Message from the

CEO

Our performance throughout the year demonstrates that the initiatives we've implemented to evolve our business model are contributing to our results. While third quarter results reflect the challenges of a distinct climate dynamic compared to 2024, this does not alter our trajectory.

Autumn temperatures boosted second quarter sales this year, however, this limited the availability of winter items in the third quarter. We thoroughly assessed the risk/return outlook for the upcoming months and opted not to place additional orders which, when combined with our considerable exposure to colder regions, had a temporary impact of approximately 2 to 3 percentage points on our sales. We established a process that incorporates more frequent monitoring and decision checkpoints, minimizing the risk of future missed opportunities.

Retail sales therefore **grew by 4.2%**, 4.7% in apparel, with combined average growth for Q2 and Q3 which **reached 11.5%**, 12.5% in apparel. We delivered an **11.6%**, 12.8% in apparel, year-on-year increase for the nine-month period, also with market share gains.

We delivered another quarter of solid progress in profitability, and apparel gross margin improved for another consecutive quarter, reaching **56.2%**, a **0.5 percentage point** increase, and a 0.4 percentage point increase in retail. This reflects our relentless pursuit of faster and more flexible fashion execution, supported by a more precise and integrated supply model, resulting in a 1.9 percentage point decrease in the share of aged inventory in sales.

Lower sales volumes and the previously scheduled timing of certain operational initiatives resulted in a temporary increase in expenses above sales growth this quarter. However, this does not alter the structural trajectory of annual operational leverage we initiated in 2024. With the intensive cycle of structural investments in CAPEX and OPEX complete, we are now positioned to drive sales growth with consistent expense dilution. This reinforces our expectation of consistent expense dilution, both due to previous investments—which support a higher level of sales growth—and through cost reduction opportunities, driven by a targeted effort we have already initiated.

Realize CFI, a key driver of customer engagement and loyalty, delivered its eighth consecutive quarter of results growth, up 37%, driven by the quality of its credit portfolio.

Net income increased by 9% to **R\$279 million**, or **R\$0.2803 per share**, a **16% increase**. Our trailing twelve-month ROIC reached **14.4%**, a **1.7 percentage point** improvement, alongside free cash flow generation of **R\$473 million**- the highest in the fashion industry in Brazil.

Our digital channel now represents 17% of total sales, driven by the prior years' investments which will enable continued growth within this channel without compromising Company's profitability. The integration of our online and bricks and mortar operations at our São Paulo DC, resulting in an 8 percentage point increase in share of new inventory within e-commerce sales year-to-date.

We opened 18 stores year to date advancing toward our goal of 30–37 openings by year-end, with a focus on expanding into new markets. Our new store formats continue to deliver above average performance, positioning us well to scale sustainably across different market environments. We've completed 16 store renovations so far this year, with two more scheduled for completion. These renovations and new store openings, together with continued improvements in our digital and omnichannel journey and strengthened fashion execution, have enabled us to expand our active customer base and improve our NPS.

We ended 3Q with net cash position of **R\$1.3 billion**, together with sustained free cash flow generation, provides us both the strength and resilience to confidently navigate adverse scenarios. We have the flexibility to pursue targeted investments to drive growth and capture opportunities. Likewise, our solid balance sheet enables us to deliver shareholder returns above the industry average: in 2025, we have already distributed R\$1.4 billion through interest on equity and share buybacks, with **approximately 85%** of the program (~64 million shares) we announced in February.

We remain focused on further unlocking the full potential of our business model and reaffirm our commitment to driving sustainable profitable long-term growth and value creation.

3Q25 retail net revenue **increased by 4.2%** year-over-year to reach R\$ 3,079.1 million. Same store sales (SSS) **increased by 3.1%**. Apparel retail and SSS net revenue increased by 4.7% and 3.3%, respectively, above the market's average growth rate according to the IBGE Monthly Retail Survey (PMC – IBGE) for August. The combined 2Q25 and 3Q25 quarter average increased by 12.5% year-over-year. Notably, 3Q25 was also adversely impacted by a stronger comparative base. Consolidated retail revenue per m², one of the Company's key growth levers, reported a 3.0% improvement in the quarter.

Fall temperatures normalized in 2025 and supported sales of winter items in the second quarter. On the other hand, this limited the availability of these products throughout the third quarter, combined with the Company's decision not to increase the purchase volume of winter items. The prolonged cold weather, which extended into mid-September, impacted the performance of the spring/summer transition collection. Despite the negative volume trend, store conversion rates improved.

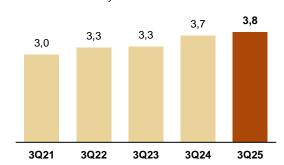

Approximately 25% of the Company's stores are located in the South of Brazil, where the weather is colder and sales were most impacted. In contrast, in warmer regions, growth was significantly above average.

Further, price adjustments to reflect inflation, along with a higher proportion of new items in the mix, contributed positively. These actions supported the proper positioning of the brand in the market.

The Youcom youth brand reported R\$ 121.8 million in net revenue, a 5.0% increase impacted by the above factors as well as a strong 3Q24 comparison base (+27%). Camicado, which focuses on Home and Decor, posted R\$ 135.2 million in net revenue, a 0.7% increase reflecting a segment particularly impacted by the current macro economic environment.

DIGITAL

Digital GMV increased by **4.3**%, reaching **16.7**% penetration with increased profitability compared to 3Q24. Notably, the app set a new customer base record, strengthening its leadership position among the sector's main omni players. Additionally, the Company's site and app were the most visited among domestic fashion players. Finally, the product recommendation engine made significant progress during the quarter with increased revenue resulting from customer recommendations, driven by algorithm optimization and personalization based on browsing history, category preferences, brands, and consumer regions.

Gross Profit totaled **R\$ 1,695.8 million**, a **4.9%** year-over-year increase. Consolidated gross margin reached **55.1%**, a **0.4p.p. increase.** Gross margin from apparel retail also **increased by 0.5p.p.**, to reach **56.2%**.

Gross margin improvement for the quarter reflected progress related to commercial execution and inventory management, notably with a reduction in aged inventory (more than 16 weeks), favoring the profitability of the online channel. The price dynamic, already mentioned, also contributed to this dynamic.

Improved agility in identifying trends and developing collections, together with ongoing enhancements to the Company's replenishment model, drove enhanced precision and flexibility in inventory management, contributing to the quarter's performance. The Company ended 3Q25 with a 5% year-over-year increase in inventory value, reflecting higher imports in transit, due to preparation for the 4Q25.

Camicado posted a gross margin of **56.2%**, a **0.7 p.p.** increase versus the prior year driven by disciplined commercial and inventory management. Home & Style private label sales increased by 7 p.p. year-over-year. Youcom's **0.7 p.p.** margin decline was driven by higher markdown levels versus the prior year.

Note: operating expenses do not consider depreciation and amortization lines.

Third quarter operating expenses totaled **R\$ 1,208.9 million**, a 7.1% increase, outpacing revenue growth, primarily due to lower sales volumes and the timing of certain expense executions, as detailed below. This deleveraging was a one-off event and does not affect the structural deleveraging trajectory initiated in 2024, which we remain committed to advancing consistently throughout 2025 and in the years ahead.

Sales expenses increased by 0.9 p.p. as a percentage of retail revenue, primarily reflecting lower operational leverage as well as the following factors:

- a) Changes in benefits for personnel (medical insurance and food vouchers) led to an increase in personnel expenses. The adjustment to the food vouchers caused a temporary duplication of expenses during the transition period. This initiative has had a positive impact on team retention, resulting in an average sales headcount higher than expected in the third quarter. This non-recurring effect amounted to approximately R\$7 million in the quarter and impacted the growth of selling expenses by 1p.p.. By October personnel levels had been readjusted.
- b) Higher occupancy expenses, due to an increased number of contracts negotiated under the Total Cost of Occupancy (CTO) model, now recognized as occupancy expenses rather than amortization and interest (IFRS 16). Given the economic benefit to the Company, part of the lease agreements and renewals were carried out under the CTO model. This change contributed 0.9p.p to increased expenses (IFRS 16).

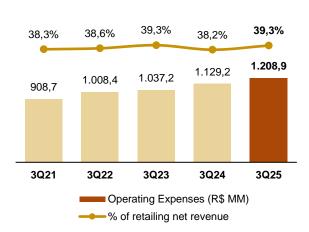

General and Administrative Expenses increased by **4.5%** reflecting inflation during the period and the changes in employee benefits mentioned above. These costs were partially offset by lower expenses related to restricted stock units, totaling approximately R\$8 million, resulting from share price performance compared to the prior year, which serves as the basis for calculating charges on the balance of unexercised grants.

The digital channel continued evolving efficiently reflecting lower expenses as a percentage of Renner's online revenue compared to the same period in 2024.

Finally, during the quarter expenses related to the Profit-Sharing Program (PPR) increased, reflecting the Company's year-to-date operating results. The comparison with the previous year, both for the quarter and the year-to-date, was impacted by the non-linear performance dynamics in 2024. The PPR provision is based on the accumulated annual results and the annual budget, rather than the achievement of targets in an isolated quarter.

In 3Q25, retail adjusted EBITDA reached **R\$ 514.1 million** with a **16.7%** margin. This performance was the result of deleveraging of one-off expenses in the quarter (-1.1p.p.) as well as a lower recovery of tax credits in Other revenues/expenses (-0.1p.p.), despite the evolution in Gross Margin (0.4p.p.).

Financial Services

Beginning 1Q25, the Company revised the timelines for recognizing overdue interest and writing-off of overdue assets, according to the regulations established by the Central Bank of Brazil (Bacen) and CMN, Resolution 4.966. This adjustment aims to align local accounting practices with international standards (IFRS 9), reinforcing the Company's commitment to transparency and best financial reporting practices.

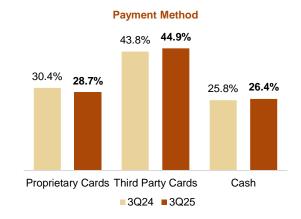

The following changes were implemented by the Company's Consolidated Financial Statements, together with their primary impacts:

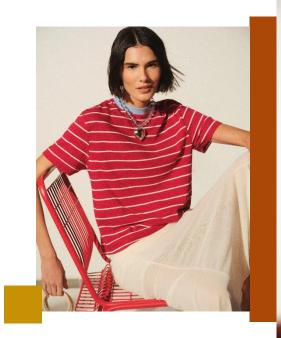

| Theme | Up to 12/31/2024 | As from 01/01/2025 | Effects | Frequency |
|-----------------------------------|---------------------------|------------------------|--|--|
| Recognition of interest income | Up to 60 days past due | Up to 90 days past due | Increase in accounts receivable and increase in past due interest Increase in provision for losses on the portion of revenue added to the portfolio | Recurring |
| Write-off of delinquent portfolio | After 360 days | After 540 days | Increase in accounts receivable and a reduction in the amount of net credit losses | Non-recurring gains recognized exclusively in 1H25 |

PAYMENT METHOD

Realize CFI maintained its conservative credit policy, with new originations managed selectively and focused primarily on the Private Label, reinforcing its commitment to a low risk and well-controlled credit base. In this context, the volume of sales financed through proprietary cards remained stable compared to 3Q24. The slight decrease in participation was primarily due to the shorter duration of the cashback campaign during the period. The active customer base totaled **4.7 million** customers by quarter's end, remaining stable versus 2Q25 and 3Q24.

The average ticket on proprietary card sales **increased by 6.2%** to **R\$ 290** versus the overall average of **R\$** 205, reinforcing the contribution of Realize CFI to customer loyalty and retail growth.

Stage 1 - Past due operations up to 30 days

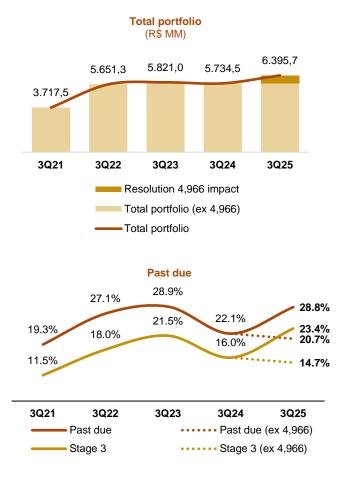

Stage 2 - Pas due operations from 31 to 89 day

Stage 3 - Past due operations from 90 days

The total credit portfolio increased by **11.5%**, primarily reflecting the change in the write-off criteria for overdue assets - now occurring after 540 days past due, compared to 360 days previously - as well as the additional recognition of revenue. Excluding these effects, the portfolio remained stable at **0.3%** reflecting the continued improvement in risk profile. The performing portfolio increased by **1.9%** driven by higher card spending and growth in the Total Payment Volume (TPV).

The overdue portfolio increased by **6.7p.p.**, due to the application of CMN Resolution 4.966. Excluding this effect, delinquency decreased by **1.4p.p.**, **including a notable 1.3 p.p.** decrease in **Stage 3** loans (**14.7%** of the total portfolio) reflecting stronger credit quality and improved collections. This improvement was primarily driven by the stable formation of balances over 90 days past due in nominal terms (NPL90 Formation) and reflects the positive impact of the Company's conservative credit initiatives and strengthened collection efficiency, which together contributed to the continued enhancement of credit quality.

Total coverage for losses reached **21.8%**, an increase of **5.4p.p**. Conversely, coverage of the overdue portfolio in Stage 3 (over 90 days past due) closed the quarter at **93.2%**, representing a reduction of **9.1p.p**.. When excluding the accounting effects of CMN Resolution 4.966, total coverage reached **15.5%**, a decrease of **0.8p.p**. reflecting the continued improvement in the quality of receivables. Coverage of the Stage 3 (over 90 days) portfolio would have been **105.5%**, an increase of **3.2p.p**.

^{*}Approximate values.

Financial services result reached R\$ 79.8 million for the quarter, driven by the credit portfolio profile.

Revenues, net of funding, increased by 14.9%, compared to 3Q24, primarily due to:

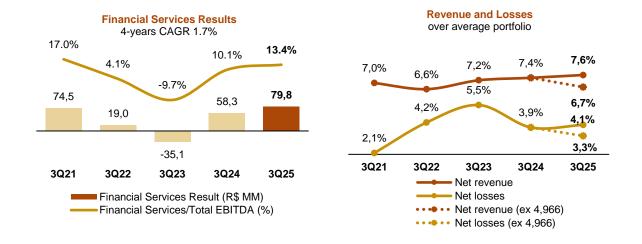

a) the recognition of overdue interest for the past-due portfolio in the 61 to 90-day segment, compared to the previous threshold of up to 60 days, resulting in an estimated gain of **R\$ 55 million** in 3Q25. While this effect is **recurring**, the amounts recognized in future periods will depend on portfolio performance and delinquency trends. This amount was lower when compared to 2Q25, reflecting the seasonal dynamics of the retail business, as the formation of the overdue portfolio up to 90 days in 2Q25 corresponded to sales volumes in 4Q24, a period that typically records stronger seasonal sales.

b) funding costs decreased by **R\$ 24.9 million** reflecting the partial substitution of Realize's third-party funding with Parent Company financing as shown in Explanatory Notes 25.3 and 31 of the Financial Statements. The related-party transaction is eliminated in the consolidated statements, specifically from the net revenues (net of funding) and financial income lines.

Credit losses increased 17.1%, primarily due to the change in the methodology to calculate the period for recognizing overdue interest, which had an estimated negative impact of approximately R\$ 50 million. This variation also reflects the increased provisioning for losses associated with the additional revenue recognized in 3Q25 and the rollover of past due balances from 2Q25. On a comparable basis, credit losses declined 5.2%, highlighting the lower need for provisioning given the improved risk profile of the credit portfolio.

The effects of additional revenue from the change in the methodology for the recognition of overdue interest, net of loss provisions, while recurring, were less significant in 3Q25 and are expected to remain so in 4Q25. Conversely, the non-recurring effect- the benefit associated with the extension of the write-off period for overdue assets to beyond 540 days, ceased to impact results as of 3Q25.

Expenses totaled R\$ 147.4 million, representing a 2.5% increase year-over-year, a variation below both portfolio growth and inflation.

During the 3Q25, five stores were opened, totaling 11 new units in the 9M25.

The Company plans to invest approximately **R\$ 850 million** in 2025, with a focus on store refurbishments aimed at enhancing operational productivity, alongside the opening of 30 to 37 new stores, This expansion will include: 15 to 20 Renner units, approximately 80% of which will be located in new markets with above- average store network profitability, further leveraging the growth of the online channel. In addition, the Company plans to open approximately 15 Youcom stores and 1 to2 Camicado stores, complemented by investments in technology.

The Company's net cash position decreased by R\$ 565.5 million versus December 2024, primarily due to the deployment of **R\$ 860.1 million** for the share buyback (~85% of the program) as well as the payment of **R\$ 572.2 million** of interest on equity related to 4Q24, 1Q25 and 2Q25, **a grand total of R\$ 1,432.3 million**, reverted to the shareholders. These effects were partially compensated by the free cash generation of **R\$ 877.0 million** in the period.

| Financial Result | (19.1) | 6.6 | NA | (83.4) | 71.9 | NA |

The Company reported a **negative** financial result of **R\$ 19.1 million, compared to** a **positive result of R\$ 6.6 million** in 3Q24. This variation was primarily attributable to the non-comparability of income from interest on recovered tax credits recognized in 3Q24, as well as a lower contribution from the net effects of exchange rate and monetary restatement variations related to the Argentine subsidiary.

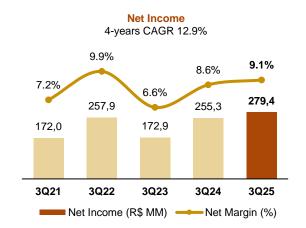

In addition, financial income from cash and financial investments decreased in the quarter reflecting the reduced cash position. The consolidated result also reflects the elimination of intercompany funding between Renner and Realize CFI, whose revenue benefit is offset by cash income at the group level. These effects were partially offset by the higher interest rate environment.

Net Income

Net Income increased **9.4%** year-over-year, reaching **R\$ 279.4 million**, primarily due to stronger operating performance, as well as the lower effective tax rate (see Explanatory Note 11.4).

Earnings per share for the quarter were R\$ 0.2803, 15.5% higher than the preceding year (R\$ 0.2427 per share).

In the quarter, shareholders received **R\$ 217.9 million** in Interest on Equity (IoE), compared to R\$161.4 million in 3Q24, equivalent to **R\$0.219727** per share (R\$0.168760 in 3Q24). Payment is scheduled to begin on October 7, 2025.

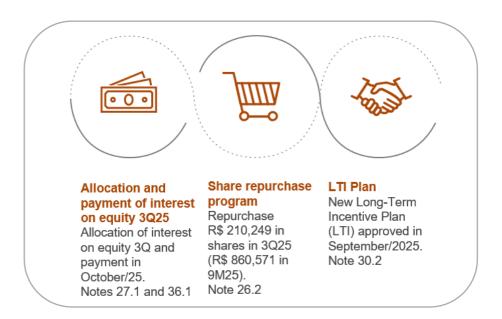

1. OPERATIONS

Lojas Renner S.A. (The "Company" or "Parent Company"), a corporation with headquarter at Av. Joaquim Porto Villanova, 401, Porto Alegre (RS), listed on B3 S.A. - Brasil, Bolsa, Balcão under code LREN3 - and its direct and indirect subsidiaries, individually or jointly ("Parent Company" or "Consolidated"), are mainly engaged in:

- i) Retail: clothing and sports, footwear, accessories, perfumery, housewares, bed, table and bath, furniture and decoration businesses; and
- ii) Services: personal loans, purchase financing, insurance and asset and liability transactions inherent to credit companies, revenues from sales commissions through the Marketplace between the Company and partner companies, sales intermediation commissions, urban deliveries and complete and customized logistics management solutions, among others.

2. HIGHLIGHTS

Below, management discusses important matters addressed in these interim financial statements:

3. BASIS OF PREPARATION AND PRESENTATION OF THE INTERIM FINANCIAL STATEMENTS

3.1 Statement of compliance

The parent company and consolidated interim financial statements presented for the period ended September 30, 2025 have been prepared in accordance with CPC 21 (R1) – Interim Financial Reporting, issued by the Brazilian Committee of Accounting Pronouncements (CPC), and in accordance with IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board (IASB), in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM) applicable to the preparation of interim financial information and were approved by the Company's management on November 3, 2025.

The interim financial statements have been prepared to update users on the significant information presented in the period and should be analyzed together with the complete financial statements for the year ended December 31, 2024. In preparing these interim financial statements, we have adopted all standards, amendments to standards and interpretations issued by CPC, IASB and regulatory agencies that were in effect as of September 30, 2025.

Therefore, in order to disclose only relevant information or information on significant changes in relation to the last annual parent company and consolidated financial statements as of December 31, 2024, the notes listed below were not completed or do not have the same level of details of the notes that make up the annual financial statements:

- Cash and cash equivalents and Interest-earning bank deposits (Note 7.1);
- Trade receivables (Note 8.5);

- Inventories (Note 9.1 and 9.2.1);
- Income and social contribution taxes (Note 12.1);
- Investments (Note 13.4);
- Property, plant and equipment and intangible (Note 14.1);
- Loans, financing and debentures (Note 17.1)
- Suppliers (Note. 20.1 and 20.3);
- Tax liabilities (Note 21.1);
- Provisions for tax, civil and labor risks and contingent liabilities (Note 23.1, 23.1.1 and 23.1.2);
- Other liabilities (Note 25.1);
- Equity (Note 27.1);
- Dividends and Interest on equity (Note 28.1 and 28.2);
- Stock option plan (Note 30.1 and 30.2); and
- Restricted shares plan (Note 31.1 and 31.2).

The note listed below was not presented in relation to the most recent annual financial statements, both individual and consolidated, as of December 31, 2024.

- Climate-related financial information (Note 3.7);

For the sake of ensuring the comparability of information and in accordance with the best accounting practices, notes to financial movements are presented according to a comparison between the same periods of the current year and the previous year.

3.2 Statement of significance

We have applied the OCPC 7 Technical Guideline meeting the minimum requirements and, at the same time, disclosing only relevant information that helps readers to make decisions. Therefore, all significant information used in the management of the business is shown on this document.

3.3 Basis of measurement

We considered as the basis of value for the measurements in this document the historical cost, except for the investments held by RX Ventures in startups (Note 12.4), in the measurement of NDF financial instruments (Note 23.3), in the share option plan (Note 29) and in the restricted share plan (Note 30), which are measured at their fair values.

3.4 Functional and presentation currency

These interim financial statements are presented in Brazilian real, which is the Company's functional currency, with balances rounded to the nearest thousand. For foreign subsidiaries that operate in a stable economic environment with another functional currency, the statements of profit or loss are translated into Reais at the monthly average exchange rate and assets and liabilities at the final rate. The balances of assets, liabilities and accrued profit are translated at the final rate for Lojas Renner Argentina (LRA), which operates in hyperinflationary economies. Equity items are held at historical rates in all scenarios and changes are adjusted in the "Foreign exchange translation adjustments" account.

3.5 Significant accounting judgments, estimates and assumptions

Because the preparation of the financial statements requires management to make assumptions and estimates about the likelihood of future events and climate changes that affect the balances of assets and liabilities and other transactions, results may differ from estimates.

Critical accounting estimates, which are essential to produce the best possible information about the results and equity condition, even with their subjectivity, complexity and lack of accuracy, have a significant impact on:

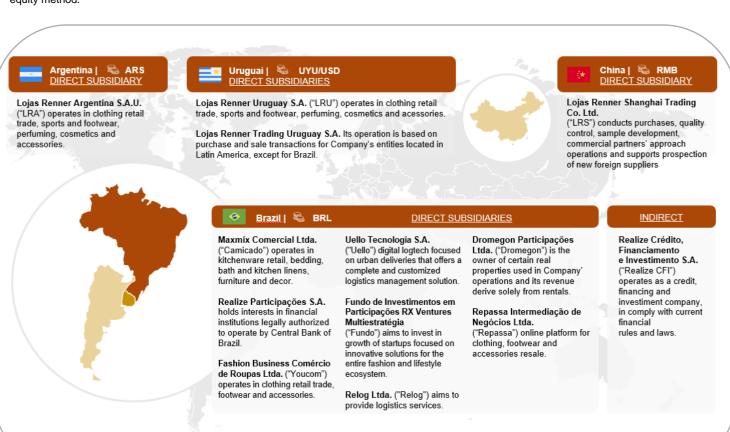

| Estimate | Note |
|--|---|
| CPC 42/ IAS 29 Financial Reporting in Hyperinflationary Economies | Note 3.8 |
| ECLs (Expected credit losses) | Note 7.3 |
| Estimated inventory losses | Note 8.1.1 |
| Discount rate applied to present value adjustments | Note 7.1, Note 8.1, Note 18.1 and Note 19.1 |
| Realization of deferred income and social contribution taxes | Note 11.3 |
| Asset impairment loss | Note 15 |
| Provisions for tax, civil and labor risks and contingent liabilities | Note 22 |
| Investees in RX Ventures fund in startups, determination of the fair values of derivative financial instruments, stock option plan and restricted share plan | Note 12.4, Note 23.2, Note. 29 and Note 30 |

3.6 Accounting policies

The significant accounting policies adopted by the Company to prepare the individual company and consolidated interim financial statements are consistent with those adopted and disclosed in the notes to the financial statements for the year ended December 31, 2024, which were disclosed on February 21, 2025 and should be read together with these statements.

