under the historical cost convention and adjusted to reflect financial assets and liabilities (including derivative financial instruments) measured at fair value, as required by IFRS 9, in accordance with the business model.

The preparation of interim consolidated Financial statements requires the use of certain critical accounting estimates. It also requires the management of the Group to exercise its judgment in the process of applying the accounting policies of the Group. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the interim consolidated financial statements, are disclosed in Note 3.

2.2 Consolidation

(a) Interim consolidated financial statements

The following accounting policies are applied in the preparation of the interim consolidated financial statements.

(i) Subsidiaries

Subsidiaries are all entities over which the Group has the control. The Group controls an entity when it is exposed to or is entitled to its variable returns arising from its involvement with the entity and has the ability to affect such returns. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated on the date that control ceases.

The identifiable assets acquired and liabilities assumed for the acquisition of subsidiaries in a business combination are measured initially at their fair values on the date of the acquisition. The Group recognizes any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the fair value of the acquiree's net assets. The measurement of the non-controlling interest is determined upon each acquisition made. Acquisition-related costs are accounted for in profit or loss for the year as they are incurred.

The consolidated companies and their interests are presented below:

Investees	Country of incorporation	Activity	Interest (%)	
			2026	2025
BMG Leasing S.A.	Brazil	Leasing	99.99	99.99

(*) On September 19, 2025, the corporate name of BMG Participações em Negócios Ltda. was changed to BMG Estrutura Corporativa Ltda.

Transactions, balances and unrealized gains on transactions between Group companies are eliminated. Unrealized losses are also eliminated, unless the transaction provides evidence of impairment of the asset transferred. The accounting policies of subsidiaries have been changed where necessary in order to ensure consistency with the policies adopted by the Group.

Investments, balance sheet account balances, and profit or loss from transactions between the Bank and its direct and indirect subsidiaries have been eliminated in the interim consolidated financial statements.

Income arising from assigned credit operations is recorded in the "Interest income and similar earnings" account in the statement of income and the financing cost is recorded in the "Interest cost and similar expenses" account.

Transactions with non-controlling stockholders

The Group treats transactions with non-controlling stockholders as transactions with equity owners of the Group. In purchases of non-controlling interests, the difference between any consideration paid and the share acquired of the carrying amount of the subsidiary's net assets is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded directly in equity in the "Other comprehensive income' account" account.

2.3 Segment reporting

In accordance with IFRS 8, an operating segment is a component of an entity that performs business activities from which revenue can be obtained and in which expenses can be incurred, whose profit or loss can be assessed by the entity's main operational decision-maker, and in relation to which different financial information is available.

The main operational decision maker, responsible for the allocation of funds and the assessment of the performance of the operating segments, is the Executive Board together, which is also responsible for making the Group's strategic decisions.

The management separate this information into three operating segments: Retail Banking, Wholesale Banking and Institutional/Treasury.

These operating segments are described below:

- Retail Banking: profit or loss of the Retail Banking segment arises from the offer of banking products and services to individuals.

- Wholesale Banking: profit or loss of the Wholesale Banking segment arises from the offer of banking products and services to legal entities.

- Institutional/Treasury: the segment's result derives from the Treasury's mandate over asset and liability management (ALM) and from corporate-level effects, including proprietary working capital and tax-related impacts not attributable to the management of the business units.

Profit or loss by operating segment is presented in the table below:

	2026					
	Retail Banking	Wholesale Banking	Institucional/ Treasury	Total BRGAAP (i)	IFRS adjustments	Consolidated under IFRS
Financial margin	3,374,238	108,293	(248,101)	3,234,430	(602,584)	**2,631,846**

(i) Result calculated in accordance with the accounting practices adopted in Brazil, established by the Brazilian Companies Law and the Central Bank of Brazil (BACEN).

Docusign Envelope ID: 3E65D4B1-84AC-856A-809D-8387566F9855

2.4 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The interim consolidated financial statements are presented in Brazilian *reais* (R$), which is the Bank's functional currency and also the Group's presentation currency.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions, or of valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of income.

Foreign exchange variations arising from the settlement of such transactions and from the translation of monetary assets and liabilities into foreign currency at the closing foreign exchange rates are recognized as gain or losses in profit or loss for the year in the "Other operating income and expenses" account.

2.5 Cash and equivalents

Cash and cash equivalents include cash in hand, bank deposits and short-term highly liquid money market investments, with maturities of 90 days or less on the date of acquisition, which are used by the Group to manage its short-term commitments, with immaterial risk of change in value.

2.6 Sales with repurchase commitment and purchases with resale commitment

The Group has purchase transactions with a commitment to resell ("resale commitment") and sale transactions with a commitment to repurchase ("repurchase commitment") financial assets. Resale commitments and repurchase commitments are booked under "Open market investments" and "Repurchase agreements," respectively

The amounts invested in transactions with resale commitment and the amounts raised in transactions with repurchase commitment are recorded initially in the balance sheet at the amounts received in advance or raised and they are subsequently recorded at amortized cost. The difference between the sale price and the repurchase price is treated as interest and it is recognized during the term of the agreement using the effective interest method. The interest accrued in transactions with resale commitment and the interest incurred in transactions with repurchase commitment is recorded in the "Interest income and similar earnings" and "Interest cost and similar expenses" accounts, respectively.

The financial assets accepted as guarantees in resale commitments can be used, when allowed by the terms of the agreements, as guarantees of repurchase commitments or they can be sold.

In Brazil, the control of the custody of financial assets is centralized and the ownership of the resale commitment and repurchase commitment is temporarily transferred to the buyer. We closely monitor the market value of the financial assets that back the transactions with repurchase commitment and we adjust the amount of the guarantee when appropriate.

The financial assets offered in guarantee to the counterparties are also maintained in the interim consolidated financial statements. When the counterparty is entitled to sell or use as guarantee the marketable securities offered in guarantee, these securities are reclassified in the balance sheet to an appropriate class of financial assets.

2.7 Financial assets and liabilities

2.7.1 Recognition and measurement

(a) Classification and measurement of financial assets

The Group started to apply IFRS 9 – Financial instruments and classifies its financial assets in the following measurement categories:

(i) Amortized cost;
(ii) Fair value through other comprehensive income;
(iii) Fair value through profit or loss.

The subsequent classification and measurement of financial assets will depend on the business model under which cash flows are managed and their characteristics – SPPI Test (Solely Payment of Principal and Interest Test).

The business model refers to how the Bank manages its financial assets to generate cash flows. The business model determines whether the cash flows result from the recognition of contractual cash flows, sale of assets or both. Financial assets can be managed for the purpose of: i) obtaining contractual cash flows; ii) obtaining contractual cash flows and sale; or iii) others.

The assessment of the business models takes into consideration the risks that affect the performance of the business model, how the business managers are compensated, and how the performance of the business model is assessed and reported to management. If cash flows are realized differently from expectations, the classification of the remaining financial assets maintained in this business model is not changed.

When the financial asset is maintained in the business models i) and ii), the application of the SPPI test is necessary.

SPPI Test: assessment of the cash flows generated by the financial instrument for the purpose of verifying whether they consist only of the payment of the principal and interest. To comply with this concept, cash flows must include only a consideration for the value of money in time and the credit risk.

If the contractual terms introduce an exposure to risks or volatility in cash flows, such as exposure to changes in the prices of equity instruments or commodity prices, the financial asset is classified as measured at fair value through profit or loss. Hybrid contracts must be assessed as a whole, including all the embedded characteristics. A hybrid contract that contains an embedded derivative is accounted for on a joint basis, that is, the entire instrument is measured at fair value through profit or loss.

(i) Amortized cost

The amortized cost is the amount for which the financial asset or liability is measured upon initial recognition, plus the adjustments made using the effective interest method, less the repayment of the principal and amortization of interest, adjusted for any provision for expected credit loss.

The assets measured at the amortized cost are managed to obtain the cash flows made up only of payments of the principal and interest (SPPI Test).

Assets are recognized initially at fair value plus transaction costs and they are subsequently measured at the amortized cost using the effective interest method.

Interest, including the amortization of premiums and discounts, are recognized in the consolidated statement of income in the “Interest income and similar earnings" account.

(ii) Financial assets at fair value through other comprehensive income

- Assets managed to obtain the cash flows made up only of payments of the principal and interest (SPPI Test) and for sale;

- Initially and subsequently recognized at fair value plus transaction costs; and

- Unrealized gains and losses (except for the expected credit loss, foreign exchange differences, dividends and interest income) are recognized, net of the applicable taxes, in the “Accumulated comprehensive income” account.

(iii) Financial assets at fair value through profit and loss and financial assets designated at fair value

- Assets that do not meet the classification criteria of the previous categories; or assets designated upon initial recognition as at fair value through profit or loss to reduce “accounting mismatches”;

- Initially and subsequently recognized at fair value;

- Transaction costs are directly recorded in the Statement of income; and

- Gains and losses arising from changes in fair value are recognized in the “Net gain (loss) on financial assets and liabilities” account.

The Group irrevocably designates financial assets at fair value through profit and loss upon initial recognition (fair value option) when the option significantly reduces or eliminates measurement or recognition inconsistencies that, otherwise, could result from the measurement of assets and liabilities or the recognition of gains and losses on these assets and liabilities on different bases.

Effective interest rate

The effective interest rate is the rate that discounts future estimated receipts or payments over the expected life of the financial asset or liability. For the calculation of the effective interest rate, cash flows are estimated taking into consideration all contractual terms of the financial instrument, but not the future credit loss. The calculation includes all commissions paid or received between the parties to the contract, the transaction costs and all other premiums or discounts. Interest income is calculated by applying the effective interest rate on the gross carrying amount of the financial asset.

In the case of financial assets with recovery problems, the adjusted effective interest rate is applied (considering the expected credit loss) at the amortized cost of the financial asset.

(iv) Financial liabilities at amortized cost

The financial liabilities that are not classified at fair value through profit or loss are classified in this category and, initially, they are recognized at fair value and, subsequently, they are measured at the amortized cost using the effective interest method. Interest cost is presented in the interim consolidated statement of income in “Interest cost and similar expenses”.

Borrowings or onlendings of financial assets represent the credit assignment obligations with or without co-obligation. The amounts are represented at the present value of future financial commitments, decapitalized at the original credit assignment rate.

(b) Hedging

The Group adopts hedge accounting and chose to adopt IFRS 9, continuing to apply the IAS 39 criteria, as allowed in the initial adoption.

