Report on Review of Interim Financial Information
To the Board of Directors and Management
Multiplan Empreendimentos Imobiliários S.A.
Rio de Janeiro – RJ

Introduction
We have reviewed the accompanying individual company and consolidated interim financial information of Multiplan Empreendimentos Imobiliários S.A. ("Company"), included in the Quarterly Financial Information for the quarter ended September 30, 2026, which comprises the balance sheet as of September 30, 2026, the statements of profit or loss and comprehensive income for the quarter and nine-month period then ended, changes in equity and cash flows for the nine-month period then ended, including notes to the interim financial information.

Management is responsible for the preparation and presentation of this interim financial information in accordance with CPC 21(R1) Technical Pronouncement – Interim Financial Information and international standard IAS 34 – Interim Financial Reporting, applicable to real estate development entities in Brazil and registered with the Brazilian Securities and Exchange Commission ("CVM"), as well as for the presentation of this quarterly information in accordance with the standards issued by the Brazilian Securities and Exchange Commission, applicable to the preparation of the interim financial information. Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review
We conducted our review in accordance with Brazilian and international review standards applicable to interim financial information (NBC TR 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 - *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the individual and consolidated interim financial information
Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual company and consolidated interim financial information referred to above is not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34 applicable to real estate development entities in Brazil, registered with the Brazilian Securities and Exchange Commission ("CVM"), for the preparation of Interim Financial Information and presented in accordance with the standards issued by the Brazilian Securities and Exchange Commission.

Emphasis

As described in note two (2), the individual company and consolidated interim financial information included in the Quarterly Financial Information was prepared in accordance with CPC 21 (R1) and IAS 34 applicable to real estate development entities in Brazil registered with the Brazilian Securities and Exchange Commission (CVM). Therefore, the accounting policy adopted by the entity for the recognition of revenue in contracts for the purchase and sale of unfinished real estate units, on the issues related to the transfer of control, is in line with the understanding of the Company's management about the application of NBC TG 47, in line with that expressed by CVM in Circular Letter CVM/SNC/SEP No. 02/2018. Our conclusion is not qualified on this issue.

Other issues - Statements of Value Added

The quarterly financial statements referred to above, include the individual company and consolidated statements of value added for the nine-month period ended September 30, 2026, prepared under the responsibility of the Company's management and presented as supplementary information for the purposes of IAS 34 applicable to real estate development entities in Brazil registered with the Brazilian Securities and Exchange Commission ("CVM"). These quarterly financial statements have been submitted to review procedures performed together with the review of the quarterly financial statements to conclude whether they are reconciled to the interim financial information and accounting records, if applicable, and whether their form and content are in accordance with the criteria set by Technical Pronouncement NBC TG 09 – "Statement of Value Added". Based on our review, nothing has come to our attention that causes us to believe that these financial statements have not been prepared, in all material respects, according to the criteria set on this Technical Pronouncement and in a manner consistent with the individual and consolidated interim financial information taken as a whole.

The aspects related to the transfer of control upon the sale of real estate units follow the understanding of Company's management, in line with that expressed by CVM in CVM/SNC/SEP Circular Letter 02/2018 on the application of Technical Pronouncement CPC 47 /IFRS 15.

In addition, in preparing its financial statements, the Group considered the guidance provided for in Accounting Guidance OCPC 07, issued by the Accounting Pronouncements Committee (CPC) in November 2014. Accordingly, significant information inherent to the financial statements is being disclosed and corresponds to that used by management over its administration.

Real estate for sale

Expected credit losses are constituted to bring trade accounts receivable to their recovery value, based on the individual analysis of receivables. When a client becomes delinquent, since the real estate units sold are pledged as collateral for the clients' own accounts receivable, the unit's total outstanding balance is compared to the best estimate of the unit's market value and expectations about future economic conditions, minus the costs for recovery and resale. Then, an expected loss of credits is formed in cases where the total outstanding balance is greater than the net value pledged. On September 30,2026 and December 31, 2025, the Company did not identify the need for expected loss of credits on balances receivable due to the sale of real estate.

Parking, management fees and other

Considering all reasonable and sustainable information, including forward-looking information, from the initial recognition and evaluation of its receivables individually and collectively, the Company understands that the risk of credit loss expected for the accounts receivable from parking, management fee, marketing and advertising is very low, and has no history of default or losses. Thus, the Company did not identify the need for expected credit loss on the respective balances on September 30, 2026 and December 31, 2025.

8. Income tax and social contribution (Continued)

(a) Only the share of employee profit sharing was considered to calculate the deferred income tax.

(b) In consolidated, the bases of deferred assets and liabilities also comprise entities subject to the calculation of Corporate Income Tax (IRPJ) and Social Contribution on Net Income (CSLL) under the taxable profit regime whereby taxes are computed as percentage of gross revenue regime. For that reason, the effect of these tax rates includes the tax rates applied to such taxation regime, pursuant to the federal legislation, which may vary depending on the nature of the income.

(c) Goodwill on acquisition of Multishopping Empreendimentos Imobiliários S.A., Bozano Simonsen Centros Comerciais S.A. and Realejo Participações S.A. based on expected future earnings. Such companies were merged at the time and the respective goodwill was reclassified to intangible assets. Pursuant to the new accounting standards, beginning on January 1, 2009, such goodwill is no longer amortized and deferred income tax and social contribution liabilities were recognized on the difference between the tax base and the book value of the related goodwill. The amortization of goodwill was completed in November 2014 for tax purposes.

(d) The Company recorded Taxes and contribution payable on deferred taxation of straight-line income during the term of the contract, regardless of the receipt term.

(e) According to the tax criterion, the income (loss) from the sale of real estate units is calculated based on the financial realization of the revenue (cash basis); while for accounting purposes, said income (loss) is calculated based on the fulfillment of revenue recognition criteria in accordance with the accounting standards in force.

(f) The Company recognized deferred income tax and social contribution liabilities on the differences between the amounts calculated, based on the accounting method and criteria provided for in Law No. 12973 of May 13, 2014.

(g) The Company recognized deferred income tax and social contribution liabilities on the immediate tax deduction of interest on loans taken out to construct assets and recorded as the cost of its underlying asset. Deferred liabilities will be reversed as the underlying asset is realized through depreciation.

(h) The recognition of deferred tax liabilities on Business combination gains was excluded from calculations of income tax and social contribution. Taxation will only take place once the investment is made.

The Company has been adopting measures that will allow using balances of income tax and social contribution losses with consequent realization of deferred tax assets on income tax and social contribution losses, such as: (i) corporate reorganizations; (ii) operational improvements; (iii) debt renegotiations with reduced interest rates, among others.

Deferred income tax and social contribution assets will be realized based on management's expectation, as follows:

Multiplan measured its investment properties internally at fair value based on the Discounted Cash Flow (DCF) method. The Company calculated the fair value by using a discount rate following the Capital Asset Pricing Model (CAPM). Risk and return assumptions were considered based on studies published by Mr. Damodaran (Professor at New York University) relating to the stock market performance of the Company (beta), in addition to market prospects (Central Bank of Brazil - BACEN) and data on the risk premium of the domestic market (country risk).

Based on these assumptions, the Company used a nominal, unlevered weighted average discount rate of 12.96% as of September 30, 2026, resulting from a statutory discount rate of 12.82% calculated in accordance with the CAPM model and, based on internal analyses, a spread from -50 to +100 base points was added to this rate, resulting in an additional weighted average spread of 14 base points in the valuation of each mall, office towers and project.

Cost of own capital	**September 2026**	**December 2025**
Risk free rate	**3.37%**	3.37%
Market risk premium	**6.65%**	6.65%
Beta	**0.96**	0.90
Country risk	**182 b.p.**	190 b.p.
Additional spread	**14 b.p.**	13 b.p.
Cost of own capital - US$	**11.64%**	11.16%

Inflation assumptions	**September 2026**	**December 2025**
Inflation (BR) - (i)	**3.63%**	3.60%
Inflation (USA)	**2.42%**	2.31%
Cost of own capital - R$	**12.96%**	12.56%

(i) Inflation (BR) of September 30, 2026 and December 2025 refers to the average expectation of the ten-year projection of the respective cash flow.

The investment properties valuation reflects the market participant concept. Thus, the Company does not consider taxes, revenues and expenses relating to management and sales services in the discounted cash flows calculation.

10. Investment properties (Continued)

The future cash flow of the model was estimated based on the individual cash flows from malls, expansions and commercial buildings, including the Net Operating Income (NOI), recurring Key money (based only on mix changes, except for future projects), Income from Transfer fees, investments in revitalization, and construction in progress. Perpetuity was calculated considering a real growth rate of 2.0% for malls and of 0.0% for office towers.

The Company classified its investment properties in accordance with their statuses. The table below describes the amount identified for each category of property and presents the fair value of assets held by the Company:

	Individual

Total	**32,826,428**	33,484,228

No need was identified for provision for impairment of investment properties as of September 30, 2026 (book value of R$ 5,327,232 in the parent company and R$ 9,551,945 in the consolidated and recoverable value of R$ 24,923,210 in the parent company and R$ 32,826,428 in the consolidated).

Based on the inputs described above, the fair value measurement of all investment properties was classified as Level 3 (valuation techniques for which the lowest level and most significant fair value measurement information is not available).

12. Intangible assets (Continued)

The Company tests these assets for impairment on an annual basis.

Other intangible assets with defined useful life are amortized by the straight-line method based on the table above. As of September 30, 2026 and December 31,2025, the Company did not identify any impairment indicators in other intangible assets.

The impairment test for the validation of goodwill was carried out on September 30, 2026 considering the projected cash flow of malls that had goodwill at the time of their formation (cash-generating unit), basically representing the projects BarraShopping, New York City Center, MorumbiShopping, ShoppingAnáliaFranco, Ribeirão Shopping, ParkShopping Brasília, ParkShoppingBarigui, BH Shopping, DiamondMall and PátioSavassi. The main assumptions used for the preparation of this cash flow are described in Note 10. In the event of changes in the main assumptions used in determining the recoverable value of the cash-generating units, the goodwill with an indefinite useful life allocated to the cash-generating units added to the book values of investment properties (cash-generating units) would be substantially lower than their fair value, i.e., there is no evidence of impairment losses in the cash-generating units as of September 30, 2026 and December 31, 2025.

The remaining balance of provision for civil contingencies is comprised by several claims in insignificant amounts filed against the malls in which the Company holds equity interest.

Based on the assessment of lawyers and legal advisors, provision was set up to cover cash disbursements considered probable in administrative and judicial proceedings related to civil, tax and labor matters in an amount deemed sufficient by the Management.

Stock Option: This is an administrative proceeding to discuss the collection of R$ 7,413 in social security contributions related to an old stock option plan. The tax assessment notice was upheld at the lower courts. The company appealed, but the voluntary appeal was denied in June 2019, and the special appeal was not admitted by the Superior Chamber in August 2024. The subsequent motions for clarification were also rejected.
To end the dispute, the company included the debt in a tax transaction program in February 2025. In August 2025, the request for adherence to the tax transaction was granted, and the closing of the case is pending.

ISS – Rio de Janeiro: In April 2019, a tax assessment notice was served by Rio de Janeiro City Government (R$ 76,877) referring to collection of Service Tax (ISS) on certain revenues/reimbursement of expenses and other matters. The objection was presented and it was dismissed in the first instance. The Voluntary Appeal was filed. The Voluntary Appeal is awaiting judgment.

PIS – COFINS: In January 2022, a tax assessment notice was issued for the charge of PIS and COFINS (R$ 18,972), in relation to credits on rental expenses regarding the areas for exploration of parking operations. The opposition filed by the Company was granted. Judgment of the ex-officio appeal is being awaited in CARF.

Accelerated tax depreciation – PIS and COFINS credits on buildings.
Through COSIT Advance Ruling 144/2026, the Brazilian Federal Revenue Service partially recognized the possibility of applying the accelerated appropriation regime for PIS and COFINS credits on the depreciation of shopping mall buildings, but disallowed its use for areas considered predominantly intended for lease. The Company filed a special appeal for divergence at the administrative level, which was not granted suspensive effect, and filed a writ of mandamus to prevent tax consequences while the administrative appeal is pending, without anticipating the decision on the merits. The judgment of the interlocutory appeal filed against the denial of the injunction is pending.

Interest on own capital: In October 2022, the company filed a writ of mandamus seeking to ensure the deduction of past balances of Interest on own capital from the calculation base of corporate income tax (IRPJ) and social contribution on net income (CSLL). Despite the initial unfavorable decision, the company's appeal was granted in December 2023. The National Treasury appealed to the higher courts, and in March 2025, the Superior Court of Justice (STJ) denied the National Treasury's special appeal. However, following an internal appeal by the Treasury, the reporting minister reconsidered her decision in April 2025 and ordered that the case be returned to the originating court and be suspended until the judgment of **repetitive topic 1319**. This topic will establish the definitive guideline for all cases on the same matter. In November 2025, the STJ ruled in favor of taxpayers. Accordingly, the Company filed a petition in the writ of mandamus requesting adjustment to the established thesis. In March 2026, the Federal Government's special appeal was denied. Subsequently, the extraordinary appeal filed by the Federal Government before the STF was also denied, and in October 2026 the decision became final and unappealable.

Ground lease and laudemium: The company is a defendant in an annulment action filed by the Federal Government, which seeks to overturn a judgment that became final on November 20, 2018. The original decision recognized the company's and one of its subsidiaries' right to exemption from the payment of ground rent and transfer fee on the VillageMall Shopping property and adjacent land.On December 1, 2022, the Federal Regional Court of the 2nd Region upheld the annulment action. Subsequently, the company's special appeal was denied. In December 2024, divergence motions were filed, which were not admitted. Currently, an internal appeal has been filed, and the case is pending analysis. Should the rescission action become final, the Federal Government may re-discuss the matter through administrative or judicial channels. Due to the cancellation of the charges, it is not possible to precisely estimate the potential financial impact. Nevertheless, the Company estimates it at approximately R$ 12,000.

On March 31, 2023, the company filed an ordinary lawsuit against the Federal Government to fully contest charges of occupancy, transfer fees, and fine totaling R$ 38,000, issued by the Office of the Attorney General for the National Treasury on February 1, 2023, related to the BarraShopping property. The total amount was guaranteed through a surety bond. On May 12, 2023, an urgent injunction was granted to suspend the enforceability of the debts. The Federal Government presented a defense, the company replied, and the case is awaiting the issue of the judgment.

Meanwhile, the Secretariat of the Federal Government's Heritage initiated a tax enforcement action for R$ 30,700 to collect part of the debts that are the subject of the ordinary lawsuit. The company filed a petition and obtained a favorable decision to suspend the tax enforcement, due to the suspension of enforceability already determined in the ordinary lawsuit.

i) *Fair value measurement*

The weighted average fair value of the Restricted Shares was estimated according to the market price of each tranche on the grant date and discounted from the expectation of future dividends which the elected participants will not be entitled to receive during the vesting period. The expectation of future dividends was based on Company's internal models for maturity dates of each tranche of the Restricted Share plan.

Fair value on the grant date was calculated considering the following assumptions:

	Fair value on the grant date				
	Grant date	**Reference value (R$) (1)**	**Number of units granted**	**Expectation of future dividends (2)**	**Fair value (3)**
Plan 3	10/15/2020	R$ 21.20	2,329,000	(R$ 1.99)	R$ 19.21
Plan 4	12/02/2021	R$ 20.04	2,188,000	(R$ 2.52)	R$ 17.52
Plan 5	02/27/2023	R$ 25.10	2,172,500	(R$ 1.63)	R$ 23.47
Plan 6	02/02/2024	R$ 27.26	2,244,500	(R$ 1.81)	R$ 25.45
Plan 7	04/17/2025	R$ 24.14	2,477,000	(R$ 2.05)	R$ 22.09
Plan 8	04/22/2026	R$ 33.67	2,559,000	(R$ 2.05)	R$ 31.62

(1) The reference value of Restricted Shares on the grant date corresponds to the closing price of Company's shares on BM&FBOVESPA on the trading floor on the grant date.

(2) The expectation of future dividends is the weighted average of the annual expectation of dividends according to the Company's internal models for the grace periods of each installment.

(3) The average fair value is the result of the weighted average fair value of each tranche of the program.

ii) *Vesting conditions*

The number of units granted on the grant date was adjusted to reflect potential losses and cancelations of Restricted Shares resulting from vesting conditions, according to the Company's history.

The net value of cancelations was calculated considering the assumptions listed below:

	Vesting conditions on grant date			
	Grant date	**Number of units granted**	**Cancelation rate (1)**	**Number of units granted considered after cancelations**
Plan 3	10/15/2020	2,329,000	-5.79%	2,194,130
Plan 4	12/02/2021	2,188,000	-5.79%	2,061,295
Plan 5	02/27/2023	2,172,500	-5.79%	2,046,693
Plan 6	02/02/2024	2,244,500	-5.79%	2,114,523
Plan 7	04/17/2025	2,477,000	-5.79%	2,333,560
Plan 8	04/22/2026	2,559,000	-5.79%	2,410,811

(1) The cancelation rate was calculated in accordance with the losses and cancelations of the eight stock option plans (equity settled) granted between December 20, 2007 and April 16, 2014.

24. Segment information

For managerial purposes, the Company recognizes four business segments (described below) that account for its revenues and expenses. Segment reporting is required since margins, revenue and expense recognition and deliverables are different among them. Income or loss was calculated considering only the Company's external clients.

a) Properties for lease

This refers to the Company's share in the civil condominium of malls and their respective parking, as well as office towers for lease. This is the Company's major revenue-generating segment, accounting for 68.07% of its total gross revenue for the period ended September 30, 2026. The determining factor for the amount of revenue and expenses in this segment is the Company's share in each venture. Its revenues and expenses are described below:

Lease revenue

This refers to amounts collected by mall owners (the Company and its shareholders) in connection with the areas leased in their malls and office towers projects. The revenue includes four types of rent: base rent (based on a commercial agreement indexed to the IGP-DI), overage rent (percentage of sales made by tenants), merchandising (lease of an area in the mall) and straight-line effects (excludes the volatility and seasonality of minimum lease revenue).

Parking revenues

Revenue from payments made by clients for the time their vehicles are parked in the parking lot.

Expenses

They include expenses on vacant areas, contributions to the promotion fund, legal fees, lease, parking, brokerage fees, and other expenses arising from the interest held in the venture.

As owners of the properties where the malls in which the Company holds interest are located (or cases in which the ownership of the property stems from the lease agreement), the Company is subject to the payment of any additional expenses that are not related to the routine and, therefore, are under the condominium's responsibility. The Company is also subject to expenses and costs arising from legal actions necessary for the collection of past due leases, lawsuits in general (eviction, lease renewal or review, among others). Tenants are responsible for the project's maintenance and operating expenses (common condominium expenses).

24. Segment information (Continued)

a) Properties for lease (Continued)

Other

Depreciation expenses are included.

The mall assets substantially comprise investment properties of operational malls and office towers, and lease and parking revenue receivable.

b) Real Estate for Sale

Real Estate operations include revenues, cost of properties sold and expenses from the sale of properties normally developed in the surrounding areas of the malls. As previously mentioned, this activity contributes to generating client flows to the malls, thus increasing their income. Additionally, the appreciation and convenience brought by a mall to its neighborhood enable the Company to minimize risks and increase revenue from properties sold. Revenues derive from the sale of real estate and their related construction costs. Both are recognized based on the percentage of completion (POC) of the construction work. Expenses arise mainly from brokerage and marketing activities.

Lastly, “Other” mainly refers to a real estate project that has been recognized in the balance sheet and statements of income under “Investment” and “Equity in net income of subsidiaries” captions, respectively.

Assets in this segment are concentrated in the Company’s inventory of land and properties completed and under construction and in accounts receivable.

c) Projects

The operation of projects includes revenues and expenses arising from the development of malls’ and office towers’ project for lease. Development costs are recorded in the balance sheet, but expenses with marketing, brokerage, property taxes (IPTU), feasibility studies and other items are recorded in the Company’s statement of income. Likewise, the Company understands that most of its revenue from Key money derives from projects started in the last five years (average period to recognize the revenue from key money); thus, resulting from the lease of stores during the construction process.

By developing its own projects, the Company is able to ensure the quality of ventures in which the interest will be held in the future.

Project assets mainly comprise investment properties under construction and accounts receivable (Key money) from leased stores.

24. Segment information (Continued)

d) Management and other

The Company provides management services to its shareholders and tenants in consideration for a service fee. Additionally, the Company charges brokerage fees from its shareholders for the lease of stores. Management of its malls is essential for the Company's success and is a major area of concern in the Company. Conversely, the Company incurs expenses at the Headquarters for these services and others, which are considered solely in this segment. This also includes taxes, financial revenues, expenses, other revenues and expenses that depend on the Company's structure rather than the operation of each segment previously described. Therefore, this segment presents loss.

This segment's assets mainly comprise the Company's cash, deferred taxes and intangible assets.

25. Financial instruments and risk management

The Company's main financial liabilities refer to loans and financing, trade accounts payable and other accounts payable. The main purpose of these financial liabilities is to finance the Company's operations. The Company's main financial assets include accounts receivable, cash and cash equivalents and interest earning bank deposits resulting directly from its operations.

The Company is exposed to capital and market risks (such as financial credit risk and service risk, interest rate risk and liquidity risk). Company's management oversees the management of these risks by assessing and managing them in accordance with the Company's policies. The Company does not participate in the trading of derivatives for speculative purposes.

25.1. Capital risk management

The Company and its subsidiaries manage their capital to continue as a going concern, while maximizing the return of their operations to all stakeholders through the optimization of the use of debt and equity instruments.

The capital structure of the Company and its subsidiaries comprises net debt (loans and financing, debentures and property acquisition obligations) (detailed in Notes 13 and 15, respectively), less cash and cash equivalents and interest earning bank deposits (detailed in Note 3), and the Company's shareholders' equity (which includes the paid-in capital and reserves, as explained in Note 19).

Debt-to-equity ratio is as follows:

	09/30/2026		**12/31/2025**	
	Individual	**Consolidated**	**Individual**	**Consolidated**
Gross debt (a)	**5,303,927**	**5,371,393**	5,364,594	5,439,999

Net debt	**4,677,655**	**4,444,819**	4,978,783	4,668,136
Shareholders' equity	**6,935,504**	**6,966,370**	6,268,207	6,299,379
Net debt-to-equity ratio	**67.45%**	**63.80%**	81.06%	74.10%

(a) Gross debt is defined as loans and financing and debentures, current and non-current, as detailed in Notes 13and 15.

Out of the total gross debt defined in item (a) above, R$ 405,129 refers to the amount classified in the individual financial statements and maturing on a short-term basis as of September 30, 2026 (R$ 715,015 as of December 31, 2025) and R$ 4,898,798 classified as non-current at September 30, 2026 (R$ 4,649,579 as of December 31, 2025). In the consolidated financial statements, as of September 30, 2026, R$ 418,180 is classified as current (R$ 727,136 as of December 31, 2025) and R$ 4,953,213 as non-current as of September 30, 2026 (R$ 4,712,863 as of December 31, 2025).

25. Financial instruments and risk management (Continued)

25.2. Market risk management

In the industry in which the Company operates, the main market risks are financial risks related to interest rate, credit risk inherent in the provision of services, and credit risk derived from Interest earning bank deposits.

The Company's main strategies to hedge its shareholders' equity against market risks are as follows: (a) significant compatibility between its financial assets and liabilities, aligning time, cost, indexes, currencies and other items; (b) the diversification of its revenues and receivables among the different properties of the Company and the different retail segments derived from the assortment of stores; (c) the application of liquidity on a conservative basis in investments with immediate liquidity and low credit risk.

Based on its strategy to hedge its shareholders' equity against market risks, the Company understands that, to date, there has been no need to contract any hedging instrument. This position may be reviewed in the future if the Company identifies any inconsistency that could cause risks to its financial revenues (expenses) and operating revenues (expenses).

25.2.1. Interest rate risk management

Interest rate risk refers to:

- Possibility of fluctuations in the fair value of loans and financing pegged to fixed interest rates if such rates do not reflect current market conditions. The Company monitors these indexes on an ongoing basis. The Company has not yet identified the need to take out financial instruments to hedge against interest rate risks;
- Possibility of unfavorable change in interest rates, which would result in increase in financial expenses as a result of the debt portion pegged to variable interest rate; and
- Possibility of changes in the fair value of its investment properties due to effects of interest rate changes on the risk indicators and return used to calculate the discount rate, including beta index, country risk and inflation estimates. The Company monitors these indexes on an ongoing basis.

25. Financial instruments and risk management (Continued)

25.2. Market risk management (Continued)

25.2.2. Liquidity risk

This risk is related to the possibility of the Company and its subsidiaries posting losses resulting from difficulties in collecting amounts from lease, property sales, key money, management and brokerage fees.

25.2.3. Financial credit risk

The risk is associated with the possibility that the Company and its subsidiaries incur losses resulting from interference or influence in the management of the funds' portfolios. To mitigate these risks, the Company and its subsidiaries seek to make investments in funds managed by first-rate institutions, as mentioned in Note 3.

25.2.4. Sensitivity analysis

To analyze the sensitivity of financial asset and liability indexes to which the Company is exposed as of September 30, 2026, five different scenarios were defined and a sensitivity analysis of index fluctuations of such instruments was prepared. As of September 25, 2026, the IPCA index projection was extracted from the FOCUS Report, the IGP-DI and IGP-M index was extracted from FGV's official website, the CDI index was extracted from CETIP's official website, and the reference rate (TR) was extracted from BM&F BOVESPA official website for 2026. Such indexes and rates were considered as a probable scenario and 25% and 50% decreases and increases were calculated.

Indexes of financial assets and liabilities

Index	50% decrease	25% decrease	Probable scenario	25% increase	50% increase
CDI	6.52%	9.78%	13.04%	16.30%	19.56%
IGP-DI	0.52%	0.77%	1.03%	1.29%	1.55%
IGP - M	1.67%	2.51%	3.34%	4.18%	5.01%
IPCA	2.50%	3.74%	4.99%	6.24%	7.49%
TR	0.94%	1.40%	1.87%	2.34%	2.81%

Financial assets

Gross revenue was calculated for each scenario as of September 30, 2026, based on one-year projection and not taking into consideration any tax levied on income. The sensitivity of indexes for each scenario was analyzed.

Part of the Company's financial assets and liabilities are pegged to interest rates and indexes that may vary, which represents a market risk for the Company.

In the period ended September 30, 2026, the Company's financial assets and liabilities generated net financial expenses amounting to R$ 426,225 (R$ 388,595 as of September 30, 2025).

The Company understands that an increase in interest rates, indexes, or in both may cause an increase in financial expenses, negatively impacting the Company's net financial revenues (expenses). Likewise, a decrease in interest rates, indexes, or in both may cause a decrease in financial revenues, adversely impacting the Company's net financial revenues.

25.2.5. Liquidity risk management

The Management of the Company and its subsidiaries manages liquidity risk by keeping adequate reserves, bank credit and credit facilities to raise loans and financing through the ongoing monitoring of forecasted and realized cash flows and combination of the maturity profiles of financial assets and liabilities.

The following table shows, in detail, the Company's remaining contractual maturity of financial liabilities and the contractual amortization terms. This table has been prepared in accordance with the undiscounted cash flows from financial liabilities based on the nearest date on which the Company shall settle the respective obligations:

The Company established a control structure related to fair value measurement. This includes an assessment and review of all significant fair value measurements, including their tier rating between 1, 2 and 3.

When measuring the fair value of an asset or liability, the Company uses observable market data as much as possible. Fair values are classified into different levels in a hierarchy based on the information (inputs) used in valuation techniques as follows:

- Level 1: quoted (unadjusted) prices in active markets for identical assets and liabilities;

- Level 2: inputs, except quoted prices included in level 1, that are observable for the asset or liability, directly (prices) or indirectly (derived from prices);

- Level 3: inputs, for the asset or liability, that are not based on observable market data (non-observable inputs).

The Company concluded that the classification of its assets and liabilities are classified as level 1.

Valuation techniques and assumptions applied for fair value calculation purposes

The estimated fair values of financial assets and liabilities of the Company and its subsidiaries have been determined using available market information and appropriate valuation methodologies in conformity with the quarterly information for the period ended September 30, 2026.

According to the corresponding observable level of fair value, financial instruments measured at fair value after initial recognition are grouped into specific categories (levels 1, 2 and 3):

- Measurements of level 1 fair value are obtained from quoted (unadjusted) prices in active markets for identical assets or liabilities.
- Measurements of level 2 fair value are obtained by means of variables other than the quoted prices included in level 1, which are observable for the asset or liability either directly (as prices) or indirectly (derived from prices).
- Measurements of level 3 fair value are obtained from non-observable market variables.

Management understands that the fair values applicable to the Company's financial instruments fall into Level 2.
