1. Management Comments

Grupo Fleury closes the second quarter of 2025 with another period of consistent strategic execution, even in a challenging macroeconomic environment. We celebrate two years of successful integration between Grupo Fleury and Pardini, reinforcing our leadership position in diagnostic medicine with unique competitive advantages, operational efficiency, and financial robustness. In a context that combined fewer business days in the quarter and one-off comparison effects, the second-quarter performance demonstrates the resilience of our business model, supported by revenue diversification, expense control, and investments focused on productivity and improving customer experience, which allows us to continue delivering growth with balance and discipline.

In 2Q25, Gross Revenue totaled R\$ 2,2 billion, a 2,8% increase compared to the same period in 2024. We highlight the performance of our B2C business unit, which grew 7,2%, reflecting the strength of our brands and excellence in customer service. The Fleury brand, in particular, grew 4,3% in the quarter and 5,0% in the first half of the year, reinforcing its maturity and recognition in diagnostic medicine. The Fleury brand maintains a high market share in the premium segment, strong medical relationships, and a differentiated portfolio, including Integrated Diagnostic Centers focused on investigating complex clinical conditions, such as the Integrated Neurology Center and the Integrated Endometriosis Center, launched in 2024. Rio de Janeiro maintained a consistent growth trajectory, with 7,9% expansion in the quarter and 8,2% in the first half, reflecting a gain in market share in the second-largest market where we operate, with offerings spanning the premium, intermediate and basic segments. It is worth noting that regional brands experienced significant growth of 16,5%. Mobile services also experienced positive growth, representing 8,0% of the Group's total Gross Revenue.

Seasonal and contextual effects during the quarter impacted the other business units, B2B and New Links, which declined in Gross Revenue generation, given the strong comparison with the second quarter of the previous year, including calendar effects, toxicology testing, and dengue fever. In this scenario, Grupo Fleury's portfolio diversification remains a key differentiator, enabling a balance between business areas at different stages of maturity and performance, contributing to the strength of its consolidated results.

In the quarter, EBITDA reached R\$ 532,1 million, up 1,9% and with a margin of 26,3%, reflecting our disciplined cost and expense control. Net income was R\$152,3 million, with a margin of 7,5%. The greater depreciation impact is due to our technology investment strategy, which enables productivity gains. The effects of our system's modernization are already being captured and represent an important lever for future efficiency gains, essential for driving profitable growth. Our disciplined financial management allowed us to close the period with leverage of 1.1x Net Debt/EBITDA, maintaining a comfortable level given the high-interest rate macroeconomic environment. ROIC was 16,4%, reflecting the continuation of a solid return on invested capital trajectory.

In 2Q25, we maintained our strategy of allocating capital responsibly and with a long-term vision, with moves aligned with the Group's disciplined acquisition history and focused on operational synergies and sustainable growth. We completed the acquisition of Confiance Medicina Diagnóstica, with 25 units in Campinas and the surrounding region (Indaiatuba, Hortolândia, Paulínia, Valinhos, Vinhedo, and Sumaré), strengthening our brand positioning in an important region of the state of São Paulo. We have already initiated the integration process to capture synergies. We also announced the acquisition of Hemolab, a traditional laboratory with 15 service units in the cities of Conselheiro Lafaiete, Jaceaba, Carandaí, Ouro Branco, Entre Rios de Minas, Congonhas, Cristiano Otoni, Queluzito, and Resende Costa, municipalities that are part of a region important for the country's development, mainly due to its economic diversity, strategic geographic position, and historical tradition in industrial and agricultural activities. The operation reinforces our presence in Minas Gerais, where we will now operate with 119 units.

We continue to execute our position of differentiation in innovation, science, and technology. Initiatives such as digital scheduling for the Fleury, a+ SP, and Labs a+ brands have increased convenience for our customers, reduced operating costs, and enabled us to attract new audiences. We also made progress in self-registration for the a+ brand and automated reading of orders and cards, ensuring faster service and increased productivity.

We reinforce our commitment to consistently generating value through a diversified platform, efficient management, and forward-looking vision. The robustness of Grupo Fleury's business model, the disciplined execution of our strategic priorities, and our solid capital structure position us uniquely to continue evolving in our journey of caring for people's health and well-being.

Over the 99 years of Grupo Fleury's existence, we have evolved in size and impact, but we have maintained our commitment to technical, medical, and service excellence throughout the years, generating results that deliver returns for our shareholders and society. Therefore, I thank all our employees and physicians who every day build a stronger company, with a customer-focused culture, contributing to increasing access to healthcare in Brazil and the sustainability of the system.

2. <u>Innovation as a Pillar of Differentiation for Grupo Fleury</u>

Grupo Fleury has always had a strong history of innovation, positioning it at the forefront of diagnostic medicine and a national benchmark for its portfolio of differentiated tests. Our innovation model is guided by three main objectives: increased efficiency, differentiation in product and service offerings to promote a good customer experience, and new revenue streams and markets to enable growth.

Among the benefits, innovations add significant dynamism to the company's product and service portfolio – in the last three years, 1.592 new tests and methodological changes have been developed, contributing to reduced costs, timelines, and waste, benefiting customers and the environment. One example is the new vitamin A and E assay technique, which reduced test processing time from 14 hours to 21 minutes while maintaining test accuracy. This has allowed us to achieve a 90% reduction in chemical waste generation. This vision of how new products and services add value to the company is crucial at a time of rising capital costs, where we must make the right choices when prioritizing resources. As a result, the company achieved savings of over R\$ 23 million in 2024.

Change in the method of analysis for vitamins A and E (HPLC to LDTD)

Innovation has also been intensified with the effective application and return on resources derived from the use of data science, artificial intelligence (AI), and advances in digital services. We currently have the largest installed park of magnetic resonance equipment in Latin America, using new technology that results in increased revenue per m2. This new technique, called sensitivity compression acceleration, uses AI to speed up data collection and processing. As a result, we've reduced exam capture time by up to 50%, with better-quality images. In other words, the use of technology allows us to double the number of exams performed per hour, a practical example of increased operational efficiency. We've also applied technology to our Lab-to-Lab service, developing an in-house AI solution to optimize inventory turnover for client laboratories. Machine learning models predict the monthly quantity of each input to be sent to the partner laboratory, leading to a 40% reduction in input costs.

Magnetic Resonance Imaging

- Al accelerates image collection and processing
 Al optimizes inventory turnover in client
- 50% reduction in exam time
- Largest park in Latin America with this technology

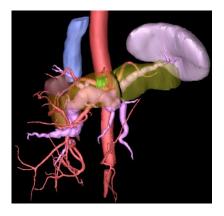

Lab-to-Lab

- Al optimizes inventory turnover in clien laboratories
- · 40% reduction in the cost of lost inputs

In our mobile service, which currently accounts for 8% of the Group's total revenue, we implemented a routing platform that uses AI to manage routes. With this tool, we achieved a 15% increase in appointment availability, a 32% increase in collector availability, and a 4-percentage points improvement in the net promoter score, reflecting improved customer satisfaction.

We also advanced in the use of radiological image post-processing tools, launching the Virtual Surgical Planning service for the Fleury and Felippe Mattoso brands. This innovation, based on CT and MRI scans, creates detailed three-dimensional representations for lung, liver, pancreatic, kidney, and rectal tumors. The service enables interaction between radiologists and surgeons in the simulation of surgical strategies, strengthening the culture of proximity with referring physicians and reinforcing our commitment to positive patient outcomes by delivering comprehensive solutions that go far beyond the exam results.

Three-dimensional image reconstruction

We believe that continuous, structured innovation connected to strategy is a relevant competitive differentiator, with a direct impact on generating value for our shareholders and building a more efficient, accessible, and patient-centered healthcare system.

5.1. <u>Diagnostics</u>

5.1.1. Patient Service Center (PSC) per Brands

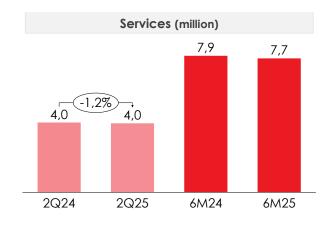

Fleury: Fleury Brand; MG: Hermes Pardini MG, Méthodos, Ecoar, LabClass, Sete Lagoas; RJ: Lafe, Felipe Mattoso, Labs a+, Centro de Medicina; Others SP: a+ SP, Hermes Pardini SP, IACS, Dra. Odivânia, Pardini Express; Regionais: brands of BA, ES, GO, MA, PA, PE, PR, RN, RS and SC.

