## Management Highlights

We began 2025 excited about what we built in the last cycle and convinced that we are on the right path to achieving stabilization and resuming growth in our beneficiary base. Additionally, aligned with a sustainable and enduring business model that allows for this achievement with high profitability and strong cash generation, as we have seen in this and recent quarters.

With the key indicators delivered for the turnaround successful execution, in the operational efficiency, commercial realignment, and capital allocation segments, we remain focused on building a robust portfolio that, with the appropriate underwriting process, begins to direct towards products with more attractive prices, making us more competitive in our segment.

In 1Q25, Quali achieved net revenue of R\$371.1 million (-3.5% vs Q4 2024), with Adjusted EBITDA – CAC of R\$118.3 million and a margin of 31.9% (+12.5% and +4.5 p.p. vs Q4 2024).

We keep demonstrating strong cash generation capacity, where, as in recent quarters, we were able to generate recurring free operational cash flow, before debts (principal and interest) and dividends, of R\$142.3 million in 1Q25, following a healthy financial deleveraging trajectory and reaching 1.34x Net Debt/Adjusted EBITDA LTM, improving by 0.09x this quarter.

Throughout 2025, we will continue to seek to create value for all our stakeholders: beneficiaries, entities, operators, and distribution channels, as well as generate adequate returns for our shareholders, supported by a renewed organizational culture aimed at quality sales with profitability.

Quali ended 1Q25 with a total portfolio of 1.5 million members, which is 5.8% lower compared to the previous quarter.

### Managed Portfolio

During the quarter, there was a 7.4% decrease compared to 4Q24 in the Affinity Managed Portfolio segment, with a net negative variation of 47.2 thousand members, closing the quarter with 591.9 thousand members. This movement is due to the seasonality of the quarter and the loss of a non-profitable portfolio for Quali, which, despite impacting the members base, generates a positive impact on our margin. The total churn for the quarter thus reached 12.5%. Excluding this one-time effect, we continue the churn trend of recent quarters, reaching an organic churn of 9.0% in 1Q25, which would be better by 2.0 p.p. compared to 4Q24.

<sup>1</sup>Churn calculated based on the number of exits relative to the total number of lives at the beginning of the period.

In the Other Affinity Portfolio, composed of massified plans (mainly dental), we had a net reduction of 14.1 thousand members in 1Q25 (0.2% lower vs 4Q24).

We have made progress in our Turnaround, where we are confident that our product offering capacity is at healthy levels and our retention process is efficient. However, we see opportunities to work on the levels of commissioning and underwriting to reach the stabilization point.

## Corporate, SME and Gama

Our traditional Corporate segment portfolio, which represents 1.6% of Net Revenue, ended the quarter with 147.8 thousand members, showing a decrease of 13.8% compared to 4Q24 due to the loss of small portfolios. Meanwhile, our SME plans portfolio showed a reduction of 0.2% compared to the previous quarter. Additionally, the Gama portfolio, our health management business, showed a decrease of 1.7% compared to 4Q24, ending the quarter with 448.8 thousand members.

## Operational data

This quarter stands out for improvements in customer service, as we achieved a "good" rating on *Reclame Aqui*, an 18.9% improvement compared to 4Q24 in the *Reclame Aqui* Solution index, becoming sector reference as demonstrated in the graph below.

## New products

At the end of 1Q25, we introduced new products to enhance our portfolio and attract new members. Additionally, Quali has secured exclusive distribution rights for two payors. This partnership underscores our commitment to providing high-quality products, catering to the entire addressable market. Our goal is to be the best solution for meeting individual needs, whether through Affinity, SME, or Corporate plans, and at any stage of life when it comes to health insurance.

At the end of the quarter, gross revenue was R\$402.0 million, 3.6% lower vs. 4Q24. Affinity revenue decreased by 3.5% vs. 4Q24, totaling R\$367.9 million, due to slower sales during the quarter, explained by the seasonality of lower sales in the first quarter due to holidays and Carnival, as well as increased market competition this period.

The revenues related to administrative and brokerage fees (loading revenue), which are recurring, was R\$ 358.0 million in 1Q25, relatively stable compared to 4Q24 (R\$ 360.5 million), despite the reduction in the number of members, we managed to mitigate the effects of this decline through adjustments and improved take rates. On the other hand, due to the slowdown in 1Q25 sales, revenue from acquiring new beneficiaries, known as agency fees, decreased by 53.2%. In Others Affinity, which includes massified plans (mainly dental), the quarter gross revenue was R\$1.6 million, increasing by 3.3% vs. 4Q24

The combined gross revenue of other segments showed a decrease of 5.2% vs. 4Q24, the Corporate segment decreased by 4.5% due to a portfolio reduction, while Gama segment had 8.5% decreased compared to the previous quarter due to some client loss. SME segment increased by 7.1% compared to the previous quarter, explained by an agency fee increase for these portfolios during this period.

Note: SG&A expenses without depreciation and amortization.

For a better understanding of the variations analysis, we present Quali's cost and expenses in two main groups: fixed (Personnel, third-Party Services, Occupancy, Marketing, and Other SG&A) and Variable expenses (Commissions & Transfers, Bad Debt Provision and Other Operational Expenses), that are mostly linked to the invoiced premium and not directly to our net revenue. Additionally, to keep historical comparability, we have also kept the traditional breakdown by nature and by accounting group.

The total consolidated costs and expenses was R\$22.7 million better compared to 4Q24, presenting decrease of 8.6%.

Note: Managerial classification of COGS, SG&A, contingencies, Bad Debt and Others, considering adjust. to EBITDA

Fixed expenses this quarter kept the downward trend observed in recent periods (-5.3% vs. 4Q24), reaching R\$108.2 million, which is equivalent to 29.2% of net revenue (-0.4 p.p. vs. 4Q24). This improvement is directly related to the first phase of our turnaround process, focused on operational efficiency, where we have seen gains across almost all accounts in this group.

For a better understanding of the second group, variable expenses, it is important to segment them into two categories: (i) those we can directly influence through our turnaround process, and (ii) those related to changes in the market environment and operational variables of the business.

In the first category, we have demonstrated significant improvements, especially in expenses related to transfers and commissions, which decreased by 19.3% compared to 4Q24.

In the second category, the highlights are mainly related to Contingencies, Bad Debt Provision, and Other Operational Expenses. In the Bad Debt Provision and Other Operational lines, we still experienced impacts related to operational issues reported at the end of 2023. In the second half of last year, we identified that co-payments from previous periods had not been collected. We proceeded with the collection, but the return was less effective due to timing mismatches.

It created a specific impact this quarter, which may continue into the next. On the other hand, despite a 64.6% decrease in Contingencies and Legal Expenses, the levels of legal proceedings remain high, reflecting only a reduction in provisions without apparent risk. Therefore, we maintain a conservative view on this matter.

Note: CAC refers to organic investments in commissions (cash), as shown in the managerial cash flow.

Adjusted EBITDA was R\$146.4 million in 1Q25, 5.6% higher compared to 4Q24, with an adjusted EBITDA margin of 39.5%, an increase of 3.4 p.p. compared to the previous quarter. The non-recurring effect this quarter was practically nil, but still related to the operational efficiency gains we have been tracking in recent quarters.

We continue to highlight the view of Adjusted EBITDA after organic CAC (cash view), which has been used by our management for a better understanding of the company's operational results, as it considers the amounts disbursed for commissions on organic sales during the period (CAC), which are accounted for as investments (CapEx).

In the quarter, Adjusted EBITDA – CAC was R\$118.3 million, 12.5% higher compared to 4Q24, with an increase of 4.5 p.p. compared to the previous quarter. As shown in the following graph, we can see the evolution of margins and investment amounts in CAC, as well as margin recovery, mainly due to lower investment levels directly related to lower sales. We expect that with a sustainable sales acceleration process, Quali will resume increasing its investments in CAC in the coming quarters, returning to historical levels for this item.

Recurring free cash flow in 1Q25 was R\$ 142.3 million, temporarily benefited by approximately R\$ 20 million, due to the loss of a non-profitability portfolio, previously mentioned. Additionally, we had negative non-recurring effects R\$25.0 million in 3Q24, which were offset by positive effects in 4Q24 and 1Q25, amounting to R\$12.5 million each, related to a strategic move with the operators. Thus, after adjusting for these effects, we presented free cash flow of R\$154.8 million (+58.8% vs. 4Q24).

In 1Q25, CAC remained at low levels, for reasons already explained previously, thus achieving a reduction of 0.9 p.p. compared to 4Q24, as a proportion of net revenue, reaching 7.6% vs. 8.7% in 4Q24.

Below, we show the view of recent periods of organic CAC as a percentage of net revenue, which becomes a better parameter for monitoring the company's investment. In the recent past, before the pandemic period, we presented levels close to 15% for this indicator. However, since mid-2023, when we have been implementing the turnaround strategy, levels have reached 7.1%, maximizing capital allocation. Nevertheless, we are aware that to achieve stabilization/resumption of growth, it will be necessary to increase investments in this area, and we are acting assertively and prudently in this movement.

Capital expenditures (CapEx), including intangible and fixed assets, amounted to R\$10.6 million in 1Q25, representing 2.9% of net revenue. These investments were also impacted by expenditures related to the relocation of our headquarters, aimed at capturing efficiency gains.

As a result, we concluded this quarter with a net cash increase of R\$169.0 million, ending with a cash position plus financial investments of R\$1.062 billion, providing security and flexibility for better debt management.

- i) Highly liquid financial investments accrue interest linked to the CDI interest rate and reflect normal market conditions during the period (Note 7).

The Company's financial investment policy determines the financial institutions with which the Company and its subsidiaries may do business, and the asset allocation limits and objectives (Note 3.iii. of the parent company and consolidated financial statements for the year ended December 31, 2024).

- ii) The loans, borrowings and debentures issued by the Group accrue interest at a rate of 100% of the accumulated variation of the daily average rates for overnight interbank deposits (DI rate) considering a year of 252 business days (B3) plus a spread varying between 1.15% and 1.85% per year for debentures (Note 14).
- iii) Lease liabilities bear interest as specified in the agreement or based on the currently observable market interest rates.

### Interest rate sensitivity analysis

Changes in interest rates, e.g., CDI, may have a positive or negative effect on the parent company and consolidated financial statements as a result of an increase or decrease in the value of financial investments, cash equivalents, loans and borrowings, and debentures. At March 31, 2025, if the CDI interest rate had been higher/lower by 10% per year with all other variables held constant, the profit before tax for the period would have been higher/lower by R\$ 3,736.

### Supplementary sensitivity analysis for financial instruments

Based on the interest rate projections made by the Brazilian Central Bank, Management estimated, for the current period, future interest rates of 15.00% per year plus a spread of 1.85% to 3.50% per year, and the effect on the fair value of financial instruments:

In the probable scenario, the Company would have a net exposure of R\$ 1,179,093 at March 31, 2025, arising from the differences in the estimates of future CDI interest rates for debentures and lease liabilities plus a spread varying between 1.85% and 3.50% per year for debentures.

The same estimates of future CDI interest rates were considered for the Company's financial investments at March 31, 2025. Under the stressed possible and remote scenarios, using the same assumptions as for the probable scenario, the Company's net exposure would increase by R\$ 37,777 and R\$ 81,391, respectively, compared to the probable scenario.

## Capital management

The primary objective of the Group's capital management is to safeguard the Company's and its subsidiaries' ability to continue as a going concern while maximizing returns for shareholders and benefits for other stakeholders by maintaining an optimal capital structure.

The Group's capitalization profile consists of net debt (interest-bearing loans and borrowings, and debentures (Note 14), lease liabilities (Note 15) less cash and cash equivalents (Note 7)) plus equity (Note 19).

The Company and its subsidiaries are subject to certain leverage limits (Note 14).

Additionally, the subsidiaries Qualicorp Benefícios, Qualicorp Clube de Saúde, Uniconsult, Plural and Gama Saúde are subject to minimum funding requirements under ANS Normative Resolution 569 of December 19, 2022 which sets the required regulatory capital. Required regulatory capital is the higher of base capital and risk-based capital, both of which must be higher than adjusted equity for economic effects.

The Company's gearing ratio is as follows:

## Liquidity risk

Considering the Group's activities, liquidity risk management implies monitoring the maturities of assets and liabilities in order to have sufficient cash to meet obligations when they fall due.

The Company and its subsidiaries analyze cash flow projections and periodically review the obligations assumed and financial instruments used. The expected cash outflows for the Group's financial liabilities are as follows:

|                                                          | Consolidated                           |                           |                       |                     |                     |                  |

The amendments provide guidance to specify when a currency is exchangeable and how to determine the exchange rate when it is not. The amendments further clarify that the exchangeability of a currency must be assessed at a measurement date based on the purpose of the transaction. When a currency is not exchangeable, an entity must estimate the spot exchange rate that would faithfully reflect the prevailing economic conditions. When there are several exchange rates available, the rate to use is that at which the future cash flows

represented by the transaction or balance could have been settled if those cash flows had occurred at the measurement date.

The amendments also require disclosures to help users of financial statements to assess the financial impacts of the currency not being exchangeable, the risks to the company because the currency is not exchangeable, and the exchange rate estimation process. The amendments are effective for annual reporting periods beginning on or after January 1, 2025. The Company concluded that the amendments did not have any impacts on its financial statements.

### Standards and amendments issued but not yet effective:

- IFRS 18 *Presentation and Disclosure in Financial Statements*: The newly issued IFRS 18 standard replaces IAS 1 *Presentation of Financial Statements*, and is aimed at improving reporting of financial performance. IFRS 18 introduces new requirements to present defined subtotals in the statement of profit or loss to improve comparability, to provide disclosures on management-defined performance measures (MPMs) in the notes to the financial statements to enhance transparency, and improve aggregation and disaggregation of financial information to provide more useful information. IFRS 18 is effective for reporting periods beginning on or after January 1, 2027. The Company is currently working to identify all impacts the amendments will have on its financial statements.
- IFRS 19 *Subsidiaries without Public Accountability: Disclosures*: The new standard issued by the IASB will simplify the reporting processes and reduce the cost of preparing financial statements for eligible entities. IFRS 19 allows eligible entities to apply IFRS accounting standards with a reduced disclosure burden, while maintaining the usefulness of their financial statements for users. IFRS 19 will become effective for reporting periods beginning on or after January 1, 2027. The Company is currently working to identify all impacts the new standard will have on its financial statements.

There are no other standards, interpretations and amendments that have been issued but are not yet adopted by the Company during the interim period ended March 31, 2025 and which, in the Management's opinion, are expected to have a material impact on the Company's profit or equity disclosed for the current period.

- i) There is a difference between the time when beneficiaries pay their invoices to the Company and when the invoices paid are entered into the Company's system. This is cleared after the Company reconciles payments received against outstanding invoices.
- ii) On July 19, 2024, the Board of Directors of the Company approved a leniency agreement related to the "Paralelo 23" and "Triunfo" Operation investigations, according to the terms agreed upon with the Comptroller-General's Office (CGU) and the Attorney-General's Office (AGU), to reach a final settlement over the matters that are the subject of the agreement and the investigation conducted by the Committee.

The main obligations under the leniency agreement are as follows:

The Company must pay to the federal government approximately R\$ 43,500 for penalty and damages, which will be adjusted for inflation using the consumer price index (IPCA) until the date of signing of the agreement. The payment shall be made in twelve monthly installments adjusted based on Brazil's benchmark interest rate (Selic). In addition, the Company must make certain improvements in its integrity program that have not yet been implemented over the last years; and

The CGU and the AGU (a) must acknowledge that the Company fully cooperated with the investigation by providing relevant documents that aided in identifying other parties involved; (b) must provide certain benefits for the Company in exchange for the Company's cooperation according to the applicable legislation; and (c) commit to refrain from initiating new administrative and judicial proceedings against the Company related to issues that are the subject of the leniency agreement or arising therefrom. In this context, the Company recognized a provision of R\$ 43,500.

It was understood that the joint cooperation between the Company and its Founder would be fundamental for the successful implementation of the leniency agreement since the Founder was a shareholder and occupied a key management position in 2014, the year in which the facts under investigation occurred and had, therefore, access to information and documents of interest to the authorities. In this context, in October 2021, the Company entered into a cooperation agreement with the Founder by which they committed to cooperate with the authorities and the Founder agreed to pay half of any amount which may be owed by the Company under the leniency agreement. Accordingly, the Company recognized the amount of R\$ 21,750 of reimbursement as other financial assets (Note 9).

## 20. Long-Term Incentive Plan

The Group's Long-Term Incentive Plan (the "Plan") was approved at the Extraordinary General Meeting on March 28, 2025. The Plan aims to promote and encourage sustained performance and long-term value creation, in addition to incentivizing employee retention and loyalty. To this end, the Plan provides for the grant of restricted stock units and/or stock options, ensuring fair distribution of risks and rewards and alignment with the Company's long-term objectives. The Board of Directors has responsibility for administering the Plan as well as the authority to design and implement it. The Board has the authority to establish the general rules for restricted stock units, stock options and matching shares; establish programs and set the quantity and terms of restricted stock units and/or stock options awards; determine who is eligible to participate in the Plan and determine the eligible use of treasury shares for the Plan; define vesting schedule, lock-up periods and other restrictions; propose changes to the Plan and submit these proposals to shareholders for approval at the general meeting; define the terms and conditions of the award agreements and authorize their execution; set the terms for delivering shares to participants, including potential cash payments; and adjust and refine the Plan to ensure it effectively achieves its objectives. Under the Plan, the Company may offer a maximum of 5% of its fully diluted capital share to eligible employees.

## Stock Options

The Board of Directors can create stock option programs and determine which employees are eligible to participate in the program, the number of options granted, and other terms. The employee participation in the programs is formalized through award agreements that outline the specific terms of the award, including the number of stock options, vesting schedule, exercise period and price, lock-up period, and how options will be handled upon employee termination or leave. Eligible employees may participate in multiple stock-based compensation programs, including both stock options and restricted stock units simultaneously.

Stock options link the participant's financial gain to Company performance based on criteria set by the Board. The number of options and the exercise price can vary between different option grants. Option holders do not have shareholder rights until they exercise their options and meet all legal and regulatory requirements.

## Matching Shares

The Board of Directors can create matching programs to grant matching shares to participants who buy a certain number of shares, subject to vesting periods and other conditions. The conditions for vesting, such as lock-up period and vesting schedule, can vary from other programs of the Company. The participants do not have shareholder rights, like voting rights and dividends, until the shares are actually transferred, unless there are specific rules otherwise.

## Restricted Stock Units (RSUs)

The Company's Board of Directors can create restricted stock unit programs for eligible employees, determining the number of RSUs, and any associated restrictions and conditions. To participate in the program, the participant must sign an award agreement that specifies the number of RSUs awarded, lock-up period, vesting schedule, performance goals, and how the RSUs are treated in the event of termination of employment. The award agreements also specify that the participants will have full ownership of the shares if all the terms of the Plan, the Programs and the Agreements are satisfied, and they continue to be employed by the Company until the RSUs vest. The participants do not have shareholder rights or privileges, like voting rights and dividends, until the shares are actually transferred, unless there are specific rules otherwise.

Furthermore, eligible employees may participate in more than one program simultaneously, including restricted stock unit and stock option programs, as defined in each case. The grants are made at the discretion of the Board of Directors and are tied to the Company's performance and growth expectations.