In accordance with IAS 39, to qualify as accounting hedge, all the following conditions must be met:

- hedging relationship is at its inception formally designated and documented, together with entity’s risk management objective and strategy for undertaking the hedge.

- the hedge is expected to be highly effective in achieving offsetting changes in fair value or cash flows attributable to the hedged risk (consistently with the documentation) for this hedging relationship in particular.

IAS 39 then describes the rules for three types of hedging: fair value hedges, cash flow hedges and hedges of a net investment in a foreign operation. The bank does not have net investment hedge in operations abroad and fair value hedge.

The fair values of the many derivative instruments used for hedging purposes are disclosed in Note 7. The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining period to maturity of the hedged item is more than 12 months, and as a current asset or liability when the remaining period to maturity of the hedged item is less than 12 months.

(i) Fair value hedge

For the derivative financial instruments that are designated and qualify as fair value hedge, the following practices apply:

Docusign Envelope ID: 3E65D4B1-84AC-856A-809D-8387566F9855

a) the gain or loss resulting from the new measurement of the hedging instrument at fair value should be recognized in profit or loss; and

b) the gain or loss resulting from the hedged item attributable to the effective portion of the hedged item should adjust the carrying amount of the hedged item that will be recognized in profit or loss.

When the derivative expires or is sold, when the hedge no longer meets the criteria for hedge accounting or when the entity revokes the designation, the entity must prospectively discontinue the hedge accounting. Additionally, any adjustment to the carrying amount of the hedged item must be amortized in profit or loss.

(ii) Cash flow hedge

The effective portion of the changes in the fair value of the derivative financial instruments that are designated and qualified as a cash flow hedge is recognized in other comprehensive income in the "Carrying value adjustment" account. The gain or loss relating to the ineffective portion is immediately recognized in the statement of operations within "Net gain (loss) on financial assets and liabilities".

The amounts accumulated in other comprehensive income are realized in the statement of income in the periods when the hedged item affects profit or loss (for example, when the forecast sale that is hedged takes place). For the derivative financial instruments that are designated or qualify as cash flow hedge, the effective portion of the gains or losses on the derivative is directly recorded in other comprehensive income and reclassified to profit or loss in the same period or periods when the hedged transaction affects profit or loss. The portion of gains and losses on the derivative financial instruments that represent the ineffective portion or the components of the *hedge* excluded from the effectiveness analysis is recognized in profit or loss. The amounts originally recognized in the accumulated comprehensive income and subsequently reclassified to profit, or loss are recognized in the corresponding income or cost line in which the related hedged item is reported.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in comprehensive income and is recognized in profit or loss when the transaction is recognized in the statement of income. When a transaction is no longer expected to occur, the accumulated gain or loss that was reported in other comprehensive income is immediately transferred to the statement of income within "Interest income and similar earnings" and "Interest cost and similar expenses".

(c) Modification of contractual cash flows

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and this does not change substantially its terms and conditions, the Group does not write them off. However, the gross carrying amount of this financial asset is recalculated as the present value of the renegotiated or modified contractual cash flows, discounted by the original effective interest rate. Any costs or fees incurred adjust the modified carrying amount and are amortized over the remaining term of the financial asset. If, on one hand, the renegotiation or modification substantially changes the terms and conditions of the financial asset, the Group derecognizes the original asset and recognizes a new one. The date of the renegotiation is, consequently, considered as the date of initial recognition of the new asset for the purpose of calculating the expected credit loss, including determining significant increases in credit risk. The Group also assesses whether the new financial asset can be considered as originated or purchased with credit recovery problems, particularly when the renegotiation was motivated by financial difficulties of the debtor. Differences between the carrying amount of the original asset and the fair value of the new asset are immediately recognized in the Statement of income.

(d) Transfer of financial assets

Financial assets are derecognized when the rights to receive cash flows expire or when all risks and rewards of ownership are substantially transferred, and such transfer qualifies for derecognition in accordance with the requirements in IFRS 9. If it is not possible to identify the transfer of all risks and rewards, the control must be assessed to determine if the continuous involvement related to the transaction does not prevent the derecognition. If, during the assessment, the retention of risks and rewards is characterized, the financial asset remains recorded, and a liability is recognized for the consideration received.

Docusign Envelope ID: 3E65D4B1-84AC-856A-809D-8387566F9855

(e) Derecognition of financial assets

When there are no reasonable expectations of recovery of a financial asset, taking into consideration the historical curves, the financial asset is totally or partially derecognized together with the reversal of the provision for expected credit loss, with no effects on the Group's statement of income. The subsequent recoveries of the amounts previously derecognized are accounted for as income in the statement of income.

(f) Fair value

Fair value is the price that would be received for the sale of an asset or that would be paid for the transfer of a liability in an arm's length transaction between market participants on the measurement date.

(g) Equity instruments

An equity instrument is any contract that provides a residual participation in the assets of an entity, after the deduction of all of their liabilities, such as shares and quotas.

The Group subsequently measures all of its equity instruments at fair value through profit or loss, except when management chooses, upon initial recognition, to irrevocably designate an equity instrument as at fair value through other comprehensive income if it is maintained for a purpose other than to generate profit. When this choice is made, the gains and losses in the fair value of the instrument are recognized in Accumulated comprehensive income and are not subsequently reclassified to the statement of income, even upon sale. Dividends continue to be recognized in the statement of income when the Group's right is recognized.

Gains and losses in equity instruments measured at fair value through profit or loss are accounted for in the statement of income.

2.8 Financial lease operations (as lessor)

When the assets are the subject matter of a financial lease, the present value of the payments is recognized as a receivable in the consolidated balance sheet in the "Loan and lease operations" account.

The initial direct costs, when incurred by the Group, are included in the initial measurement of the lease receivables, reducing the amount of the income recognized over the term of the lease. These initial costs often include commissions and attorneys' fees.

The recognition of interest income reflects a constant return rate on the Group's net investment and takes place in the consolidated statement of income in the "Interest income and similar earnings" account.

2.9 Provision for impairment of financial assets

Expected credit loss

The Group assesses the expected credit loss associated with financial assets measured at amortized cost or fair value through other comprehensive income, with loan commitments and with financial guarantee contracts on a prospective basis. The provision for expected credit loss is recognized in the Statement of Income on a monthly basis.

Measurement of expected credit loss

- Financial assets: the loss is measured at the present value of the difference between the contractual cash flows and the cash flows the Bank expects to receive discounted at the effective rate charged;

- Loan commitments: the loss is measured at the present value of the difference between the contractual cash flows that would be due if the loan was contracted, and the cash flows the Bank expects to receive;

- Financial guarantees: the loss is measured by the difference between the payments expected to reimburse the counterparty and the amounts expected to be recovered by the Bank.

The expected loss estimation methodology considers the use of the following factors:

Docusign Envelope ID: 3E65D4B1-84AC-856A-809D-8387566F9855

- Exposure at Default (EAD): is the value exposed to credit risk, using as reference the outstanding balance of the contracts and the possibility of using the approved limits;

- Default Probability (PD): it is defined as the probability of the counterparty not honoring its contractual payment obligations, using historical data and registration information of customers and contracts for estimation;

- Loss Given Default (LGD): is the percentage of exposure that is not expected to be recovered in case of default, using for estimation historical parameters of delay levels, guarantees of operations and coverage by credit insurance.

The Group assesses in every reporting period whether the credit risk significantly increased based on reasonable and sustainable information that is relevant and available without undue cost or effort, including qualitative, quantitative and prospective information. Prospective information is based on macroeconomic scenarios reassessed every year or whenever market conditions so require.

The Group classifies assets in three stages to measure the expected credit loss, in which the financial assets migrate from one stage to another in accordance with the changes in credit risk.

Stage 1: It is understood that a financial instrument in this stage does not present a significant increase in the risk from its initial recognition. The provision for this asset represents the expected loss resulting from possible non-compliance in the next 12 months;

Stage 2: If a significant increase in the risk is identified from the initial recognition, and no deterioration is realized, the financial instrument falls within this stage. In this case, the amount related to the provision for expected loss due default reflects the estimated loss of the financial instrument remaining life. To assess the significant increase in credit risk, quantitative measurement indicators used in regular credit risk management will be used, as well as other qualitative variables, such as the indication of a non-deteriorated operation is it is considered refinanced or operations included in a special agreement, and;

Stage 3: A financial instrument is registered in this stage when it shows indications of clear impairment arising from one or more past event that already materialized in a loss. In this case, the amount related to the provision for losses reflects the expected losses arising from the credit risk in the expected financial instrument remaining life.

Change of stage

An asset will migrate from one stage to another as the credit risk increases. If, in a subsequent period, the quality of a financial asset improves or the significant increase in the credit risk that was previously identified reverses, the financial asset may return to the stage 1, unless it is a financial asset originated or acquired with credit recovery problems.

Domestic and foreign government bonds are considered financial assets with low credit risk and, therefore, they remain in stage 1, in accordance with a study carried out by the Group.

The Group assesses whether the credit risk significantly increased on an individual or collective basis. The individual model is applied when the portfolio is material and has adequate history for statistical modelling. Otherwise, the collective analysis is applied. For the purpose of a collective assessment, financial assets are grouped based on credit risk characteristics shared, taking into consideration the type of instrument, credit risk ratings, the initial recognition date, the remaining term, industry, geographic position of the counterparty among other relevant factors.

2.10 Available for sale non-current assets

In conformity with IFRS 5, assets whose carrying amount can be recovered, particularly by means of a sales transaction instead of the continuous use, were recorded in this category.

They are composed of real estate properties, machinery and equipment and vehicles not used in operations, which were acquired or received as payment in kind.

These assets are sold when they are received as payment in kind. However, those whose negotiation may reveal to be difficult are periodically assessed for impairment based on a technical report. Additionally, investments that are available for immediate sale and whose disposal is highly probable, are classified as held for sale, and measured at the lower of the net book value and the fair value of the asset.

2.11 Intangible assets

Goodwill

Goodwill represents the excess of the cost of an acquisition over the net fair value of the assets and liabilities of the acquired subsidiary. Goodwill on acquisitions of subsidiaries is recorded as “Intangible assets” in the consolidated financial statements. If negative goodwill is determined, the amount is recorded as a gain in the statement of income on the date of acquisition. Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

The goodwill is allocated to the Cash Generating Units (“CGUs”) for the purposes of impairment testing. The goodwill is allocated to the Cash Generating Units or to the groups of Cash Generating Units, which may benefit from the business combination from which the goodwill originated and they are identified in accordance with the operating segment.

