## INDEPENDENT AUDITOR'S REPORT ON THE INTERIM FINANCIAL INFORMATION (ITR)

To the Shareholders, Directors and Management of  
Iguatemi S.A. and Subsidiaries

### **Introduction**

We have reviewed the accompanying individual and consolidated interim financial information of Iguatemi S.A. and subsidiaries ("Company"), included in the Interim Financial Information Form (ITR) for the quarter ended September 30, 2025, which comprises the balance sheet as at September 30, 2025 and the related statements of profit and loss and of comprehensive income for the three- and nine-month periods then ended, and of changes in equity and of cash flows for the nine-month period then ended, including the explanatory notes.

The Executive Board is responsible for the preparation of the individual and consolidated interim financial information in accordance with technical pronouncement CPC 21 (R1) and international standard IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM), applicable to the preparation of Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

### **Scope of review**

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion on the individual and consolidated interim financial information**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the interim financial information referred to above was not prepared, in all material respects, in accordance with technical pronouncement CPC 21 (R1) and international standard IAS 34, applicable to the preparation of ITR, and presented in accordance with the standards issued by the CVM.

## Other matters

### *Statements of value added*

The interim financial information referred to above includes the individual and consolidated statements of value added (DVA) for the nine-month period ended September 30, 2025, prepared under the responsibility of the Company's Executive Board and disclosed as supplemental information for international standard IAS 34 purposes. These statements were subject to the review procedures performed together with the review of the ITR to reach a conclusion on whether they are reconciled with the interim financial information and the accounting records, as applicable, and whether their form and content are consistent with the criteria set out in technical pronouncement CPC 09 - Statement of Value Added. Based on our review, nothing has come to our attention that causes us to believe that these statements of value added were not prepared, in all material respects, in accordance with such technical pronouncement and consistently with the individual and consolidated interim financial information taken as a whole.

The Company and its subsidiaries adopted the calculation of expected losses on trade receivables based on an “allowance matrix”, taking into account historical default data, and defined a percentage of allowance for each maturity range of the receivables portfolio. The aging list reflects the original date of each security, with no change in the original dates of the securities overdue, which were renegotiated. The balance reported in line item “Trade receivables” was classified into the category of financial assets measured at “amortized cost”.

The Company and its investees apply the hierarchy rules to measure the fair values of their financial instruments, for financial instruments measured in the balance sheet, which requires the disclosure of fair value measurements at the following hierarchy level:

- (i) Prices quoted (unadjusted) in markets for identical assets and liabilities (Level 1).
- (ii) In addition to the quoted prices included in Level 1, market inputs for assets or liabilities, either directly (i.e., as prices) or indirectly (i.e., derived from prices) (Level 2) are adopted.
- (iii) Assumptions for assets and liabilities that are not based on observable market inputs (unobservable inputs) (Level 3).

### 13.3 Risk factors

The main source of revenue for the Company and its investees is the leases from the shopping mall lessees.

According to their nature, financial instruments may involve known or unknown risks, and the potential risk assessment is important, in the best judgment of the Company and its investees. Thus, there may be risks with or without guarantees depending on circumstantial or legal aspects. The main market risk factors that may affect the business of the Company and its investees are as follows:

#### a. Credit risk

The Company and its investees have internal controls designed for monitoring the level of default of their clients to control the credit risk underlying the diversified customer portfolio. The assumptions considered by the Company to evaluate the acceptance of potential clients are: the collaterals accepted (property, letter of guarantee, insurance, etc.), the suitability of individuals and legal entities involved in the lease (partners and guarantors) and use of SERASA as a reference for consultation. The allowance for impairment losses is analyzed at each balance sheet date by analyzing the historical data of default and expected loss projections.

The maximum exposure to credit risk at the balance sheet date is the recorded amount of each class of financial assets.

The Company derecognizes its financial assets when there is no reasonable expectation of recovery (write-off). Receivables written off by the Company remain under collection to recover the amount of receivables. If any, recoveries are recognized as credit recovery proceeds in profit or loss for the period.

#### b. Liquidity risk

The cash flow forecast is performed at the Company's operating entities by finance professionals who continuously monitor liquidity to ensure that the Company has sufficient cash to meet its operating needs. This forecast takes into consideration the debt financing plans, compliance with internal balance sheet ratio goals and, if applicable, external regulatory or legal requirements.

### c. *Capital management*

The Company's objectives in managing its capital are to safeguard its ability to continue as a going concern in order to provide returns for its shareholders and benefits for other stakeholders, as well as to maintain an optimal capital structure to reduce this cost. The net financial position is equivalent to total cash and cash equivalents, less short- and long-term borrowings, financing and debentures.

|------------------------------------------------------|--------------|-------------|

### d. *Price fluctuation risk*

Lease agreements, in general, are restated by reference to the annual variation of the IGP-M (General Market Price Index) and IPCA (Extended Consumer Price Index), as set forth in such agreements. Lease levels may vary due to adverse economic conditions and, consequently, the level of revenues may be affected. Management monitors these risks to minimize the impacts on its business.

### e. *Interest rate risk*

The Company's interest rate risk substantially results from short- and long-term borrowings, financing and debentures, described in the prior notes. These financial instruments are subordinated to interest rates pegged to indexes such as TJLP and CDI, as well as the balance of taxes payable, subject to interest based on the Selic rate and TJLP. The risk inherent in these liabilities arises from the possibility of fluctuations in these rates.

### **Sensitivity analysis of fluctuations in inflation adjustment indexes**

Management considers that the most significant risk of fluctuations in interest rates derives from the liabilities pegged to TR and mainly the CDI. The risk is related to fluctuations in those rates.

In the period ended September 30, 2025, Management estimated scenarios involving fluctuations in the DI and TR rates, obtained on the website of Portal Brasil e Bolsa do Brasil - B3. The rates in effect at the end of the reporting period were used as a basis to determine the probable scenario. These rates were stressed by 25% and 50%, used as a basis for possible and remote scenarios, respectively.

As at September 30, 2025, Management estimated the future flow of interest payments on its debts pegged to the CDI and TR, based on the interest rates presented above, assuming that all interest payments would be made on the contractually established maturity dates. The impact of the hypothetical fluctuations in interest rates can be measured by the difference of the future flows under the possible and remote scenarios in relation to the probable scenario, where no increase is estimated. It should be noted that such a sensitivity analysis considers payment flows on future dates. Thus, the total amounts under each scenario are not equivalent to the fair value or the present value of these liabilities. The fair value of these liabilities, when considering the Company's credit risk unchanged, would not be affected by interest rate fluctuations, since the rates applied to cash flows discounted to future value would be the same as those applicable to discounting these cash flows to present value.

In addition, cash equivalents and short-term investments in floating securities that would increase yield accrued under the possible and remote scenarios are held, thus neutralizing part of the impact of interest rate increases on the flow of debt payments.

However, due to the lack of predictability of maturities equivalent to financial liabilities, the impact of the scenarios on these assets was not considered. The balances of cash equivalents and short-term investments are shown in note 3.

The effects of exposure to interest rates, in the sensitivity scenarios estimated by the Company, are shown in the following tables:
