Indicadores Operacionais: métricas B2C

A geração de receitas de SaaS e Microfinanças se beneficiou de uma melhor combinação

Pagamentos Digitais (TPV) **R\$2,8 bilhões**

Take Rate

Licenças Ativas⁽¹⁾ **8,6 milhões**

Receita por Licença

Transações de Microfinanças **58,8 milhões**

Receita por Transação

Assinaturas pagas pelos usuários **27,0 milhões**

ARPU (R\$)

(1) À medida que a receita proveniente de produtos SaaS sem licenças diretas ao consumidor se tornou relevante, o número de licenças deixou de refletir com precisão o desempenho do negócio. Consequentemente, deixaremos de divulgar o número de licenças SaaS e a receita por licença.

Receita 3T25 YoY Normalizada

Ajustada por variação cambial

3T25 vs 3T24
(R\$ mm)

Impacto cambial (cesta de moedas)

- Efeito residual do câmbio na receita da Bemobi no 3T25
- Praticamente todo o crescimento da receita decorreu do desempenho operacional

Receita Líquida

Crescimento da receita acelerou para +22% YoY (vs. +19% YoY no 2T25), impulsionado por Pagamentos (+40%) e SaaS (+16%); todos os segmentos tiveram alta de dois dígitos

Receita Líquida⁽¹⁾
(R\$ mm)

Visão por
Região

Receita Líquida - Pagamentos⁽¹⁾
(R\$ mm)

Visão por
linhas de negócio
(%)

Observação: (1) As receitas são ajustadas pela harmonização contábil desde 2021, como resultado da aquisição da M4U. Veja o anexo IV do Relatório de Resultados.

Margem Bruta, OPEX e EBITDA Ajustado

EBITDA Ajustado manteve sólido crescimento de +24% YoY, sustentado por alavancagem operacional positiva, mesmo com investimentos para futuras oportunidades de crescimento

Lucro Bruto ⁽¹⁾ (R\$ mm; %)

Despesas Administrativas ⁽²⁾ (R\$ mm; %)

EBITDA Ajustado ⁽¹⁾⁽²⁾ (R\$ mm; %)

- ▶ Lucro Bruto aumentou 28% YoY, resultando em expansão de +350 bps YoY na margem bruta, impulsionada por otimização de custos e melhoria no mix de receitas
- ▶ OPEX Ajustado ⁽²⁾ cresceu 33% YoY, principalmente devido a: (i) aumento de *headcount*, especialmente em Pagamentos/SaaS; (ii) maior provisionamento de remuneração variável; (iii) maiores despesas com tecnologia pelo maior uso de serviços e softwares; e (iv) aumento na provisão para perdas de crédito
- ▶ EBITDA Ajustado ⁽¹⁾⁽²⁾ manteve ritmo sólido de expansão, crescendo +24% YoY, com expansão de margem de 40 bps YoY

Lucro Líquido e Fluxo de Caixa das Operações

Lucro líquido ex-swap subiu 57%, impulsionado por maior lucro operacional e menor tributo sobre o pagamento de JCP. Fluxo de caixa operacional cresceu 28% YoY

Lucro Líquido ajustado ex-Swap (R\$ mm; %)

Fluxo de Caixa Operacional⁽³⁾ e FBC/EBITDA Ajustado^{(1) (2)} (R\$ mm; %)

- ▶ Lucro Líquido Ajustado ex-swap aumentou 57% YoY, resultado da combinação de maiores despesas operacionais e menor despesa tributária devido ao pagamento de Juros sobre Capital Próprio (JCP) no trimestre
- ▶ Fluxo de Caixa Operacional atingiu R\$47 milhões, alta de 28% YoY, impulsionado pelo sólido desempenho do negócio e disciplina em Capex
- ▶ Conversão de Caixa manteve-se em destaque, acima de 75%, refletindo a natureza asset-light do nosso modelo

Saldo de Caixa

Geração de caixa operacional positiva, mesmo com maior demanda de capital de giro pelo crescimento em Pagamentos e JCP

Variação do saldo de caixa 3T25 vs 2T25
(R\$ mm; %)

- ▶ A geração operacional de caixa foi positiva em R\$15 milhões, refletindo fundamentos sólidos do negócio, parcialmente impactados por um investimento de R\$54 milhões em capital de giro na operação de Pagamentos. O produto segue impulsionando o crescimento, com forte dinâmica de receita e alto ROIC, sustentado pelo uso discricionário de capital próprio para expansão.
- ▶ O fluxo de caixa livre foi negativo em R\$17 milhões, principalmente em função do pagamento do JCP no trimestre (R\$30 milhões)

Considerações Finais 3T25

- 1** Bom momento operacional, com aceleração do **crescimento da receita para 22% YoY**, impulsionado pelos negócios de **Pagamentos (+40% YoY)** e **SaaS (+16% YoY)**; as quatro linhas de negócio apresentaram crescimento de dois dígitos.
- 2** **Pagamentos continuou ganhando tração**, com **TPV crescendo 38% YoY, atingindo R\$2,9 bilhões**, apoiado na expansão de clientes recentes — como Sabesp, Salta, Equatorial, Copel, Enel, Inspira, entre outros.
- 3** **EBITDA ajustado manteve sólida expansão (+24% YoY), alcançando R\$63 milhões**, impulsionado por alavancagem operacional, apesar dos investimentos em equipe voltados à captura de oportunidades de crescimento futuro. **Geração operacional de caixa** atingiu **R\$47 milhões (+28% YoY)**, com **taxa de conversão de caixa de 76%**.
- 4** **Lucro líquido ajustado ex-swap aumentou 57% YoY, para R\$41 milhões**, sustentado pelo forte resultado operacional e pela menor despesa tributária decorrente do pagamento de JCP no trimestre.
- 5** Lançamento do **Smart Checkout e do Orquestrador Pix**, produtos que reforçam a estratégia da Bemobi de **estar na vanguarda da inovação** no setor de pagamentos.
- 6** **Hapvida** marca a **entrada da Bemobi no segmento de serviços de planos de saúde**, que conta com 52 milhões de usuários e TPV de R\$312 bilhões.

Operating Indicators: B2C metrics

SaaS and Microfinance revenue generation benefitted by better mix

(1) As revenue from SaaS products without direct consumer licenses has become material, the number of licenses no longer reflects business performance accurately. Consequently, we will discontinue reporting SaaS licenses and revenue per license.

3Q25 YoY normalized revenue

Adjusted by FX variation

3Q25 vs 3Q24
(R\$ mm)

FX Impact (basket of currencies)

- Residual effect of FX in Bemobi's revenue in 3Q25
- Nearly all revenue growth came from business performance

Net Revenues

Top line growth accelerated to +22% YoY (from +19% YoY in 2Q25), driven by payments (+40% YoY) and SaaS (+16% YoY); all segments delivered double-digit growth

Net Revenues⁽¹⁾
(R\$ mm)

Breakdown per region (%)

Net Revenues – Payments⁽¹⁾
(R\$ mm)

Breakdown per business lines (%)

Note: (1) Revenues are adjusted by the accounting harmonization since 2021, as result of the M4U acquisition. See attachment IV of the Results Report.

Gross Margin, OPEX and Adj. EBITDA

Adj. EBITDA maintained solid growth momentum, +24% YoY, supported by positive operating leverage, even with investments to capture future growth opportunities

Gross Margin ⁽¹⁾
(R\$ mm; %)

OPEX ⁽²⁾
(R\$ mm; %)

Adjusted EBITDA ⁽¹⁾⁽²⁾
(R\$ mm; %)

- ▶ Gross Profit up 28% YoY, leading to a +350bps YoY gross margin expansion, driven by cost optimization and an improved revenue mix
- ▶ Adjusted OPEX⁽²⁾ increased by 33% YoY, mainly due to: (i) increasing headcount, specially on Payments/SaaS; (ii) higher provision for variable compensation; (iii) higher expenses on technology due to larger use of tech services/software; and (iv) Increase in bad debt provision.
- ▶ Adjusted EBITDA⁽¹⁾⁽²⁾ growth maintained a solid expansion pace of +24% YoY, with a margin expansion of 40 bps YoY

Net Income and Cash Flow from Operations

Net income ex-swap up 57% fueled by operating profit increase and lower tax expense on IoE payment. Operating cash flow increased 28% YoY

Adjusted Net Income ex-Swap
(R\$ mm; %)

Operating Cash Flow⁽³⁾ and OCF/Adj. EBITDA^{(1) (2)}
(R\$ mm; %)

- Adjusted Net Income ex-swap increased 57% YoY, with a combination of higher operating expenses and lower tax expenses due to the payment of Interest on Equity (IoE) in the quarter.
- Operating Cash Flow reached R\$47M, up 28% YoY, driven by solid business performance and disciplined Capex
- Cash Conversion remained a standout, above 75%, reflecting the asset-light nature of our model

Note: (1) Net Income includes the adjustments related to M4U results harmonization since 2021. See attachment IV of the Results Report. (2) Adjusted EBITDA index excludes non-recurring expenses with restructuring, costs of new acquisitions and the long-term incentive plan for Bemobi executives. (3) Operating Cash Flow is equal to Adjusted EBITDA less Capex

Cash Balance

Positive cash from operations in the quarter, despite working capital demand from Payments growth and IoE

Cash Position change 3Q25 vs 2Q25 (R\$ mm; %)

- ▶ Operating cash generation was positive at R\$15 million, reflecting strong business fundamentals, partly offset by a R\$54 million working capital investment in the Payments operation. The product continues to drive growth, with strong revenue momentum and high ROIC, supported by management's discretionary use of own capital to fund expansion.
- ▶ Free cash flow was negative in R\$17M, mainly due to the payment of IoE in the quarter (R\$30M)

Closing Remarks 3Q25

- 1** Good momentum, accelerating **top line growth to 22% YoY** driven by the **Payments (+40% YoY) and SaaS (16% YoY)** business; all 4 business lines posted double-digit growth
- 2** **Payments continued gaining traction**, with **TPV up +38% YoY to R\$2.9 billion**, supported by the ramp-up of recent clients – such as Sabesp, Salta, Equatorial, Copel, Enel, Inspira, among others
- 3** **Adj. EBITDA maintained solid expansion (+24% YoY), reaching R\$63M**, boosted by operating leverage, despite investments in workforce aimed at capturing future growth opportunities. **Operating cash generation** reached **R\$47M (+28% YoY)**, with a **76% cash conversion rate**
- 4** **Adj. net income ex-swap increased 57% YoY to R\$41 million**, supported by strong operating result and the lower tax expense from the payment of IoE in the quarter
- 5** Launch of **smart checkout and pix orchestrator**, products that underscores Bemobi's strategy of **being in the forefront of innovation** at the payment industry
- 6** **Hapvida** marks **Bemobi's entrance in the health insurance service segment**, which has 52 million users enrolled in healthcare plans, with a TPV of R\$312 billion