Other Intangible Assets

Represented primarily by software licenses and other intangible assets. Those considered to have finite useful lives are amortized over their estimated economic useful lives, while those classified as having indefinite useful lives and not yet available for use are tested for impairment annually.

2.12 Property and equipment

Property and equipment are stated at historical cost less accumulated depreciation. Historical cost includes expenditures that are directly attributable to the acquisition of the items

Subsequent costs are included in the asset’s carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the costs can be reliably measured. All other repair and maintenance costs are charged to expenses as incurred.

Land is not depreciated. Depreciation of other assets is calculated using the straight-line method as follows:

	Years
Buildings	Between 20 and 25
Security system	Between 18 and 20
Installations	Between 8 and 10
Furniture and equipment in use	Between 8 and 10
Communication system	Between 8 and 10
Vehicles	Between 3 and 5
Data processing system	Between 3 and 5

An asset’s carrying amount is written down immediately to its recoverable amount if the asset’s carrying amount is greater than its estimated recoverable amount (Note 2.13).

The gains and losses on disposals are determined based on the comparison of results with the carrying amount and they are recognized in the “General and administrative expenses” account.

2.13 Provision for impairment of non-financial assets

Non-financial assets are reviewed for impairment at the balance sheet date or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

Docusign Envelope ID: 3E65D4B1-84AC-856A-809D-8387566F9855

An impairment loss is recognized by the excess of the asset's carrying amount over its recoverable amount. The recoverable amount is the highest of an asset's fair value less costs to sell and its value in use. For the purpose of assessing the provision for impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (Cash-Generating Units ("UGCs")). The non-financial assets for which a provision for impairment was recognized, except goodwill, are reviewed for an analysis of a possible reversal of the provision for impairment on the date of the presentation of the financial statements.

2.14 Provisions

Provisions for judicial actions (labor, civil and tax) are recognized when the Group has a present or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated.

When there are a number of similar obligations, the probability of settling them is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of settlement related to any one item included in the same class of obligations is small.

These judicial actions are assessed based on the best estimates of management, taking into consideration the opinion of legal advisors when it is likely that financial resources will be required to settle the obligations and that the amount of the obligations can be reliably estimated.

2.15 Current and deferred income tax and social contribution

The provision for current taxes is constituted at the rate of 15% on the calculated profit plus an additional 10% on that which exceeds R$20/month, for income tax, 20% for Social Contribution on Net Profit "CSLL" according to Constitutional Amendment No. 103 of November 12, 2019 from January 2022 to July 2022 and, 21% between August 1 and December 31, 2022 according to Law No. 14,446/22.

The deferred income tax and social contribution are represented by the tax credits and deferred tax liabilities obtained by the differences between the accounting calculation basis and the tax calculation basis, in accordance with the tax rules and legislation, at the tax rates in effect on the date they are created.

The tax credit arising from tax loss carryforwards is only recognized if there is sufficient future taxable income for its offset.

2.16 Profit sharing

The Group recognizes a liability and an expense for profit sharing based on a methodology that takes into consideration the profit attributable to the Group's stockholders after certain adjustments. The Group recognizes a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

2.17 Share Capital

The share capital is composed of common and preferred shares, nominative and with no par value (Note 22 (a)).

2.18 Revenue recognition

The most significant criteria used by the Group to recognize its income and costs are summarized below:

(a) Interest income, interest cost and similar earnings and expenses

Interest income, interest expenses and similar earnings and expenses are recognized using the effective interest method. For the loan operations in which the payment of principal or interest is overdue for 90 days or more, interest income will no longer be recognized.

(b) Commissions, fees and similar items

Income and costs from fees and commissions are recognized in the consolidated statement of income, as part of the effective interest rate, using criteria that vary in accordance with their nature. The main criteria are as follows:

- Income and costs from fees and commissions, related to financial assets and liabilities measured at fair value in profit or loss are recognized when they are incurred.

- Income and costs resulting from transactions or services carried out over a long period of time are recognized over the life of these transactions or services using the straight-line method.

- Income and costs related to services provided in a single act are recognized upon the performance of this single act.

(c) Non-financial income and expenses

They are recognized for accounting purposes on the accrual basis.

(d) Deferred charges and payments

They are recognized for accounting purposes at the amount resulting from the discount of expected cash flows at market rates.

2.19 Earnings per share

Earnings per share are calculated by the division of profit attributed to the Group's controlling stockholders by the weighted average number of common and preferred shares outstanding every year. The weighted average number of shares is calculated based on the periods in which the shares were outstanding.

2.20 Distribution of dividends and interest on capital

The distribution of dividends and interest on capital to the Group's stockholders is recognized as a liability in the Group's Financial statements at the year end, or when declared, based on the Group's By-Laws, calculated based on profit or loss determined in accordance with the accounting practices adopted in Brazil applicable to financial institutions authorized to operate by the Central Bank of Brazil. Any amount that exceeds the minimum required is only provided when declared under the By-Laws and/or on the date it is approved by the stockholders at the General Stockholders' Meeting.

The tax benefit from interest on capital is recognized in the statement of income.

3. Critical accounting estimates and judgments

Estimates and judgments are continually reassessed and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Based on assumptions, the Group makes estimates concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next year are described below.

These estimates are based on current expectations and on estimated projections of future events and trends that may affect the consolidated financial statements. The main assumptions that can affect these estimates, in addition to those previously mentioned, are related to the following factors: The main assumptions that can affect these estimates, in addition to those previously mentioned, are related to the following factors:

- Variation in the amounts deposited, in client base and in borrowers' default rates.
- Changes in interest rates.
- Changes in inflation rates.
- Government regulations and tax issues.
- Adverse legal proceedings or disputes.
- Credit, market and other risks arising from credit and investment activities.
- Changes in the market values of Brazilian securities, especially Brazilian government bonds.
- Changes in regional, national and international business and economic conditions.

Docusign Envelope ID: 3E65D4B1-84AC-856A-809D-8387566F9855

(a) Measurement of the provision for impairment of financial assets in "Financial Assets Measured at Amortized Cost"

Assets classified in the financial assets measured at amortized cost category are stated at amortized cost and adjusted by the effective interest rate.

On the base date of the financial statements, the Group must assess the losses inherent to the financial assets measured at the amortized cost. The determination of impairment losses on loans and receivables requires a high level of judgment that involves different evaluation criteria, such as an analysis of the specific characteristics of each loan and receivable portfolio, the existing guarantees and the risk of the operations.

The Group uses internal models to analyze the portfolios of loans and receivables and determine the required provision for losses in accordance with Note 2.9. These models use statistical factors of historical losses observable from a time window that is sufficient to capture seasonal effects and remove the effects of unusual market conditions for groups of loans with similar risk characteristics.

(b) Provision, Contingent Liabilities and Contingent Assets

The group periodically reviews its contingencies. These contingencies are assessed based on the best estimates of management, taking into consideration the opinion of legal advisors when it is likely that financial resources will be required to settle the obligations and that the amount of the obligations can be reliably estimated. For the contingencies classified as "Probable", provisions are recognized in the Balance Sheet in the "Provisions" account, as described in Note 19.

The amounts of contingencies are measured using models and criteria that allow their proper measurement despite the uncertainty that is inherent to terms and amounts.

(c) Deferred income tax and social contribution

Deferred tax assets are recognized only in relation to temporary differences to the extent that it is probable that the Group will have future taxable income against which deferred tax assets can be used. Other deferred tax assets (tax credits and tax loss carryforwards) are recognized only when it is probable that the Group will have sufficient future taxable profits against which such credits can be used. In accordance with current regulation, the expected realization of the Group's tax assets is based on the projection of future revenue and technical studies.

(d) Impairment of Goodwill

The review of the impairment allowance reflects the Group's best estimate of future cash flows from Cash Generating Units (CGUs), with the identification of CGUs and the estimation of their fair value minus selling costs and/or value in use. These flows are subject to market conditions and uncertain factors, as follows:

- Projected cash flows for the periods of available forecasts and long-term assumptions of these flows;

- Discount rates as they generally reflect financial and economic variables, such as the risk-free interest rate and a risk premium.

CGUs or CGU groups are identified at the lowest level at which goodwill is monitored for internal administration purposes. Goodwill is allocated to cash flow generating units for the purpose of the impairment test.

(e) Share based payment

The Bank has a specific Compensation Plan for its Directors, which includes guidelines for the payment of fixed and variable compensation in line with the Bank's risk management policy. The amount of fixed compensation is approved annually at the General Meeting. The right to variable compensation is subject to the achievement of the Consolidated strategic objectives, individual goals and targets for the areas of activity of the Directors.

At an extraordinary general meeting held on April 3, 2020, the Bank implemented a Long-Term Incentive Plan, the purpose of which is to allow directors and certain employees of the Bmg Group designated by the Bank's Compensation and Personnel Committee and approved by the Board of Directors (collectively, "Employees") to

receive preferred shares issued by the Bank as a long-term incentive that will make up their respective variable compensation.

4. Financial risk management

The Group's activities expose it to several financial risks: market risk (including currency risk, fair value and cash flow interest rate risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial performance. The Group uses derivative financial instruments to hedge certain risk exposures.

Risk management is carried out by a specific office of the Group in accordance with the policies approved by the Board of Directors. The Group's Risk department identifies, assesses and protects the Group against any financial risks in co-operation with the Group's operating units. The Board of Directors establishes written principles for overall risk management, as well as for specific areas, such as foreign exchange risk, interest rate risk, credit risk, the use of derivative and non-derivative financial instruments, and investment of cash surplus, and these principles are monitored through reviews of the Asset and Liability Committee ("ALCO").

4.1 Credit and socioenvironmental risk

The Group is exposed to credit risk, which is the risk that arises when a counterparty causes a financial loss by failing to settle an obligation. Significant changes in the economy or in the financial health of a particular economic activity segment that represents a concentration in the portfolio held by the Group may result in losses that differ from those for which a provision is recognized at the balance sheet date. Therefore, management carefully controls the exposure to credit risk.

Exposures to this type of risk mainly arise from direct loan operations, indirect loan operations (onlendings with the intermediation of financial agents) and other financial instruments. There is also the credit risk in connection with financial agreements that are not recorded in the balance sheet, such as loan commitments. Credit risk control and management are carried out by the Risk Department.