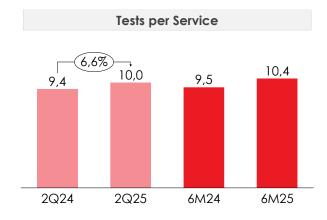

Gross Revenue from PSC grew 7,2% in 2Q25, reaching R\$ 1.537,8 million, mainly due to:

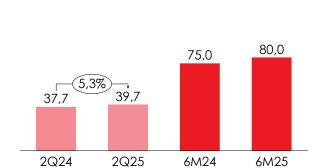

- (i) Fleury Brand (4,3%): In line with expectations for a mature and resilient brand, even in a quarter impacted by fewer operating days.
- (ii) Others SP (6,2%): Reflects market share gains despite the negative calendar effect.
- (iii) MG Brands (5,0%): This is explained by the negative calendar effect and a strong comparison base for dengue and influenza testing in 2Q24.
- (iv) RJ Brands (7,9%): Consequence of good organic performance across all brands in the region, despite the negative calendar effect.
- (v) Regional Brands (15,3%): Good organic performance in Bahia, Goiás, Maranhão, and Rio Grande do Sul (good organic performance disregarding the effects of rainfall in 2Q24). Furthermore, there was an inorganic effect due to the entry of São Lucas in Sep/24.

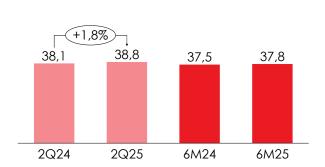

5.1.2. Volumes and Revenue per Exam

Tests (million)

Average Ticket per Test (R\$)

Procedures reached 4,0 million in the quarter, a decrease of 1,2%.

Test volume totaled 39,7 million, a 5,3% increase reflecting organic growth, aided by the inorganic impact of the acquisition of São Lucas (result captured as of Sep/24).

Gross revenue per exam was R\$ 38,8 million in the quarter, a 1,8% increase, reflecting a greater mix of imaging exams.

5.1.3. B2B: Hospitals and Lab-to-Lab

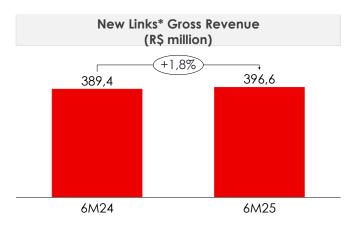

| | 2Q24 | 2Q25 | Δ | 6M24 | 6M25 | Δ |
|-------------------------------|-------|-------|-------|-------|-------|-------|
| Gross Revenue (R\$ Million) | 5,100 | 485,9 | -3,1% | 991,1 | 966,0 | -2,5% |
| Test Volume (Million) | 47,7 | 49,7 | 4,2% | 91,9 | 99,0 | 7,7% |
| Average Ticket per Test (R\$) | 10,5 | 9,8 | -7,0% | 10,8 | 9,8 | -9,5% |

B2B Gross Revenue contracted 3,1%. This behavior is a consequence of the departure of a specific client from hospitals, a negative calendar effect, and a strong comparison base due to toxicology and dengue Lab-to-Lab testing.

5.2. New Links

Gross Revenue from New Links in 2Q25 totaled R\$ 174,1 million, a 13,2% decrease. This performance is explained by the increased supply of infusion services in the market, the impact of a lower volume of dengue tests on platforms, and the shift in our Day Hospital operations to diagnostic medicine. New Links accounted for 7,9% of the company's revenue in 2Q25.

Gross Profit reached R\$ 528,0 million, a 6,9% decrease, and Gross Margin was 26,1%, a 260 bps decrease. This behavior is mainly explained by:

- Personnel and Medical Services (-104 bps): The expansion is a consequence of wage dispute, operational deleveraging due to an unfavorable calendar effect, and a higher share of imaging exams this quarter.
- Services with Occupancy and Utilities (-95 bps): This expansion is explained by the effect of operational deleveraging due to an unfavorable calendar due to a greater number of long holidays in the quarter compared to the same period in 2024.
- **Depreciation and Amortization (-81 bps):** The increase is due to the strategy of investing in technology that allows for productivity gains.

Quarterly Information (ITR) at June 30, 2025 and report on review of quarterly information

Report on review of quarterly information

To the Board of Directors and Stockholders Fleury S.A.

Introduction

We have reviewed the accompanying parent company and consolidated interim accounting information of Fleury S.A. ("Company"), included in the Quarterly Information Form (ITR) for the quarter ended June 30, 2025, comprising the balance sheet at that date and the statements of income and comprehensive income for the quarter and six-month period then ended, and the statements of changes in equity and cash flows for the six-month period then ended, and explanatory notes.

Management is responsible for the preparation of the parent company and consolidated interim accounting information in accordance with the accounting standard CPC 21, Interim Financial Reporting, of the Brazilian Accounting Pronouncements Committee (CPC) and International Accounting Standard (IAS) 34, Interim Financial Reporting issued by the International Accounting Standards Board (IASB), as well as the presentation of this information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of the Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim accounting information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying parent company and consolidated interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 and IAS 34 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the CVM.