3.7 Basis of consolidation

This publication includes the companies presented below in which we have direct and indirect interest, which represent 100.0% as of September 30, 2025, and for which we use the interim financial statements closed on the same reporting date as the parent company. Investments are accounted for using the equity method.

3.8 CPC 42/ IAS 29 Financial Reporting in Hyperinflationary Economies

The financial statements of LRA are restated in accordance with CPC 42/ IAS 29. We recognize in the financial result for the third quarter net income of R\$2,114 and, for the nine-month period ended September 30, 2025, net expenses of (R\$27,709) (R\$12,099 and R\$69,249 of net revenues in the same periods of 2024) resulting from hyperinflation in the LRA, consisting of receivable and payable inflation adjustment captions (Note 34).

4. STANDARDS AND INTERPRETATIONS IN EFFECT AND NOT IN EFFECT

We present below the rules that came into effect on January 1, 2025 and the rules that will come into effect on January 1, 2026 and are applicable to the Company's business.

4.1 Standards in force

4.1.1 CVM Resolution No. 197/2023 - International Tax Reform Pillar Two Model Rules

The Company reports that none of the foreign jurisdictions in which it currently has operations (Argentina, China and Uruguay) has implemented the Pillar Two rules published by the Organization for Economic Cooperation and Development (OECD). In relation to Brazil, in December 2024 Law No. 15,079/24 was published, and regulated through Normative Instruction No. 2,228/24, which introduced aspects of the GloBE (Global Anti-Base Erosion Model Rules), thus establishing a minimum annual taxation on income as from 2025 of 15%. The Company has been analyzing possible impacts on its operations, and according to the amounts realized in the period from January to September 2025 and its projections for the year-end, has now concluded that its GloBE effective rate complies with the rules established by Act No. 15,079/24 and additional taxes are not required.

4.1.2 CBPS 1/IFRS S1 Standard – General Requirements for Disclosure of Sustainability-related Financial Information

In compliance with CVM Resolution No. 193/2023, as approved by CVM Resolution No. 217/2024 and updated by CVM Resolution No. 227/2025, which aims at requiring an entity to disclose information about its sustainability-related risks and opportunities that is useful to the main users of financial reports for general purposes in making decisions related to the provision of funds to the entity, we have made the early adoption of IFRS S1, considering adoption reliefs as provided for by the Resolution, according to a report disclosed to the market on July 21, 2025.

4.1.3 CBPS 2/IFRS S2 Standard - Climate-related Disclosures

In compliance with CVM Resolution No. 193/2023, as approved by CVM Resolution No. 217/2024 and updated by CVM Resolution No. 227/2025, which aims at setting the requirements for identifying, measuring and disclosing information on climate-related risks and opportunities that are useful to the main users of financial reports for general purposes in making decisions related to the provision of funds to the entity, we have made the early adoption of IFRS S2, considering adoption reliefs as provided for by the Resolution, according to a report disclosed to the market on July 21, 2025.

4.1.4 CPC 02 (R2)/IAS 21 Amendment – The Effects of Changes in Foreign Exchange Rates and Translation of Subsidiary Financial Statements without Public Liability

The modifications implemented will require companies to apply a consistent approach when assessing whether a currency can be exchanged for another currency and, when it cannot, determine the exchange rate to use and disclosures to be provided.

We evaluated the standard, and we did not find any impacts resulting from the amendment, because we have already followed this practice when disclosed by foreign companies.

4.1.5 ICPC 09 (R3) – Parent Company Financial Statements, Separate Financial Statements, Consolidated Financial Statements and Application of the Equity Accounting Method

CVM Resolution No. 212/2024 made some corrections in the wording and reference in ICPC 09 with the purpose of aligning the wording of that standard with that of CPC 18 (R3), in order to adjust it to updates made after its issue and currently observed in the documents issued by CPC.

We evaluated the standard, and we are not impacted by the resolution, because we have already adopted this practice.

4.1.6 OCPC Amendment 10 - Carbon Credits (tCO2e), Allowances and Decarbonization Credits (CBIO)

CVM Resolution No. 223/2024 makes the OCPC 10 guidance mandatory for public companies, which directs the accounting treatment of carbon credits (tCO2e), *allowances* and decarbonization credits (CBIO) of entities operating in the Brazilian capital market, aiming to ensure the consistency of the financial statements and allow their connection with the sustainability financial report approved by CVM Resolution 193/23.

We evaluated the standard, and we have no impacts from the amendment, because there are no transactions of this nature.

4.1.7 Amendment to SASB Standards – Improvements to Their International Applicability

The International Sustainability Standards Board (ISSB) has issued amendments to the standards of the Sustainability Accounting Standards Board (SASB) to improve their international applicability, with a view to making the SASB standards internationally applicable. SASB standards facilitate the implementation and application of the IFRS S1 General Requirements. The amendments become effective for annual reporting periods beginning on or after January 1, 2025.

We have assessed the impacts and have no impacts from the amendment, because we are already adopting the ISSB standards in our IFRS S1 report.

4.2 Standards not in effect

4.2.1 Amendments to IFRS 7 and IFRS 9 - Classification and Measurement of Financial Instruments

The amendments will address diversity in accounting practices and thus make requirements more understandable and consistent. These include:

- i) Classification of financial assets with ESG and similar characteristics;
- ii) Settlement of liabilities through electronic payment systems.

With these changes, the IASB has also introduced additional disclosure requirements to increase transparency. The changes will take effect from January 1, 2026, and we are assessing the impacts of the amendments.

4.2.2 CPC 51/IFRS 18 Standard - Presentation and Disclosure of Financial Statements

It aims to promote consistency in the presentation and disclosure of financial statements, providing investors with a better basis on which to analyze and compare the performance of companies. The main changes to the standard are:

- i) New categories and subtotals in the statement of profit or loss: operational, investment and financing;
- ii) Disclosure in notes to non-GAAP metrics (EBITDA); and
- iii) Presentation of operating expenses specified by nature.

The effective date of the standard is January 1, 2027 and we are assessing its impacts.

4.2.3 IFRS 19 - Subsidiaries under no Public Liability

The standard allows subsidiaries that do not have public liability, and if their ultimate controlling party produces consolidated financial statements in accordance with IFRS, to provide reduced disclosures when applying international financial reporting standards in their financial statements. IFRS 19 is optional for eligible subsidiaries.

The effective date of the standard is January 1, 2027 and we are assessing the impacts of the standard.

5. RISK MANAGEMENT

A multidisciplinary structure manages the Company's risks and allows Top Management to evaluate the alignment of business management with the policies and guidelines established by Management. In April 2012, the Board of Directors created the Audit and Risk Management Committee, which identifies and monitors the main risk factors exposed in the normal course of operations:

- i) Market risk (interest rate risk (Note 5.1.1) and exchange rate risk (Note. 23.4));
- ii) Credit risk (Note 6.3; Note 7.5 and Note 23.5);
- iii) Liquidity risk (Note 5.2); and

iv) Capital management (Note 5.3).

We applied the requirements set forth by CPC 40 (R1)/IFRS 7 and considered the guidance set forth by Official Letter issued by CVM SNC/SEP 01/2022, considering qualitative and quantitative risk management issues.

Below is a description of the main risks involved:

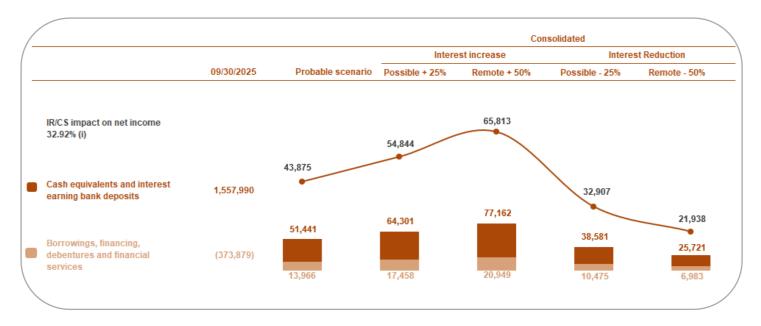

5.1 Market risk

5.1.1 Interest rate risk

Cash flows from cash equivalent transactions, financial investments and financing of financial services transactions. Because financial assets bear interest at the CDI (interbank deposit certificate) and receivables are realizable in the short term and bear fixed interest rates, the level of risk associated with fluctuations in interest rates is relatively low.

We continuously analyze the Company's exposure to interest rates, comparing agreed rates with those prevailing in the market, simulating refinancing, position renewal and natural hedging scenarios, defining a reasonable change in interest rates and calculating its impact on profit or loss.

On September 30, 2025 we conducted sensitivity tests for negative interest rate scenarios, considering the expected scenario for the next disclosure of the CDI and Selic interest rates of 14.90% p.a., based on B3 futures market projections, with yields on cash equivalents and financial investments net of PIS and COFINS and their effects of IR/CS. The impacts that would be determined for the next quarter are:

(i) Rate obtained from the application of nominal rates weighted by the balances of the parent company and its subsidiaries.

5.2 Liquidity risk

We manage our cash equivalents by establishing a strategic minimum amount of cash according to the cash cycle of retail transactions and the minimum capital necessary to secure credit transactions, ensuring that there is sufficient cash to meet business needs and plans.

We continuously monitor estimates of liquidity requirements, considering debt financing plans and quarterly tracking of financial and non-financial indicators over the past 12 months required for loans, confirming compliance with contractual assumptions. The chart on side presents the monitored indicators.

Contractual cash flows include principal plus future interest estimated through the date of maturity. Below are the contractual cash flows of the financial liabilities of the consolidated financial statements:

5.3 Capital management

In addition to equity capital, we also use debt capital to finance our activities, thus optimizing our capital structure. Cash and net indebtedness reflect the total exposure of liabilities to financial system and capital markets and therefore do not include liabilities related to leases payable.

Indebtedness levels are monitored in relation to cash generation capacity and capital structure.

⁽i) The Sovereign DI investment fund, held by indirect subsidiary Realize CFI with Banco Santander, is a security linked to the provision of contract guarantees;

⁽ii) It is a fixed-rate security held by HSBC bank in LRS.

(ii) Brasil Plural Retail FI exclusive investment fund is a private credit fixed-rate investment fund managed by Plural Gestão and administered by BNY Mellon Serviços Financeiros DTVM S.A. and was set up only for the interest of the parent company. The investments in the fund have been fully consolidated in these interim financial statements. Other liabilities related to the fund are mainly the administrative fees incurred to maintain the portfolio. Recognized yields reflect the daily mark-to-market of the fund position and assets have secondary market liquidity.

6.3 Credit risk

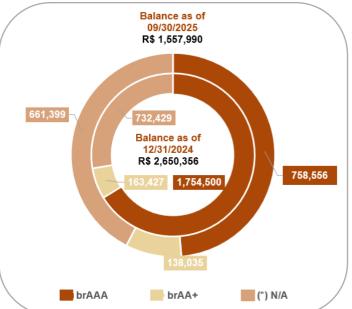

According to financial policy, cash equivalents and financial investments should be invested in financial institutions with a long-term domestic rating,

classified as having low credit risk and recognized for their soundness.

The ratings of cash equivalents and Interest-earning bank deposits are in accordance with the results of the main risk rating agencies.

The rating agency 'Standard & Poors' rated the Company's credit rating as brAAA with a stable outlook in the domestic scale category (Brazil). We present below the credit quality of cash equivalents and Interest-earning bank deposits held by the Company.

(*) Fundo de Investimentos Brasil Plural does not have a credit rating but adopts an investment policy to allocate it to assets that pose low credit risk. As of September 2025, the composition of the portfolio mostly includes securities rated AA+ and AAA. Although government bonds are not rated as risk, they are subject to sovereign risk and therefore can be considered equivalent to a AAA rating.

7. TRADE ACCOUNTS RECEIVABLES

7.1 Accounting policy

These include receivables from sales of goods made through the Renner Card (Private Label) and Co-branded card (*Meu Cartão*), use in the network supported by Visa and Mastercard, personal loans granted to clients and loans granted to individuals and legal entities by indirect subsidiary Realize CFI and sales made via third-party cards.

Pre-fixed installment sales were brought to present value on the dates of transactions, based on the average rate of the Central Bank of Brazil site for advance payment of receivables, which was 1.45% p.m. (1.05% p.m. as of December 31, 2024). The present value adjustment has an offsetting entry to a trade receivable account and its realization is recognized as sales revenue over the term.

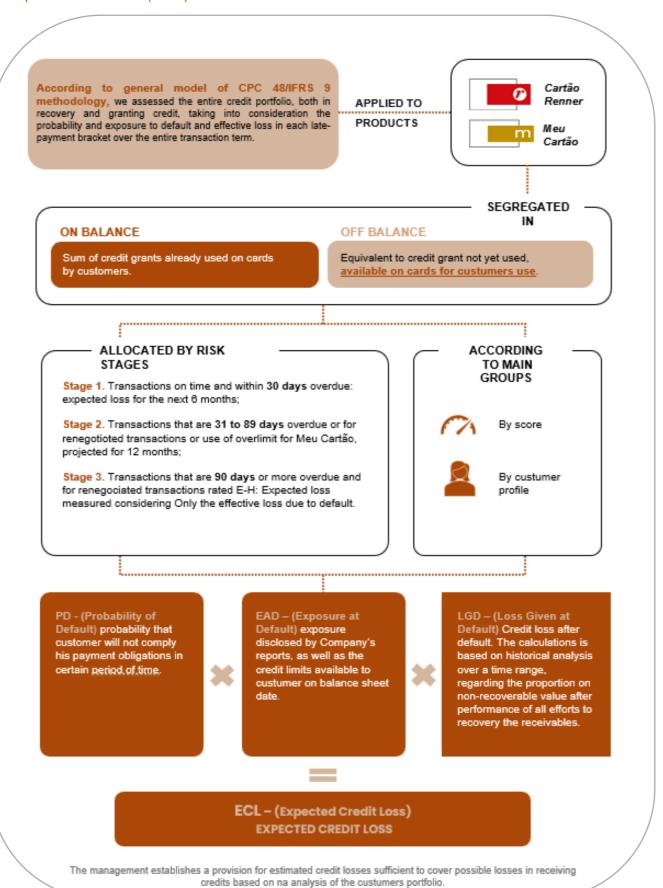

The Company follows credit renegotiation policies for clients with payment difficulties, allowing it to adjust its terms according to each client's credit profile. These renegotiations have a direct impact on the recognition of the allowance for ECL, given that they match the client for the expected loss commensurate with the new transaction.

Expected credit losses are based on the calculation method of CPC48/IFRS 9, see Note 7.3. As of the first quarter of 2025, considering the level of recovery of losses on portfolios overdue after 360 days, we started to write-off the portfolio overdue after 540 days for impairment. This change better reflects the portfolio's recovery profile and is in line with the amendment to the standard issued by the National Monetary Council (CMN), which seeks to align it with IFRS 9.

The statement of income discloses reversals (losses) on credits, net of recovery. The amount shown below is expected losses, less the recovery of receivables previously written off as loss. This recovery does not pass through the expected credit loss accounts. Consolidated amounts totaled R\$24,948 and R\$79,649 (R\$37,235 and R\$142,366 as of September 30, 2024) in the three and nine months ended September 30, 2025, respectively.

7.5 Credit risk

Our sales and credit granting policies aim at minimizing problems arising from client defaults through a careful selection of the portfolio, which considers payment capacity and diversification of operations. These policies are subordinated to those credit policies set by Management, supported by advanced technological systems and processes related to the risk and fraud department.

Receivables basically originate from diversified retail transactions carried out to individuals, with an individual credit analysis and low average purchase *amounts*, characterized by the absolute pulverization of credit risk and the absence of a security instrument. The amounts recorded in trade receivables represent the proper extent of our credit risk exposure.

The internal credit risk quality rating is as follows:

Chances of delay greater than 60 days:

Low risk: likelihood ≤ 9.3%;

Medium risk: customers with up to 4 months of Renner Credit Card or Co-branded card, with little history of movements to measure their probability of default;

Medium high risk: probability > 16.8% and ≤ 31.3%;

High risk: probability > 31.3%.

Receivables from sales using third-party credit cards are not included in this analysis because they are receivables that pose a risk of default by the credit card issuer, with no history of loss and no expected future losses.

The change in the relative share of risk levels in relation to the previous period mainly reflects the change in the write-off period of overdue receivables, which went from 360 to 540 days.

The implementation of the RFID (Radio Frequency Identification of Products) system allowed us to increase the frequency of inventories counts of all physical stores (Lojas Renner) and therefore we started to recognize the effects of the related losses directly in profit or loss. Cyclical inventories are taken every quarter at the Distribution Centers of Lojas Renner Brazil and Uruguay. We also recognized an allowance for estimated losses for distribution centers/e-commerce, according to the historical losses, as well as for the other subsidiaries Camicado and Youcom.

- (i) PIS and COFINS: amount mostly consist of credits resulting from the Federal Supreme Court's decision on Topic 69, about the deduction of the ICMS from the PIS/COFINS calculation base, and the recognition of the portion related to the ICMS ST. The Company's tax credit was settled in March 2025, and the subsidiary Camicado has an inflation-adjusted balance as of September 30, 2025, net of offsets already carried out, of R\$28,730, which is expected to be settled in the first half of 2026.
- (ii) Other recoverable taxes: the amount mostly consists of social security contribution credits taken on one third of the vacation pay. In June 2024, the Federal Supreme Court concluded the judgment on the modulation of the effects of Topic 985 (general repercussion), deciding on the constitutionality of the levy of social security contributions on the constitutional 1/3 of vacation taken, but determining that the decision will take effect from the publication of the minutes of the judgment (09/15/2020), allowing taxpayers to file a lawsuit on the subject, the recovery of amounts paid in the past to that date. The parent company has filed a lawsuit about the issue. The Company's legal counselors consider that a favorable outcome, considering CPC 25, is virtually certain. The credit amount as of September 30, 2025 is R\$32,763 (R\$31,204 as of September 30, 2024) and may be used for offsetting only after the court decision.

(i) Tax loss carryforwards and negative social contribution bases recognized as deferred tax assets by the Parent Company and its subsidiaries are supported by assessments conducted at the end of each fiscal year to evidence the likelihood of generating future taxable profits that will enable the realization of these assets. For subsidiaries where technical feasibility studies indicate recoverability over a period exceeding ten years, the amount of tax loss carryforwards is R\$ 402,995 and the amount of negative CSLL base is R\$ 339,551 for the period ended September 30, 2025.

The rates of 25% for IRPJ (Corporate Income Tax) and 9% for CSLL (Social Contribution Tax) are 25% for Brazilian, except for indirect subsidiary Realize CFI, which is 25% for IRPJ and 15% for CSLL. In companies abroad, income tax rates range from 25% to 30%.

The Company offsets deferred assets against the deferred liabilities of the Company and subsidiaries individually.

11.3 Realization of deferred tax assets

We periodically check for the recoverability of the balance of deferred tax assets. Our evaluation is supported by technical feasibility studies that forecast future taxable income, allowing the estimated recoverability of credits in a period not higher than 10 years. Moreover, the realization of deferred taxes depends on the uncertainties of the other estimates.

- (i) Our imports in the state of Santa Catarina are benefited by ICMS presumed credit on interstate shipments of these products. We also benefit from ICMS presumed credit on interstate shipments of merchandise to final consumers made through the state of Rio de Janeiro. Under Act No. 160/2017, these benefits are considered investment grants, and are not part of the IRPJ/CSLL calculation base. This understanding remains the same even after the enactment of Law 14.789/23, due to court decisions obtained by the Company for the Parent Company and its subsidiaries. In accordance with ICPC 22/IFRIC 23, management, with the help of its legal advisors, analyzed the acceptability of the tax treatment described above and concluded that it is probable that tax authorities will accept it;
- (ii) Consists of supplementing the deduction of SELIC interest on the reimbursement of taxes unduly paid (recovery of undue payment), according to a decision rendered by the Federal Supreme Court (STF) when passing a judgment on appeal No. 1,063,187, whose general repercussion is recognized.
- (iii) Refers to the deduction of the SELIC (Central Bank overnight rate) interest on the repayment of undue tax payments pursuant to judicial decisions rendered on lawsuits to which we are parties and to the judgment on the merits of appeal No. 1,063,187 filed by the Federal Supreme Court to have general repercussion;
- (iv) Consists of deferred taxes not recognized in subsidiaries Camicado, Repassa, Uello and LRA, the result of technical studies that show estimated recoverability in a period higher than ten years;

14. RIGHT-OF-USE

14.1 Accounting policy

Right-of-use assets are measured at cost less any accumulated depreciation and impairment losses (Note. 15), and adjusted for any new remeasurement of lease liabilities (Note 18). The cost of the right-of-use asset includes the initial lease liability plus direct costs incurred, while maintaining the amount of the initial lease liability. In hyperinflationary economies, right-of-use assets are revalued based on general price indices to reflect the currency's constant purchasing power at the reporting date. The effects are recognized in profit or loss for the period. Depreciation is calculated using the straight-line method over the term set forth by the lease or over the remaining useful life.

CPC 06 (R2)/IFRS 16 requires all leases in the scope of the standard – except those covered by the exemptions – that lessees recognize liabilities assumed with offsetting entries to the related right-of-use assets.

14.2 Breakdown of the right-of-use

- (i) Administrative headquarters building.
- (ii) Lease of commercial spaces, distribution centers and other administrative headquarters.

18. LEASES PAYABLE

18.1 Accounting policy

Lease liabilities are recognized at the commencement date at the total future fixed rent payments (gross of taxes) and discounted to present value at the discount rate according to the lease term. The measurement of the nominal discount rate consists of future market quotations obtained at B3 S.A., benchmark in DI x fixed rate + spread risk for funding in amounts that represent the total investments made for opening new stores. In the table presented in Note 18.4.1, we show the weighted average term that matches the respective rates shown.

At least annually, we adjust the fixed rent using the inflation indexes mentioned in the contract, we recalculate the new payment flow, and we recognize the effects as an offsetting entry to the right-of-use currency. For hyperinflationary economies, we monthly update the fixed rent amount for inflation. In the case of contractual amendments resulting from changes in rate, term or change in the amount of payment, we remeasured the lease liability and recognized the effects on the right of use.

18.4.1 Additional information

In compliance with Official Letter 02/2019 issued by CVM SNC/SEP, we disclose the minimum inputs for projecting the nominal rate and nominal cash flow model recommended by CVM.

Projected inflation is shown for cash flow purposes. Below is the flow of payments, the average term allowed and the respective fees:

| | | | Consolidated | | | | | |

| Total | | | 3,507,395 | 199,613 | 717,489 | 615,347 | 502,399 | 1,472,547 |

- (i) We calculated the weighted average contractual flow term to quote rates, because contracts are repaid monthly, reducing the average term of the transaction and the risk to the creditor.
- (ii) Future lease contract flow with purchase option with annual discount rate of 8.81%. implicit in the agreement entered into in July 2012 for the administrative headquarters.

Due to the approval of Constitutional Amendment 132/2023, lease payments will only generate PIS and COFINS credits until December 31, 2026, when these contributions will be terminated and replaced by the Contribution on Goods and Services (CBS), whose rate is yet to be regulated. As of September 30, 2025, the potential PIS and COFINS credit on the gross contractual flow for the years 2025 and 2026 is R\$84,832 and, discounted to present value over the weighted average term, is R\$63,967.

⁽i) In order to meet the cash needs of suppliers, we prepaid obligations using our own cash. As of September 30, 2025, these transactions totaled R\$267,154 (R\$316,379 as of December 31, 2024) and R\$287,997 (R\$339,250 as of December 31, 2024) in the Consolidated financial statements. Because discounts are related to the supply of merchandise are recognized as a reduction in sales costs according to inventory turnover;

(ii) Adjustment present value: the discount rate was adjusted for inflation to 1.50% p.m. (1.27% p.m. as of December 31, 2024).

- (i) The most significant provisions for tax lawsuits are the following:
- IPI resale, supposedly collected without complying with the minimum taxable amount;
- PIS/COFINS disallowance of credits related to expenses considered input;
- Disallowance of the right to ICMS credits on acquisitions from suppliers considered to be unsuitable ones;
- Disallowance of the right to ICMS credits on energy, acquisitions of merchandise, rate differences, among others;
- Increase in the SAT (Occupational Accident Insurance) rate and the introduction of the FAP (Percentage Applied to Prevent Occupational Accidents);
- Disallowance of expenses on the payment of interest on equity from prior years; and
- Requirement to pay INSS (Social Security Contribution)/IRRF (Withholding Income Tax) on non-salary installments.

22.2 Contingent tax liabilities

According to the Company's legal counselors, we considered contingent liabilities (possible losses) plus interest and adjustment for inflation presented below:

- (i) Notice of IPI deficiency for alleged failure to comply with the minimum taxable amount (VTM) for shipments from the importing Distribution Center to other Distribution Centers.
- (ii) Deficiency in IRPJ/CSLL for allegedly unduly deducting an investment grant related to ICMS tax incentives (deferral and reductions in MVA) for the years 2021 and 2022;
- (iii) Notice of PIS/COFINS deficiency for the years from 2017 to 2022 for allegedly misappropriating credits on expenses that, according to the Federal Revenue Service's understanding, would not fall into the hypotheses provided for in the legislation for taking credits in the non-cumulative mode.

22.3 Civil contingent liabilities

Civil proceedings are mass consumer civil cases, in which the amount of the claim often does not reflect the amount of the contingency. We consider in the provision the history of liabilities actually settled, which we understand to be the information that best reflects the Company's and Consolidated financial statements' exposure to this type of risk.

Of the lawsuits classified as possible loss, the following are exceptions to the concept of mass proceedings:

| | 09/30/2025 | 12/31/2024 |
|---|------------|------------|
| Imposition of fine for alleged termination of contract (i) | - | 16,205 |
| Demand by former suppliers for contract termination amounts | 8,134 | 4,707 |
| Collection of condominium fees for the lease of the store | 6,344 | 5,869 |
| Total | 14,478 | 26,781 |

(i) A partial favorable judgment was issued by the Court. As a result of this decision, the amount was reduced and the risk was reclassified as probable.

22.4 PIS and COFINS tax credits on input

In compliance with Circular Letter/CVM/SNC/SEP/No. 01/2021, we inform you that, based on the judgment of the STJ (Superior Court of Justice) Resp. 1.221.170/PR, which defined the concept of input for calculating PIS and COFINS credits, taking into consideration the criteria of essentiality or relevance of the expense for the development of the taxpayer's economic activity, we recognized PIS and COFINS credits for expenses considered essential or relevant to our operations in the nine months ended September 30, 2025 in the amount of R\$12,255 (R\$ 23,814 nine months ended September 30, 2024). Because legal counselors consider that an outflow of resources from these credits is possible, no provision was recognized under CPC 25/IAS 37.

23. FINANCIAL INSTRUMENTS

23.1 Accounting policy

They are recognized at fair value and determined according to macroeconomic indicators. The method for recognizing a resulting gain or loss depends on whether the derivative is designated as a hedging instrument. If so, the method depends on the nature of the item being protected. We adopted hedge accounting and designated forward contracts (NDF) as cash flow hedge. At inception of each transaction, the relationship between the hedging instrument and hedged items, the risk management objectives and the strategy for hedging transactions are documented, and we recurrently assess the economic relationship between the instrument and the hedged item.

23.1.1 Cash flow and financial hedge

Its purpose is to mitigate the risk of exchange rate fluctuations in unsettled import orders. The effective portion of the change in the fair value of derivatives designated and qualified as cash flow hedges is recognized in equity as asset and liability valuation adjustments in other comprehensive income. This portion is realized when the risk for which the derivative was entered into is eliminated. After financial instruments are settled, gains and losses previously recognized in equity are transferred from equity to the initial cost of assets (inventories).

Regarding financial hedging instruments not designated for hedge accounting related to cleared merchandise, gains or losses are recognized in finance income (costs).

23.2 Financial instruments by category, measurement and hierarchy of fair values

We use the discounted cash flow valuation technique to measure the fair values of financial assets and liabilities, whose assumption is the present value of cash flows estimated by future market prices. For financial assets and liabilities for which book balances reasonably approximate fair value, fair values are not determined, as set forth by CPC 40/IFRS 7. We classify financial assets and liabilities into "Level 2" of the fair value hierarchy, given that they are calculated based on information that is observable, whether directly or indirectly, except for quoted prices (unadjusted) in active markets for identical assets or liabilities that we can have access to at the measurement date.

25. RELATED PARTIES

25.1 Consolidated context

25.1.1 Agreements or other significant obligations between the Company and its managers

According to Chapter IV, article 13 of the Company's by-laws, the Company is managed by the Board of Directors and Management and the Managers are described in a statement drawn up in a proper book, signed by the sworn in Administrator, which must include their subjection to the arbitration clause referred to in Article 47 of the Bylaws and their approval to the Novo Mercado Regulations. Without any management guarantee and conditional on the Company's subscription to the Code of Conduct.

The Board of Directors, elected by shareholders at their annual meeting, has a unified term of office of one year, with reelection permitted. The incumbent members of the Board shall be deemed automatically nominated for re-election by their joint proposal. Top Management, whose members are elected and removed at any time by the Board of Directors, has a two-year term, with the possibility of reelection, and is bound by a service agreement, whose compensation comprises a fixed component, annually adjusted using the INPC, and a variable component, according to the Company's financial performance.

25.1.2 Compensation of members of the Board of Directors and Management (the "Management")

According to Brazilian Corporate Law and our bylaws, it is up to shareholders, at their annual meeting, to set the global amount of annual compensation to be paid to managers and to the Board of Directors to distribute it among managers, after considering the opinion of the People Committee.

The Annual General Meeting held on April 24, 2025 approved for 2025 the global management compensation limit of up to R\$54,500. This amount also includes the remuneration attributed to the Fiscal Councilors for this year in up to R\$ 900.

| | | | | | | | | | | |

(i) At an Extraordinary General Meeting held on December 11, 2024, shareholders approved the bonus on shares (Note 26.1.1).

26.3 Capital reserves

The reserves of the stock option plan and restricted shares, with a balance of R\$187,048 as of September 30, 2025 (R\$166,431 as of December 31, 2024), are offsetting entries to the expenses of the share option plan (Note 29) and the restricted share plan (Note 30), whose allocation is to be decided on at an extraordinary meeting.

26.4 Profit reserves

- (i) Legal reserve: in compliance with article 193 of Act No. 6,404/76 and article 33, item (a) of our bylaws, the statutory reserve is recognized at the rate of 5% of annual profit, after reducing the portion allocated to the tax incentive reserve. The balance as of September 30, 2025 is R\$59,833 (R\$59,833 as of December 31, 2024);
- (ii) Reserve for investment and expansion: this reserve is set up as decided by Management, as provided for in article 33, item (c) of our Bylaws. As of September 30, 2025 the balance is R\$604,094 (R\$604,094 as of December 31, 2024);
- (iii) Tax incentive reserve: consists of ICMS tax incentives allocated in prior years. On December 11, 2024, the Extraordinary General Meeting approved a capital increase, incorporating R\$415,067 from the tax incentive reserve. As of September 30, 2025 the balance is R\$415,067 (R\$415,067 as of December 31, 2024).

26.5 Other comprehensive income

Cumulative translation adjustments, inflation adjustment for hyperinflation and unrealized gains (losses) on derivative financial instruments, such as equity valuation adjustments, are the cumulative translation adjustments. The amount represents a cumulative gain balance as of September 30, 2025, net of taxes, of R\$41,125 (R\$141,012 of gain, net of taxes as of December 31, 2024).

27. INTEREST ON EQUITY

- (i) Six-year limit to exercise options from the grant date;
- (ii) From the 6th grant, the exercise may be carried out in three *tranches*, the first being 20% after two years of grace period, 30% after three years of grace period and the remaining 50% after completing four years from the grant date.

The closing share price as of September 30, 2025 was R\$15.13 (R\$12.12 as of December 31, 2024). Each option entitles the holder to one share, and as of September 30, 2025 we had the 8th and 9th grant, totaling 9,882 shares available in *the in-the-money* options, and as of December 31, 2024, there were no *in-the-money* options. In the three and nine months ended September 30, 2025, the expense on the share option plan totaled R\$4,928 and R\$17,199 (R\$6,269 and R\$18,386 as of September 30, 2024), Parent Company and Consolidated.

29.2 Assumptions for measuring the fair value of stock options

We calculated the fair value of stock options on the grant date according to the *Black&Scholes model* and assumptions such as:

- i) Exercise value: weighted average rate of the last thirty trading sessions of Lojas Renner S.A. shares before the grant date;
- ii) Share price volatility: weighting of the Company's share trading history;
- iii) Risk-free interest rate: we used the interbank deposit certificate (CDI) rate available on the grant date and we forecast the use of the term according to the exercise of the options;
- iv) Expected dividend: payment of dividends per share in relation to the market value of the share at grant date;
- v) Term of the acquisition right: the average exercise period of the most recent grant ended for beneficiaries to exercise their options.

30. RESTRICTED SHARE PLAN

30.1 Position of the restricted shares plan

The restricted share plan expenses for the three and nine months ended September 30, 2025 are R\$5,486 and R\$18,386 (R\$5,163 and R\$14,874 as of September 30, 2024) and social charges - R\$2,018 and R\$15,619 (R\$6,669 and R\$6,063 as of September 30, 2024), totaling R\$3,468 and R\$34,005 (R\$11,832 and R\$20,937 as of September 30, 2024).

30.2 New Long-Term Incentive Plan - ILP 2026

In September 2025, the Company approved the new share-based payment plan – ILP 2026, consisting of Performance Share and Restricted Shares with application of a financial trigger. The purpose of the plan is to allow the granting of long-term incentives to the Company's executives and talents, strengthening the link between performance and reward and aligning the interests of shareholders and executives. Lojas Renner's compensation strategy is based on best market practices, boosting the attraction, retention and motivation of highly qualified professionals. In order to strengthen the alignment of interests, the proposed new plan considered the expectations of shareholders and the guidelines of the main voting recommendation agencies, meeting criteria such as maximum limit for the use of capital/shares in the plan (dilution of capital or treasury shares), vesting period and setting goals of at least three years. Prohibition of the participation of beneficiaries in the management of the plans, non-inclusion of the members of the Board of Directors as eligible for the plan, and, finally, the alignment with performance/financial results and value creation indicators.

Performance shares are linked to specific indicators and the attainment of goals by the end of the grace period, while the grant of restricted shares is subject to the attainment of a minimum goal (trigger) of financial results expected by the Company in the year prior to that of the grant. This approach represents an evolution in market practices in Brazil, where this incentive category, of Restricted Shares, is usually linked only to permanence criteria (grace period) and non-performance.

30.2.1 Performace Share

Performace shares, which consist of promises of future concessions of the Company's shares, at no cost to participants, will replace the Stock Options (POCA) as long-term incentive instruments (ILP) and will be granted to eligible Senior Executives and Managers, subject to compliance with a vesting period) of at least 3 years (without anticipation) and the achievement of predefined performance metrics throughout the period.

30.2.2 Restricted Shares

The proposed supplementary plan will focus more on long-term retention and will be based on restricted shares, which consist of promises of future concessions of the Company's shares, which will only occur if financial targets for the previous fiscal year are reached (financial trigger). Once a grant is made, the effective transparency of the shares will be subject exclusively to the fulfillment of a minimum grace period (vesting), and at no cost to the participants. The concessions made under the proposed plan will depend on the achievement of the trigger/minimum profit goal expected by the Company in the previous fiscal year.

31. SEGMENT REPORTING

31.1 Accounting policy

The segments we present below are organized in a manner consistent with the internal report provided to the Board of Directors, the chief decision-maker and responsible for allocating resources and assessing business performance:

- (i) Retail: trade of clothing, perfumery, cosmetics, watches and home & decoration, urban deliveries and logistics management solutions covering the operations of Renner, Camicado, Youcom, Repassa, Uello and operations in Uruguay and Argentina.
- (ii) **Financial products:** granting of individual and corporate loans, financing of purchases, insurance and the practice of receivables and payables inherent to credit, financing and investment companies.

The reported results do not deduct expenses on depreciation and amortization, share option plan, result from the write-off of assets and income and social contribution taxes. The exclusion of these expenses from the calculation is in line with the way Management evaluates the performance of each business and its contribution to cash generation. Finance income (costs) are not allocated by segment, given that their formation is more related to corporate capital structure decisions than to the nature of the results reported by each business segment.

32. REVENUES

32.1 Accounting policy

CPC 47/IFRS 15 – Revenue from Contracts with Customers establishes a model to show whether accounting criteria have been met by following steps:

Considering these aspects, revenues are recorded at the amount that reflects the Company's expected to be paid for the consideration for financial products and services offered to clients.

Gross revenue is presented less rebates and discounts, in addition to the elimination of related party revenues and the present value adjustment (Note 7).

- (i) Sale of goods retail: sales made in cash, cash or debit card, in installments, with third-party cards or Renner Card, and by financing granted by indirect subsidiary Realize CFI, both in physical stores and in ecommerce. Revenue is recognized in profit or loss when the goods are delivered to the customer.
- (ii) Services: own loan transactions, individual and corporate loans and sales finance by the indirect subsidiary Realize CFI, whose result is recognized considering the effective interest rate over the term of the contracts. Services also include revenues from Marketplace sales commissions with partner companies, sales intermediation commissions, intercompany services, urban deliveries and complete and customized logistics management solutions.

Report on the review of quarterly information – ITR

(A free translation of the original report in Portuguese, as filed with the Brazilian Securities Commission – CVM, prepared in accordance with the Technical Pronouncement CPC 21 (R1) – Interim Financial Reporting and the international standard IAS 34 – Interim Financial Reporting, as issued by the International Accounting Standard Board – IASB)

To the Board of Directors and Shareholders of **Lojas Renner S.A.**Porto Alegre – RS

Introduction

We have reviewed the individual and consolidated interim financial information of Lojas Renner S.A. ("Company"), included in the Quarterly Information Form - (ITR) for the quarter ended September 30, 2025, which comprises the balance sheet on September 30, 2025, and the respective statements of income, of comprehensive income for the three and nine-month periods then ended, and statements of changes in shareholders' equity and of cash flow for the nine-month period then ended, including explanatory notes.

Management is responsible for the preparation of the individual and consolidated interim financial information in accordance with accounting standard CPC 21(R1) and IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of this information in accordance with the standards issued by Brazilian Securities Commission (CVM), applicable to the preparation of the Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of Review

We conducted our review in accordance with the Brazilian and International Review Standards for Interim Financial Information (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily to the persons in charge of financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the individual and consolidated interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34 applicable to the preparation of Quarterly Information (ITR) and presented in accordance with the standards issued by the Brazilian Securities Commission.

Other matters

Statement of Added Value

The individual and consolidated interim financial information referred to above includes the individual and consolidated statement of added value (DVA) for the nine-month period ended at September 30, 2025, prepared under responsibility of the Company's Management, and presented as supplementary information for IAS 34 purposes. These statements were submitted to review procedures carried out together with the review of the Company's quarterly information to conclude that they are reconciled

with interim financial information and accounting records, as applicable, and its form and content are in accordance with the criteria defined in Technical Pronouncement CPC 09 – Statement of Added Value. Based on our review, nothing has come to our attention that causes us to believe that those statement of Added Value were not prepared, in all material respects, in accordance with the criteria set for this Standard and that they were not consistent to the individual and consolidated interim financial information taken as a whole.

Corresponding Values

Corresponding values related to individual and consolidated balance sheets as of December 31, 2024, were previously audited by other independent auditors who issued a report dated February 20, 2025, without modification and the individual and consolidated statements of income and comprehensive income for the three and nine-month periods then ended, and statements of changes in shareholders' equity and of cash flow for the nine-month period ended September 30, 2024, were previously reviewed by other independent auditors, who issued a report dated November 4, 2024, without modification. The corresponding values related to the individual and consolidated Statements of Added Value (DVA) for the nine-months period ended September 30, 2024, were subjected to the same review procedures by the those independent auditors, and, based on their review, nothing came to their attention that caused them to believe that these statements had not been properly prepared, in all material respects, consistently with the individual and consolidated interim financial information taken as a whole