Banco Bmg's Socio-environmental Responsibility policy, which follows the provisions of CMN Resolution No. 4,945/21, institutes guidelines and consolidates socio-environmental practices in business and in customer relations. The policy establishes prohibited segments, for which we do not grant credit, and restricted sectors, for which the social and environmental risk analysis is more detailed and rigorous. It also determines practices, which include risk management and socio-environmental impact analyses for the purpose of credit and supplier management, conducted through the analysis of socio-environmental practices. In this case, socio-environmental risk is analyzed in order to mitigate operational risk, capital risk, credit risk and reputational risk.

4.1.1 Maximum exposure to credit risk

The table below presents the maximum exposure to credit risk, without considering the guarantees received or other credit enhancements.

	2026	2025
Cash and deposits on demand	365,198	517,839
Money market	121,000	50,174
Compulsory deposits in the Central Bank	823,135	873,776
Financial assets stated at fair value through other comprehensive income – marketable securities	4,666,765	8,148,634
At fair value through profit or loss - marketable securities	1,648,049	4,059,793
At fair value through profit or loss - Derivative financial instruments	57,155	54,342
Financial assets measured at amortized cost	28,344,702	26,915,809
Off-balance	**4,512,589**	**5,506,292**
Guarantees and sureties	361,264	351,378
Credits to be released	4,151,325	5,154,914
Total maximum exposure to credit risk	**40,538,593**	**46,126,659**

For assets recorded in the balance sheet, the exposures described are based on net carrying amounts. This analysis includes only the financial assets that are subject to credit risk, and non-financial assets are not included.

Docusign Envelope ID: 3E65D4B1-84AC-856A-809D-8387566F9855

As shown in the table above, the most significant exposure arises from loans and receivables and financial assets at fair value through other comprehensive income.

The credit risk limits are determined based on internal or external classifications in accordance with the limits determined by the Board of Directors. The use of the credit limits is regularly monitored. See Note 4.1.4 for further disclosure on credit risk.

4.1.2 Risk limit control and mitigation policies

The Group manages, limits and controls credit risk concentrations whenever they are identified, particularly for counterparties and individual groups. Management structures the risk levels it assumes, establishing limits on the acceptable risk extent related to a specific debtor and groups of debtors. These risks are monitored and are subject to annual or more frequent reviews, when necessary, and are approved by the proper authorities that are determined by the Corporate Credit Committee. The payroll loan credit card is a large volume mass-market product with low average ticket, which reduces the credit concentration risk.

Credit risk exposure is also managed by the regular analysis of actual and potential borrowers with regard to the payments of the principal amount and interest and of the changes of limits when appropriate.

One of the ways to mitigate credit risk is to take guarantees on the release of funds. The Group implements guidelines on the acceptance of specific classes of guarantees or mitigation of credit risk. The main types of guarantees for loan operations are:

- Fiduciary lien;
- Pledge;
- Mortgage;
- Promissory note;
- Letter of guarantee.

The internal classification tool helps the Group determine the objective evidence of the provision for impairment in accordance with IFRS 9, based on the criteria described in Note 2.9.

4.1.3 Quality of financial assets

The quality of the Group's financial assets, which are assessed on an individual basis, is measured in accordance with the internal risk classification and is presented as follows:

	2026		
	Internal risk classification		
	Low	Medium	High
Cash and deposits on demand	365,198	-	-
Money market	121,000	-	-
Compulsory deposits in the Central Bank	823,135	-	-
Financial Assets Measured at Amortized Cost - Credit Operations	20,622,007	777,977	1,843,833
Financial assets stated at fair value through other comprehensive income – marketable securities	4,666,765	-	-
At fair value through profit or loss	1,648,049	-	-
At amortized cost - Marketable securities	5,992,348	-	-
Derivative financial instruments	57,155	-	-

	2025		
	Internal risk classification		
	Low	Medium	High
Cash and deposits on demand	517,839	-	-
Money market	50,174	-	-
Compulsory deposits in the Central Bank	873,776	-	-
Financial Assets Measured at Amortized Cost - Credit Operations	20,739,417	1,199,501	1,399,934
Financial assets stated at fair value through other comprehensive income – marketable securities	8,148,634	-	-
At fair value through profit or loss	4,059,793	-	-
At amortized cost - Marketable securities	4,372,250	-	-
Derivative financial instruments	54,342	-	-

4.1.4 Concentration of risks

The individual risk limits in loan operations are determined in specific operational regulations.

These limits are frequently monitored and, in the event of departure from the limit, the officer responsible for risk management will be immediately communicated and will have to develop and manage the performance of an action plan for correction and adjustment.

The high volume of operations carried out by the Institution requires a complex structure of technological environment to process these transactions and internal controls.

4.2 Market risk

Market risk is defined as the possibility of losses resulting from the variation of market prices and rates due to the mismatching of terms, currencies and indexes in the positions held by the Group. Operations classified as market risk sources are those subject to changes in foreign exchange rates, interest rates and commodity prices. The investment portfolios measured at fair value through profit or loss include all the securities owned by the investment funds, the daily changes in which are regularly monitored.

Financial instruments measured at fair value through other comprehensive income basically correspond to Marketable securities. This portfolio includes interest rate, price index and foreign exchange risks. The measurement techniques used to measure and control the market risk are described below:

Market risk measurement techniques

Value at Risk *("VaR")*

VaR is an estimate based on potential loss statistics for the current investment portfolio arising from adverse changes in market conditions. It expresses the "maximum" amount that the Group can lose at a certain confidence level (99%). There is, therefore, a one percent (1%) probability that actual losses are higher than the VaR estimate. This model presumes a holding period for all positions (10 days). In addition, it also presumes that changes during

such period will maintain a pattern similar to the changes that occurred in previous ten-day holding periods. The VaR is used to measure the risk of banking portfolio financial operations that are subject to changes in fixed interest rates denominated in Brazilian reais and in the Long-Term Interest Rate (TJLP), changes in price indexes denominated in the Broad Consumer Price Index (IPCA) and the General Market Price Index (IGP-M), and the foreign exchange variation. These limits are daily monitored by the Risk Department.

Stress test

As in the management of market risk exposure, financial instruments are segregated into trading and banking portfolios according to best market practices and to the operation classification and capital management criteria of Basel III New Standardized Approach of Bacen. The banking portfolio consists of commercial and structural operations arising from the different business lines of the Group and their hedges. Therefore, the entire portfolio of the Group to be analyzed regarding market risk is classified as banking.

The summarized table below shows the effects of price variations in the projected scenarios and does not necessarily reflect the current position, in view of the market dynamics and the Group's activities.

Stress tests provide an indication of the potential volume of losses that might arise from extreme market situations. The stress tests for the banking portfolio are conducted by the Risk Department.

Banking portfolio

		2026		
Risk factors	Definition	Scenario 1	Scenario 2	Scenario 3
Foreign currency	Exposures subject to foreign exchange variation	(1,159)	(2,897)	(5,795)
Interest rates in reais	Exposures subject to changes in fixed interest rates	(58,105)	(145,261)	(290,523)
Foreign exchange coupon	Exposures subject to changes in foreign exchange coupon rates	(1,674)	(4,186)	(8,372)
IPCA / IGP-M	Exposures subject to changes in price index coupon rates	699	1,747	3,494
TR	Exposures subject to changes in price of Referential rate	(7,877)	(19,692)	(39,384)
Total		**(68,116)**	**(170,289)**	**(340,580)**

		2025		
Risk factors	Definition	Scenario 1	Scenario 2	Scenario 3
Foreign currency	Exposures subject to foreign exchange variation	274	684	1,369
Interest rates in reais	Exposures subject to changes in fixed interest rates	(86,228)	(215,571)	(431,142)
Foreign exchange coupon	Exposures subject to changes in foreign exchange coupon rates	6,826	17,066	34,131
IPCA / IGP-M	Exposures subject to changes in price index coupon rates	19,778	49,444	98,888

Total		**(69,035)**	**(172,591)**	**(345,181)**

The Group's financial instruments are classified as banking portfolio and they comprise loan operations, instruments for the raising of financial resources to be used to finance the loan portfolio, financial assets – FVOCI marketable securities and derivative financial instruments to be used to hedge other operations classified in this portfolio (asset or liability).

The risk factors identified are as follows:

- Interest curve – loss arising from price variations due to variations in Brazilian real-denominated fixed interest rates;
- Foreign exchange coupon – loss arising from price variations due to variations in the domestic interest rate for operations indexed to foreign exchange variation;
- Foreign exchange – loss arising from price variations due to variations in any currency.
- IPCA/IGP-M: loss arising from price index variations.

Assumptions for the risk factors		
Scenario	**in the interest curves, price index coupons and foreign exchange coupon**	**Foreign exchange**
1	Parallel shift of + 100 basis points	10% increase
2	Parallel shift of + 250 basis points	25% increase

3	Parallel shift of + 500 basis points	50% increase

- Scenario 1 represents a parallel shock of 100 basis points (+1%) in the interest and foreign exchange coupon curves plus a 10% shock in foreign exchange rates.

- Scenario 2 represents a parallel shock of 250 basis points (+2.5%) in the interest and foreign exchange coupon curves plus a 25% shock in foreign exchange rates.

- Scenario 3 represents a parallel shock of 500 basis points (+5%) in the interest and foreign exchange coupon curves plus a 50% shock in foreign exchange rates.

4.3 Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk arising from the exposure of some currencies, primarily with respect to the U.S. dollar. Foreign exchange risk arises from future commercial transactions, recognized assets and liabilities and net investments in foreign operations.

Management established a policy that requires the Group companies to manage their foreign exchange risk. The Group companies whose operations are exposed to foreign exchange risk are required to hedge their foreign exchange risk exposure through *swap* operations carried out under the guidance of the Group' Treasury. Foreign exchange risk arises when future commercial transactions or recognized assets or liabilities are denominated in a currency that is different from the entity's functional currency.

Concentrations of currency risk–financial instruments recorded in the balance sheet

	2026	2025
Assets		
Investments in foreign currency (U.S. dollar)	278,729	430,664
Total financial assets	**278,729**	**430,664**
Liabilities		
Loan abroad (U.S. dollar)	(2,132,276)	(1,635,072)
Total financial liabilities	**(2,132,276)**	**(1,635,072)**
Total derivatives – Assets (U.S. dollar)	14,305	18,869
Total derivatives – Liabilities (U.S. dollar)	(117,000)	(74,025)
Net financial position recorded in the balance sheet	**(102,695)**	**(55,156)**

4.4 Cash flow or fair value risk associated with interest rate

The Group's interest rate risk arises mainly from funding via time deposits, interbank deposits and credit lines (FINAME) from the National Bank for Economic and Social Development (BNDES). Funds raised at variable rates expose the Group to cash flow interest rate risk. Meanwhile, funds raised at fixed rates (especially subordinated debts and short-term notes) expose the Group to the fair value interest rate risk. In 2026 and 2025, the Group's variable rate loans were mainly maintained in Brazilian reais and U.S. dollars.

The Group analyzes its interest rate exposure on a dynamic basis. Various scenarios are simulated taking into consideration refinancing, renewal of existing positions and financing. Based on these scenarios, the Group calculates the impact on the result of a defined interest rate shift. For each simulation, the same interest rate shift is used for all the currencies. The scenarios are run only for the liabilities that represent the major interest-bearing positions.

Based on the various scenarios, the Group manages its cash flow interest rate risk by using floating-to-fixed interest rate swaps. Such interest rate swaps have the economic effect of converting borrowings from floating rates to fixed rates. The fixed rates that result from this swap operation are lower than those available if the Group borrowed at fixed rates directly.

The table below summarizes the Group's exposure to interest rate risk and includes financial instruments at their carrying amounts, categorized by the earliest contractual amendment or maturity dates.

	2026			
	Up to 90 days	From 91 to 360 days	Over 360 days	Total
Open market investments	121,000	-	-	**121,000**

Total	**2,484,091**	**2,501,057**	**3,305,488**	**3,400,592**

4.5 Liquidity risk

Liquidity risk is the possibility that the Group will not have sufficient financial resources to meet its obligations due to the mismatch between payments and receipts, taking into consideration the different currencies and the settlement terms of their rights and obligations.

Liquidity risk management process

Liquidity Risk Management is carried out on a daily basis by the Risk Department through an internal system. The Group's Liquidity Risk Policy sets forth limits (liquidity buffer), which are monitored by ALCO, and, if they are extrapolated, the responsible Committee must be informed. For the decision-making processes, reports, such as cash flow, cash projection for the next six months and effective cash versus limits established and made available by Treasury, are prepared.

Funding approach

The main objective of the Group's Treasury is to provide liquidity to ensure that its financial obligations will be met, ensuring the business sustainability through funding at competitive rates and the diversification of its refinancing sources by counterparty, currency, product and term. In addition, it is aimed at mitigating financial risks through the follow-up and monitoring of the risks inherent to the business, such as market risk and liquidity risk.

4.6 Capital management

The objectives of the Group when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for stockholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group can make adjustments to the amount of dividends paid to stockholders, issue new shares or sell assets to reduce, for example, debt.

In accordance with CMN Resolution No. 4,557/17 and subsequent regulations, financial institutions are obliged to maintain equity compatible with the degree of risk of their assets, weighted by factors that vary from 0% to 1,250% and a minimum index of equity in relation to assets weighted by risk of 8% plus the respective portions of Additional Common Equity Tier 1 (ACP) and Countercyclical Buffer.

In addition, equity used for calculating the Regulatory capital is the equity calculated according to the accounting practices applicable to institutions authorized to operate by the Central Bank of Brazil (Bacen) and not to IFRS.

The Basel ratio and regulatory capital calculated to meet the rules of Brazilian Central Bank are as follows:

	Basel III	
	2026	2025
Tier I regulatory capital	**2,899,277**	**2,851,325**
Common equity tier I	**2,782,733**	**2,739,290**
- Equity (i)	4,384,508	3,892,083
- Prudential adjustments – Resolution No. 4,955/21 CMN	(1,601,775)	(1,152,793)
Complementary capital (ii)	**116,544**	**112,035**
- Subordinated debt	116,544	112,035
Tier II Reference equity (ii)	**933,912**	**878,060**
- Subordinated debt	933,912	878,060
Reference equity - (Tier I + Tier II) (a)	**3,833,189**	**3,729,385**
Risk-weighted assets – RWA (b)	**28,448,768**	**28,171,314**
Appropriation of capital		
- Credit risk	24,703,723	24,846,351
- Market risk	100,925	210,458
- Operational risk	3,644,120	3,114,505
Solvency ratio (a / b)	**13.47%**	**13.24%**
Tier I capital	**10.19%**	**10.12%**
- Common equity tier 1	9.78%	9.72%
- Complementary capital	0.41%	0.40%
Tier II capital	**3.28%**	**3.12%**
- Capital to hedge the risk of transactions subject to the variation of interest rates classified in the banking portfolio per Resolution No. 3,876 of BACEN - Installment "IRRBB".	201,144	253,389
Fixed assets ratio	**33.27%**	**28.97%**
Excess capital in relation to fixed assets	**641,250**	**784,455**

(i) Equity of the Prudential Conglomerate, as provided in CMN Resolution No. 4,955/21;
(ii) See note 17;

4.7 Fair value estimate

The Group uses the following hierarchy to determine and disclose the fair value of financial instruments:

- Level 1: quoted prices in active markets for the same instrument without change.
- Level 2: quoted prices in active markets for similar instruments or valuation techniques for which all significant inputs are based on observable market data.
- Level 3: valuation techniques for which any significant input is not based on observable market data.

The table below presents the assets and liabilities measured at fair value on September 30, 2026 and December 31, 2025.

	2026		
Description	**Level 1**	**Level 2**	**Total**
Assets			
Financial assets stated at fair value through other comprehensive income – marketable securities	4,666,765	-	**4,666,765**
At fair value through profit or loss	1,299,035	349,014	**1,648,049**
Derivative financial instruments	-	57,155	**57,155**
Total assets	**5,965,800**	**406,169**	**6,371,969**
Liabilities			
Derivative financial instruments	-	124,586	**124,586**
Total liabilities	**-**	**124,586**	**124,586**

There were no transfers between fair value hierarchy levels.

	2025		
Description	**Level 1**	**Level 2**	**Total**
Assets			
Financial assets stated at fair value through other comprehensive income – marketable securities	8,148,634	-	**8,148,634**
At fair value through profit or loss	3,741,864	317,929	**4,059,793**
Derivative financial instruments	-	54,342	**54,342**
Total assets	**11,890,498**	**372,271**	**12,262,769**
Liabilities			
Derivative financial instruments	-	83,758	**83,758**
Total liabilities	**-**	**83,758**	**83,758**

There were no transfers between fair value hierarchy levels.

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in Level 1.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value of an instrument are observable, the instrument is included in Level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

Specific valuation techniques used to value financial instruments include:

- quoted market prices or financial institution or dealer quotes for similar instruments;
- the fair value of interest rate *swaps* is calculated as the present value of the estimated future cash flows based on yield curves adopted by the market;
- the fair value of forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date, with the resulting value discounted back to present value;
- other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

The Group has no Level 3 financial assets.

4.8 Fair value of financial assets and liabilities not measured at fair value

As mentioned above, financial assets owned by the Group are measured at fair value in the consolidated balance sheet, except for loans and receivables and held-to-maturity assets.

For the same purpose, the Group's financial liabilities are stated at amortized cost in the consolidated balance sheet, except for held-for-trading financial liabilities.

A comparison between the carrying amounts of the Group's financial assets not measured at fair value and their corresponding fair values at the end of the period is presented below:

	2026				2025
	Carrying amount	Fair value	Level 2	Total	Total
ASSETS					
Loan and lease operations and financial assets at amortizated cost	21,413,834	21,413,834	21,413,834	**21,413,834**	**23,341,880**
LIABILITIES					
Deposits from clients	22,411,409	22,919,717	22,919,717	**22,919,717**	**23,242,592**
Borrowings and onlendings	2,518,697	2,518,697	2,518,697	**2,518,697**	**2,443,499**
Marketable securities and financial bills	7,967,250	8,045,630	8,045,630	**8,045,630**	**8,431,880**
Subordinated financial bills and debt	1,196,694	1,196,694	1,196,694	**1,196,694**	**1,142,386**
Other financial liabilities	833,222	833,222	833,222	**833,222**	**1,347,762**
Borrowings or transfers of financial assets	6,505	6,505	6,505	**6,505**	**12,109**

The assumptions used to estimate fair value are as follows:

- The amounts of all asset and liability operations subject to fixed rates were adjusted based on the fair value. The fair value rate was determined based on the average rate by product used for all the operations carried out in September 2026.

- All asset and liability operations subject to floating or fixed rates or indexes, such as the Interbank Certificate Index ("CDI"), General Market Price Index ("IGP-M"), Broad Consumer Price Index ("IPCA"), U.S. dollar and National Consumer Price Index ("INPC") were considered as already measured at fair value, since they are already subject to an index that reflects the fluctuations in the market.

- The fair value amounts were determined using the future cash flow of each operation at the effective rate of the contract and discounted to present value at the market rate, as previously determined, which includes the credit risk of the counterparty.

4.9 Guarantees for loan operations

The Group uses guarantees to reduce losses on operations with credit risk by managing these guarantees so that they are always sufficient, legally enforceable (effective) and viable, and reviewing them on a regular basis.

Loan operations not related to payroll loans are covered by the following guarantees:

Type of guarantee	2026				
	Type of product				
	Commercial portfolio	Direct consumer credit	Export Financing	Cash Deposit	Total
Fiduciary Assignment	138,224	-	157,001	103	295,328
Assignment of credit rights	867,413	14,942	123,683	346,989	1,353,027
Guarantees	-	-	-	1,008,726	1,008,726
Others	-	-	-	700	700
TOTAL	**1,005,637**	**14,942**	**280,684**	**1,356,518**	**2,657,781**

Type of guarantee	2025				
	Type of product				
	Commercial portfolio	Direct consumer credit	Export Financing	Cash Deposit	Total
Fiduciary Assignment	429,667	510	164,930	-	**595,107**
Security deposit	-	214,641		213,916	**428,557**
Assignment of credit rights	1,001,294	350,831	461,385	-	**1,813,510**
Pledge	212,063	480	-	-	**212,543**
Mortgage	788,312	-	-	-	**788,312**
Others	60,089	701	28,169	-	**88,959**
TOTAL	**2,491,425**	**567,163**	**654,484**	**213,916**	**3,926,988**

When secured loan operations become non-performing, the existing collection policy comprises the following steps: amicable debt collection, attempt to formalize the term of amicable delivery, filing an action for a search warrant of collateral, and ultimately going into auction,

4.10 Business combination and corporate changes

On January 30, 2025, a capital increase of US$20,000 was carried out at BMG Cayman, corresponding to R$117,180.

On January 30, 2025, at the Ordinary Meeting of the Board of Directors, a capital increase of USD 40,000 was approved. CIMA approved the capital increase on March 17, 2025, and the increase was subsequently effected on April 30, 2025.

On March 25, 2025, a capital reduction of R$180,000 was carried out at CBFÁCIL Corretora de Seguros e Negócios Ltda.

On August 14, 2025, a capital reduction was completed at Bmg Leasing S.A. – Arrendamento Mercantil in the amount of R$388,000**.**

On August 29, 2025, Banco Bmg S.A. completed the acquisition, through its subsidiary Bmg Participações em Seguradoras Ltda. (“Bmg Participações em Seguradoras”), of the entire equity interest held by Phoenix One Participações S.A., representing 40% of the share capital of Bmg Seguradora S.A. (“Bmg Seguradora”) (“Transaction”). The total price of the Transaction was R$65.0 million, with goodwill of R$17 million recognized against Shareholders’ Equity. Upon completion of the Transaction, the Bank, through Bmg Participações em Seguradoras, came to hold 100% of the shares issued by Bmg Seguradora, which is expected to generate greater value for the Bank’s shareholders and other stakeholders.

Investments measured by the equity method, in the amount of R$170,765 (2025 - R$167,906) are basically represented by the following companies: BMG Corretora de Seguros R$44,190 (2025 - R$50,146), Araújo Fontes Consultoria R$125,492 (2025 - R$116,677).

4.11 Sensitivity Analysis

Banco Bmg conducted a sensitivity analysis through the “Stress Testing Program” as defined in its risk policies, applying the following factors to assets and liabilities, adopting each of the scenarios listed below:

• **Optimistic:** we considered a productivity improvement of 10%, increase in credit quality by 10% (lower loan loss provision - Expected Loss), reduction of funding rates by 10%, reduction in provisions for contingencies by 10%.

• **Pessimistic 1:** we considered a 10% worsening in productivity, a 10% worsening credit quality (higher expected loss), an increase in funding rates by 10%, and an increase in contingency provisions by 10%.

• **Pessimistic 2:** we considered a productivity decrease of 20%, credit quality worsening by 20% (higher expected loss), increase in funding rates by 20%, increase in provisions for contingencies by 20%.

• **Pessimistic 3**: simulation of reverse stress where we stress the main variables to the point of zeroing out the Bank's Net Profit

	Brute effect on the result			
	Optimistic	Pessimistic 1	Pessimistic 2	Pessimistic 3
Productivity	180,532	(180,532)	(361,063)	(541,595)
Credit quality	154,048	(154,048)	(308,095)	(462,143)
Funding rates	62,787	(62,787)	(125,574)	(188,362)
Provisions for contingencies	59,762	(59,762)	(119,525)	(179,288)

5. Cash and cash equivalents and short-term interbank investments

	2026	2025
Cash and cash equivalents	365,198	517,839
Short-term interbank investments	121,000	50,174
Total	**486,198**	**568,013**

6. Financial assets

Classification by nature and category

The classification by nature and category for the purpose of valuating the Bank's assets, except balances relating to "Cash and cash equivalents, Reserves with the Central Bank of Brazil" and "Money market investments", on September 30, 2026 and December 31, 2025 as follows:

	2026			
	Financial assets FVTPL	Financial assets FVOCI	Financial assets Amortized Cost	Total

7. Derivative financial instruments

(a) Fair value of trading derivatives recognized in assets and liabilities

	Fair Value			
	2026		2025	
	Assets	(Liabilities)	Assets	(Liabilities)
Foreign exchange derivative	14,305	(117,000)	18,869	(74,025)
Interest rate and index derivatives	42,850	(7,586)	35,473	(9,733)
Total	**57,155**	**(124,586)**	**54,342**	**(83,758)**
Current	**35,799**	**(121,044)**	**46,413**	**(68,950)**
Non-current	**21,356**	**(3,542)**	**7,929**	**(14,808)**

Derivative financial instrument transactions, the sole purpose of which is to hedge against risks of the financial assets, backed by the active transaction themselves.

(b) Notional amounts and fair values of the trading derivative financial instruments

	2026		2025	
	Reference value (notional)	Net fair value	Reference value (notional)	Net fair value
Foreign exchange derivative	2,515,436	(102,694)	2,359,296	(55,156)
Interest rate derivatives	1,671,098	24,129	350,423	3,184
Index derivatives	1,118,747	11,134	142,738	22,556
Commodities derivatives	41,160	-	78,666	-
Total	**5,346,441**	**(67,431)**	**2,931,123**	**(29,416)**

(c) The breakdown of the notional amounts of the trading derivative financial instruments per maturity as follows:

	2026	2025
Up to 30 days	996,634	202,654
From 31 to 180 days	1,526,281	1,701,707
From 181 to 360 days	1,548,178	355,064
Over 360 days	1,275,348	671,698
Total	**5,346,441**	**2,931,123**

Docusign Envelope ID: 3E65D4B1-84AC-856A-809D-8387566F9855

Below are the reference and receivables/payables amount of futures operations,

Futures	Amounts receivable	Amounts payable	Reference value
DAP	613	-	1,478,692
DDI	11,682	-	1,317,769
DI1	-	(2,752)	10,236,691
DOL	-	(3,267)	400,962
Position – 2026	**12,295**	**(6,019)**	**13,434,114**
Position – 2025	**25,051**	**(7,280)**	**28,389,124**

(d) Hedging derivative financial instrument transactions

(i) Market risk hedge

To hedge its exposure to the market risk variation of CDBs indexed to the IPCA variation plus coupon, the Bank uses futures contracts (DAP) traded at B3 - Brasil, Bolsa, Balcão, as hedging instruments, with a nominal value of R$1,880,837 (R$896,565 on December 31, 2025). On September 30, 2026, the instruments generated a negative fair value adjustment recognized in profit or loss in the amount of R$33,645 (negative R$2,861 on September 30, 2025).

To hedge its exposure to the market risk variation of fixed-rate Subordinated Bank Notes, the Bank has used, since June 2022, futures contracts (DI1) traded on B3 – Brasil, Bolsa, Balcão, as hedging instruments. with a nominal value of R$588,714 (R$547,541 on December 31, 2025). These futures contracts have shorter maturities than the Subordinated Bank Notes, and the rollover of the contracts is expected in order to maintain the effectiveness of the hedge relationship. On September 30, 2026, the instruments generated a positive fair value adjustment recognized in profit or loss in the amount of R$16,381 (2025 – negative R$51,890)

In order to protect itself from exposure to variations in the market risk of the Credit Portfolio, Banco Bmg started using futures contracts (DI1) traded on the B3 - Brasil, Bolsa, Balcão exchange as hedging instruments as of August 2022 with a nominal value of R$899,055 (R$820,027 on December 31, 2025). On September 30, 2026, the instruments generated a positive fair value adjustment recognized in profit or loss in the amount of R$4,178 (2025 – positive R$42,272).

(ii) Cash flow hedge

The purpose of BMG's hedge relationship is to protect the portion of the payment cash flows to be disbursed in the funding of time deposits with floating interest rates indexed by the Interbank Deposit Certificate (CDI) to fixed rates.

In order to protect the future cash flows of the portion of the funding of time deposits against exposure to variable interest rates (CDI and IPCA), the Bank traded swaps and 1-day DI and DAP futures contracts at B3 - Brasil, Bolsa, Balcão , with the nominal value of funding being R$8,261,110 (2025 – R$18,530,506). These instruments generated an adjustment to market value in equity of R$47,178 (negative in R$44,290 on September 30, 2025)), net of tax effects.

(e) Management of derivative financial instruments

The Group is a party to transactions involving financial instruments (differences) recognized in balance sheet or memorandum accounts consistent with market transactions in the same dates to manage its exposure to market, currency, and interest rate risks, which refer basically to transactions intended to hedge assets and liabilities, involving changes in indices used for investing and raising funds, hired for consistent periods, rates, and amounts.

The Group is a party to transactions involving derivative financial instruments (swaps, options, forwards and futures contracts) to hedge own and client assets and liabilities.

These risks are managed through control policies, by setting operating strategies and limits, and several techniques used to monitor liquidity, profitability, and safety positions. The use of derivative financial instruments to minimize market risks originating from interest rate, foreign exchange rate, asset price, and other fluctuations is an integral part of the good practice and a key tool of financial institutions' financial management.

Market risk is the exposure created by potential fluctuations in interest rates, exchange rates, commodity prices, prices quoted on the Stocks market, and for other securities, and is the function of the type of product, the transaction volume, and the term and conditions of the contract and the underlying volatility, Risk management is controlled and monitored independently of the areas generating the risk exposure, Assessment and measurement are carried out on a daily basis using indices and statistical data, utilizing tools such as non-parametric "VaR" and sensitivity analysis in stress scenarios, together with ALCO.

8. Financial assets carried at amortized cost

	2026	2025
Loans and other amounts with financial institutions	**1,131**	**90**

There is no contractual commitment for the purchase of property and equipment and no property and equipment item was pledged as collateral.

10. Intangible assets

	2026	2025
On January 1	**1,784,936**	**1,636,603**
Acquisition	211,282	282,103
Amortization	(116,196)	(133,770)
Closing balance	**1,880,022**	**1,784,936**
Goodwill upon acquisition of the subsidiary	1,077,907	1,077,907
Goodwill on others - software license and others	802,115	707,029
Net carrying amount	**1,880,022**	**1,784,936**

On August 18, 2011, after the acquisition of Banco BCV S.A. (currently Banco BMG Consignado S.A.), the Company recognized goodwill amounting to R$995,585. Other intangible assets mainly refer to the capitalization of internally developed data processing systems (software).

Goodwill arising on the acquisition of Banco BCV S.A. (currently Banco BMG Consignado S.A.) is fully allocated to the retail segment.

Impairment test:

According to a study carried out, the need to recognize the goodwill impairment loss on September 30, 2026 was not identified.

The recoverable amount of goodwill was calculated based on its value in use. The calculation uses income projections based on the five-year budget, approved by management. The income projections take into consideration the discount rates sensitized by 10% to 15% and perpetuity sensibilized by 3% to 5%.

11. Other assets

	2026	2025
Insurance premiums receivable	34,142	47,832
Advance Expenses	440,387	430,932

Judicial deposits	(527,419)	(5,788)	(87,345)	**(620,552)**

The Group is a party to labor, civil, and tax lawsuits. The assessment to recognize provisions is made according to the criteria described in Note 2.14, The Group's management believes that the provision recognized is sufficient to cover losses arising from the related lawsuits.

In the course of its regular activities, the Group is a party to the following contingencies: a) contingent assets - There are no recognized contingent assets; b) Provisions - Are classified and presented together with their judicial deposits, as follows:

(i) Provision for tax risks - The judicial actions are equivalent to the amount of the principal of taxes related to administrative or judicial proceedings, which are subject to self-assessment or official assessment, plus interest and, when applicable, fines and charges. A provision is recorded, regardless of the likelihood of loss, when related to a legal obligation, that is, for a favorable outcome in the matter the law in effect must be declared unconstitutional. For other cases, a provision is recorded whenever the likelihood of loss is probable.

No provision is recognized for tax contingent proceedings in which the likelihood of loss is considered as possible, amounting to an estimated total of R$1,496,626 (2025 – R$1,530,444), These proceedings refer mainly to federal taxes.

The Group is a party to judicial actions and administrative proceedings, arising in the normal course of its operations, involving tax and other matters.

The main questions are:

a) IRPJ/IRRF/CSLL 2012, 2014 to 2019 – R$414,879 (2025 – R$435,519): questions the collection of income taxes and social contributions on expenses alleged to be non-deductible;

b) IRPJ and CSLL 2011 – R$105,479 (2025 - R$105,479): questions the exclusion of expenses from the tax bases used to calculate corporate income tax and social contribution tax;

c) IRPJ and CSLL 2016 – R$83,353 (2025 - R$91,847)- tax deduction of losses on credit operations – Law No. 9,430/96

d) PIS and COFINS – R$371,189 (2025 - R$345,774): losses from doubtful credits: the deduction of credit losses under Law 9,718/98 is under discussion;

(ii) Provisions for labor claims – A calculation is made periodically to determine a claim's amount, stage and the likelihood of loss, which in turn is estimated according to the characteristics as a matter of fact or of law related to the proceeding, the amounts considered as probable losses are provided for in accounting.

The judicial actions are related to lawsuits discussing the alleged labor benefits derived from labor laws and regulations specifically relating to a professional category, such as overtime pay, salary equalization, job reinstatement, premium for transfer, among other matters.

Contingent labor lawsuits assessed as having a possible risk of loss are not recognized in accounting terms. There are no cases classified as having a possible risk of loss as of September 30, 2026; such lawsuits are classified as having a probable or remote possibility of loss.

(iii) Provisions for civil lawsuits – The provision for individualized civil actions, lawsuits with peculiar characteristics, is periodically recognized based on the determined risk amount and likelihood of loss, the provision

for collective civil lawsuits is periodically recognized using as benchmark the average loss over time applied to the base of ongoing cases. The amounts considered as probable losses are provided for in accounting.

The civil lawsuits are in general arising from compensation for material and moral damages, mostly from the Special Civil Court.

No provision is recorded for civil contingencies representing possible risk of loss, amounting to an estimated R$717,262 (2025 – R$637,484), these claims refer to compensation claims or collections.

20. Current and deferred income tax and social contribution

The Group separately calculates, in each fiscal year, Income Tax and Social Contribution on Net Income. The taxes are calculated at the rates shown below and consider, for the purpose of the respective calculation bases, the legislation in force relevant to each charge.

Income Tax (i)	15.00%
Income Tax Surcharge (i)	10.00%
Social Contribution on the Net Profit (i)(*)	20.00%

(i) see note 2,15

(*) For non-financial companies the tax is 9%.

Deferred income tax and social contribution are calculated on income tax and social contribution loss carryforwards and temporary differences arising between the tax bases of these taxes on assets and liabilities and their carrying amounts in the financial statements.

The recoverable amounts are as follows:

	2026	2025
Deferred tax asset		
Recoverable within 12 months	1,080,950	1,211,193
Recoverable after 12 months	3,113,124	2,916,169
Total deferred tax asset (i)	**4,194,074**	**4,127,362**
Deferred tax liability		
To be settled after 12 months	27,982	63,601
Total deferred tax liability	**27,982**	**63,601**
Deferred tax assets, net	**4,166,092**	**4,063,761**

(i) Deferred income tax and social contribution credits

	2026	2025
Deferred tax asset		
On temporary additions	4,167,453	4,013,552
On tax losses/ tax loss carryforwards	642,080	582,374
Social contribution – Provisional Measure (MP) No, 2,158/35)	547	547
Adjustment to market value in equity	317,231	250,910
Income tax and social contribution on accounting practice adjustments	(933,237)	(720,021)
Total deferred tax asset	**4,194,074**	**4,127,362**

The Group recognizes all tax credits arising from temporary difference or and tax loss carry forwards.

The Group adopts the practice of recognizing deferred tax credits and tax payables on all temporary differences and tax loss carryforwards. On September 30, 2026, these balances have the following characteristics:

- The tax credits relating to temporary add-back refer mainly to contingencies currently being discussed in courts the realization of which depends on the resolution of the court challenges and the provision for impairment of receivables the realization of which depends on the deductibility criteria prescribed by Law nº 9,430/96.

(a) The changes in the tax credits can be shown as follows:

	Social contribution MP 2,158-35	Temporary additions	Tax loss carryforwards / Negative tax base	Adjustment to market value in equity	Other	Total
On December 31, 2024	**547**	**3,484,595**	**667,549**	**277,056**	**(715,331)**	**3,714,416**
Recognition	-	1,350,352	86,373	880,020	-	2,316,745

Current	**664,881**	**676,840**
Non-current	**133,057**	**134,473**

22. Capital and reserves

(a) Capital stock

As of September 30, 2026, the subscribed and fully paid-in share capital amounted to R$4,006,104 (R$3,792,104 as of December 31, 2025), represented by 648,283,696 (six hundred forty-eight million, two hundred eighty-three thousand, six hundred ninety-six) shares, comprising 414,425,631 (four hundred fourteen million, four hundred twenty-five thousand, six hundred thirty-one) common shares and 233,858,065 (two hundred thirty-three million, eight hundred fifty-eight thousand, sixty-five) preferred shares, all registered, book-entry shares with no par value.

At a Board of Directors meeting held on September 11, 2025, the full ratification of the capital increase approved by the Board of Directors at the meeting on July 15, 2025 was approved, following the completion of the private

subscription process of 15,855,883 new registered shares with no par value, comprising 10,140,581 new common shares and 5,715,302 new preferred shares without voting rights, at a price of R$3.124 per share, totaling R$49,534 thousand. The capital increase was approved by BACEN on October 31, 2025.

At a meeting of the Board of Directors held on March 19, 2026, the ratification of the entire share capital increase was approved by the Board of Directors at its meeting held on January 21, 2026, after the completion of the private subscription process of 49,195,402 new registered, book-entry shares with no par value, consisting of 31,588,852 new common shares and 17,606,550 new preferred shares without voting rights, at a price of R$ 4.35 per share, totaling R$214,000. The capital increase was approved by the Central Bank of Brazil on April 27, 2026.

At a meeting held on June 26, 2025, the Bank's Board of Directors approved a new share buyback program, effective as of June 27, 2025, authorizing the acquisition of up to 12,961,497 preferred shares issued by the Bank, without reducing the share capital. This amount corresponds to up to 10.00% of the outstanding shares, net of treasury shares currently held, for the purpose of holding in treasury, cancellation, resale on the market, or payment of compensation to executives and other beneficiaries under the Bank's long-term incentive plans, in accordance with paragraphs 1 and 2 of Article 30 of Law No. 6,404/76 (Brazilian Corporation Law) and CVM Resolution No. 77/22.

The acquisition operations under the new program will be carried out on the stock exchange, in the period between June 27, 2025 and December 21, 2026, at market value.

	Own shares				
	Own shares 12/21/2025	Acquisition of Own Shares	Share Basis Payment	Cancellation of own shares	Own shares 09/30/2026
Quantity	**2,601,348**	**4,193,000**	**(3,312,477)**	**-**	**3,481,871**

	Number of shares in circulation (i)		
	Common	Preferred	Total
On 12/31/2025	**26,848,253**	**131,931,051**	**158,779,304**
Change in treasury shares	-	(880,523)	**(880,523)**
Change in shares held by controlling shareholders and officers	(31,588,852)	(4,983,974)	**(36,572,826)**
Issue of new shares	31,588,852	17,606,550	**49,195,402**
On 09/30/2026	**26,848,253**	**143,673,104**	**170,521,357**

(i) Outstanding shares, according to art, 67, CVM Resolution 80/22, are defined as all the issuer's shares, with the exception of those held by the controller, by people linked to it, by the issuer's managers and those held in treasury.

(b) Other Comprehensive Income

In the period ended September 2026, adjustments to other comprehensive income were made in the positive amount of R$81,059 (2025 – negative R$37,258), referring to the marking to market of financial instruments, during the period ended September 30, 2025, the acquisition of BMG Seguros was also written off (Note 28e). The balance on September 30, 2026 is positive R$387,727 (December 31, 2025 – positive R$306,668) and mainly refers to the marking to market of financial instruments classified at fair value through other comprehensive income and cash flow hedge.

(c) Revenue reserves

	2026	2025
Reserve		
Legal	21,233	20,923
Statutory	1,188,814	958,967
Total	**1,210,047**	**979,890**
Accumulated deficit	(419,240)	(433,713)
Net Effect	**790,807**	**546,177**

The changes in the revenue reserves refer to the recognition of a 5% legal reserve on net income for the year and the remaining undistributed amount was allocated to the statutory reserve, as described below.

Legal: Recognized as 5% of net income for the year, limited to 20% of capital.

Statutory: Recognized based on net income not distributed after all allocation and its accumulated is available to stockholders for future decision at a General Stockholders' Meeting.

Tax incentives: Arising on the amounts of the options for income tax incentives.

(d) Interest on capital

Stockholders are entitled to receive as mandatory dividends, in each fiscal year, an amount of not less than twenty five percent (25%) of the adjusted net income, as provided for in the Brazilian Corporate Law.

Interest on Shareholders' Equity was established by Law nº 9,249/95, which in its art, 9, and amendments, allows companies to deduct from taxable income (Lucro Real) and the social contribution base from the duly recorded financial expense resulting from the application of the TJLP on shareholders' equity as compensation to the shareholder.

The table below presents the distribution of Interest on Equity paid in the period ended September 30, 2026 and in the year ended December 31, 2025.

	09/30/2026				
	Period	Approved by Board on	Payment made on	Value per share	Total amount R$ Million
Interest on Equity	1Q26	04/28/2026	05/12/2026	0.10	64.8
Interest on Equity	2Q26	07/30/2026	09/04/2026	0.10	64.3
Interest on Equity (*)	3Q26	11/05/2026	12/04/2026	0.10	64.0
Total					**193.1**

(*) Subsequent event, according note 28(g)

	12/31/2025				
	Period	Approved by Board on	Payment made on	Value per share	Total amount R$ Million

Interest on Equity	Additional	12/11/2025	01/14/2026	0.147	87.7
Total					**321.7**

(e) Retained earnings (accumulated deficit)

The contra entries to the adjustments referring to the differences between BRGAAP and IFRS that had an impact on the balance sheet were recognized in this account. Additionally, income for said years were also recognized in this account.

23. Earnings per share

(a) Basic and diluted

Basic earnings per share are calculated by dividing the profit attributable to Company's stockholders by the weighted average number of common and preferred shares issued during the year. Diluted earnings per share is calculated by adjusting the weighted average number of common and preferred shares outstanding to assume conversion of all dilutive potential common and preferred shares. However, there are no potentially dilutive Company common and preferred shares and, therefore, basic earnings per share are equal to diluted earnings per share.

	3rd Quarter 2026	2026	3rd Quarter 2025	2025
Profit attributable to stockholders of the Company	150,308	460,387	152,799	410,031
Weighted average number of shares outstanding	625,985,468	625,985,468	582,292,611	582,292,611
Basic and diluted earnings per share (in *reais*)	**0.2401**	**0.7355**	**0.2620**	**0.7042**

24. Profit or loss

(a) Interest income and expenses and similar income and charges

The table below shows the breakdown of interest and similar proceeds income and expenses:

	3rd Quarter 2026	2026	3rd Quarter 2025	2025
Interest income and similar earnings	**2,553,924**	**7,636,987**	**2,028,140**	**6,628,860**
Interest on credit operations	2,029,218	5,782,944	1,736,773	5,426,756
Interest on other loans and receivables	38,370	107,959	53,282	301,862

(i) The “Operating provisions expenses” item, basically includes expenses for tax, civil and labor contingencies.

25. Revenue from the provision of services

In the period ended September 30, 2026, the amount relating to revenue from services rendered was R$97,412 (09/30/2025 - R$108,663). The balance refers basically to income from banking fees totaling R$69,375 (09/30/2025 – R$59,441) and card interchange revenue R$22,166 (09/30/2025 – R$45,722).

26. Mandatory dividends

Dividends already paid and proposed dividends on September 30, 2026 and December 31, 2025 were calculated according to the Brazilian accounting applicable to financial institutions authorized to operate by the Central Bank of Brazil, on the individual Financial statements of Banco BMG S.A. as shown below:

	2026	2025
Profit for the period under BRGAAP	**445,914**	**388,389**
Recognition of legal reserve (5%)	(22,296)	(19,419)
Calculation basis of dividends	423,618	368,970
Minimum compulsory dividend (25%)	**105,905**	**92,243**

Stockholders are entitled to receive as mandatory dividends, in each fiscal year, an amount of not less than twenty-five percent (25%) of the adjusted net income, as provided for in the Brazilian Corporate Law.

27. Transactions with related parties

	2026	2025
Fixed compensation	94,414	63,123
Social security contribution	21,243	14,198
Total	**115,657**	**77,321**

(c) Share-based payment

In order to stimulate the development of a long-term vision and alignment between the interests of employees, officers and shareholders of the BMG Group, enabling the Company to attract and retain talent, maximize the generation of income and encourage value creation in a sustainable manner, a Long-Term Incentive Plan was implemented in 2020 with payment based on Shares, whose supervision, planning and control is the responsibility of the Board of Directors.

Under the Plan, a portion of the variable compensation of officers and other eligible employees is paid in cash and a portion in preferred shares issued by the Company (“BMGB4”), through Performance Share Units (“PSUs”), in compliance, where applicable, with the provisions of CMN Resolution No. 5,177, dated September 26, 2024. Shares are delivered on a deferred basis over a three-year period, with one-third vested annually, subject to compliance with the conditions established in the Plan's internal regulations. Deferred and unpaid installments may be proportionally reversed in the event of a significant reduction in recurring income or the recognition of losses during the period.

The number of shares granted under the Plan may not exceed 10% of the outstanding shares and is determined based on the weighted average closing price of the Company's shares over the 20 trading days immediately preceding the PSU measurement date.

Changes in the number of shares	2026	2025
Opening balance	**9,771,977**	**8,739,675**
New	4,281,337	4,629,100
Delivered	(4,569,221)	(3,596,798)
Cancelled	(12,250)	-
Closing balance	**9,471,843**	**9,771,977**
Weighted Average Remaining Contract Life (Years)	**1.61**	**1.69**
Average Market Value (R$)	**6.03**	**3.89**

In line with the Long-Term Incentive Plan with share-based payments, the Bank recognized a provision for the period ended September 30, 2026, in the amount of R$21,233 (R$13,062 as of December 31, 2025), net of tax effects, related to compensation for directors and other eligible employees.

(d) Other information

Pursuant to Resolution CMN nº 4,693, as of January 2019, financial institutions may carry out credit operations with related parties, in compliance with the conditions and limits defined by the aforementioned resolution. Accordingly, Banco BMG established a policy to conduct credit operations with related parties, duly approved by the Board of Directors and formalized in a specific document made available to the Central Bank of Brazil,

(e) Equity interest

The members of the board of directors and the executive board jointly hold the following equity interests in BMG:

	2026		2025	
Common and preferred shares	Number	%	Number	%
Administrative Council	156,496,160	24.1%	151,757,901	26.0%
Board of Directors	3,214,380	0.5%	1,567,344	0.3%
Other	488,573,156	75.4%	429,907,166	73.7%
Total	**648,283,696**	**100.0%**	**583,232,411**	**100.0%**

28. Other information

(a) Commitments and Guarantees

Guarantees and sureties given by the Financial Conglomerate to customers amount to R$361,264 (2025 – R$351,378) and are subject to financial charges and counter-guarantees from the beneficiaries,

(b) Agreements for the clearing and settlement of liabilities in the National Financial System environment

In order to allow the offsetting of credits and debits held with a single counterparty, whose maturities of the rights and obligations may be accelerated to the date on which the event of default by either parties occurs, the BMG Conglomerate, pursuant to CMN Resolution No, 3,263, of February 24, 2005, entered into compensation agreements in the scope of derivative agreements, as well as agreements for the offset and settlement of assets and liabilities,

(c) CVM Resolution No. 223/24 – OCPC 10 – Carbon Credits, Emission Allowances and Decarbonization Credits (CBIOs)

On December 16, 2024, the Brazilian Securities and Exchange Commission (CVM) issued CVM Resolution No. 223/24, which made Technical Guidance OCPC 10 – Carbon Credits, Emission Allowances and Decarbonization Credits (CBIOs) mandatory for publicly traded companies, effective for fiscal years beginning on or after January 1, 2025. Management assessed the requirements of such technical guidance and concluded that it did not have a material impact on the Financial Statements for the period, as Banco Bmg S.A. had no material transactions involving carbon credits, emission allowances or CBIOs as of September 30, 2026.

(d) Reconciliation of Net Income and Equity

The individual Financial statements of Banco Bmg S.A. are prepared in accordance with accounting practices adopted in Brazil, applicable to institutions authorized to operate by the Central Bank of Brazil (BACEN), unlike

the interim consolidated financial statements, prepared in accordance with international financial reporting standards ("IFRS") issued by the "International Accounting Standard Board" ("IASB"). In compliance with CMN Resolution No. 4,818/20, we highlight that the main difference between Net Income and Equity basically result from the reversal of the amortization of goodwill realized in the consolidated financial statements and the change in the model for classifying and measuring financial assets.

(e) Non-Operational Result

On November 29, 2019, Bmg Estrutura Corporativa Ltda., a company controlled by the Bank, entered into a Share Purchase and Sale Agreement with Assicurazioni Generali S.p.A. ("Generali"), through which it sold to Generali 30% of the share capital of its investee BMG Seguros S.A. for R$54,000, generating a gain of R$26,448 adjusted in equity under "other comprehensive income". The 2025 amount refers to the derecognition of the gain mentioned above in "other comprehensive income" and recognition in the result due to the completion of the sale of said company.

(f) Commitment Agreement with INSS

As disclosed in the Market Announcement on October 31, 2025, Banco Bmg S.A., in compliance with CVM Resolution No. 44/21, informed its shareholders and the market in general that, aiming to continue payroll loan operations with the National Institute of Social Security (INSS), it signed a Commitment Agreement with INSS. This Agreement reinforces the Bank's commitment to transparency, governance, and continuous improvement of the customer experience, including measures aimed at greater security and clarity in contracting. Among these measures is the expansion of the use of video call formalization – a practice already adopted by the Bank in payroll credit card operations, and now extended to all INSS payroll loan operations. These initiatives reflect the Bank's purpose of strengthening its institutional relationship with INSS, promoting an ethical, responsible, and customer-centered credit journey, in line with best corporate governance practices.

(g) Subsequent event

On November 5, 2026, Banco Bmg S.A. informed its shareholders and the market in general that its Board of Directors, at a meeting held on the same date, approved the declaration and payment of Interest on Equity ("JCP") for the third quarter of 2026, in the total gross amount of R$64.0 million, equivalent to R$0.10 per common and preferred share issued by the Bank ("Shares" or "Share"). A 17.5% withholding income tax will apply, resulting in a net amount of R$0.0825 per Share, except for legal entity shareholders that are duly proven to be immune from or exempt from such withholding.

Payment to shareholders will be made on December 4, 2026, based on the shareholding position recorded at the close of business on November 23, 2026. Accordingly, as of November 24, 2026, inclusive, the Bank's Shares will trade ex-rights.

APPENDIX I - Consolidated Statement of Value Added

The consolidated statement of value added below is not required by IFRS, but it is being presented as additional information, as required by the Brazilian corporate law for publicly held companies and was derived from the Bank's interim consolidated financial statements and prepared in accordance with IFRS standards.
