\\ PLANEJAMENTO ESTRATÉGICO

A cada três anos, revisitamos nosso planejamento estratégico para garantir o cumprimento de uma **visão consistente de longo prazo**

Reafirmamos o compromisso
com a estratégia que nos trouxe até aqui:

anunciamos o **projeto Gaia XII** e a **Plataforma Neos**

Estamos preparados para o **novo ciclo**

plataforma
galia

2020-2028

otimização

plataforma
neos

2026-2034

crescimento

Seguiremos investindo no que acreditamos:
embalagens sustentáveis e economia circular

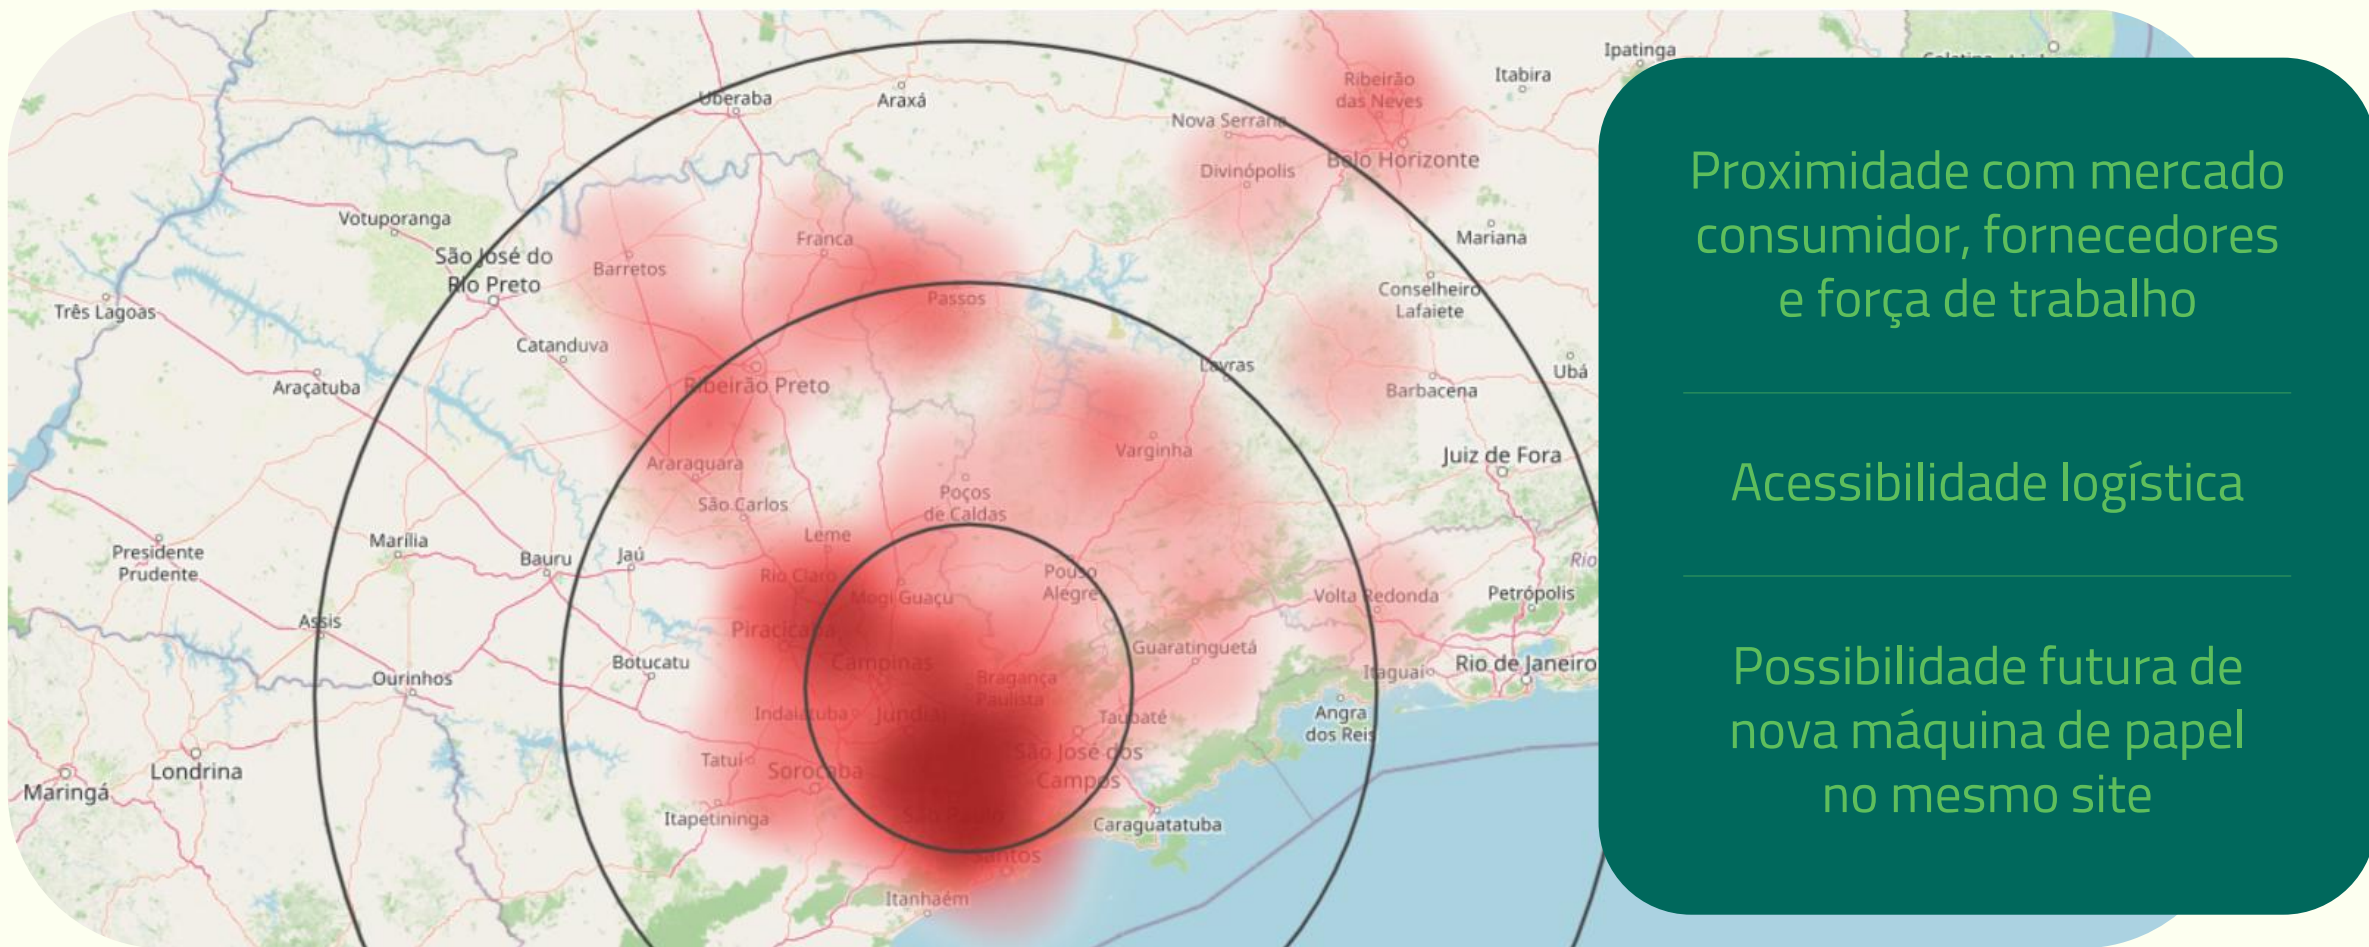

Investimento aprovado pelo CA em reunião de 27/05/2026

Conceito aprovado pelo CA em reunião de 27/05/2026
Investimentos em estudo

Disposição temporal dos projetos de Neos considera a manutenção da alavancagem abaixo de 2,50x e execução via geração de caixa e dívidas. Não considera emissão de novas ações.

¹ Originalmente a Plataforma Neos previa a ampliação florestal e da linha de celulose em SC integrada a uma nova Máquina de Papel para produção de kraftliner.

A região do Sul de MG ou Sudeste de SP oferece as condições ideais para a nossa próxima planta de papelão ondulado

Concentração da demanda de papelão ondulado

O crescimento médio histórico do mercado suporta nossa **expansão com geração de valor**

Expedição nacional de papelão ondulado (mil ton)

Nossa ambição é dobrar o *market share* para **8%** até 2034

O setor de embalagens sustentáveis tem **demanda crescente**, com *drivers* claros de sustentabilidade para o futuro

OPORTUNIDADE 1
S1 E S2

Aumento da demanda por papel e embalagens sustentáveis

Produção e exportação de alimentos, em especial proteínas animais

Demanda crescente por soluções sustentáveis para as embalagens

Crescimento do *e-commerce*

Estamos em uma indústria de capital intensivo, com **tendência de concentração no longo prazo**, com poucos vencedores

Participação de mercado dos 10 maiores players de papelão ondulado

Existem **fatores estruturantes** desafiadores que reforçam esta tendência

Capex
elevado

Ciclos longos
de execução

Capacidade
de inovação

Reforma
tributária

Retorno
sobre o
capital
investido
(juros altos)

Possuímos vantagens competitivas estruturais **difíceis de serem replicadas,** para superarmos os desafios e capturarmos as oportunidades

Plantas
modernizadas

Geração própria
de **energia renovável**

**Pessoas motivadas,
engajadas e com orgulho**

Excelência
na execução
de projetos

Florestas próprias

Foco DO Cliente
como diferencial

Acesso ao mercado de capitais

Com relações de valor, transformamos a vida das
pessoas com atitudes e soluções sustentáveis
gerando **prosperidade compartilhada**

Irani Day **2026**

Negócio Embalagem

Lindomar Lima

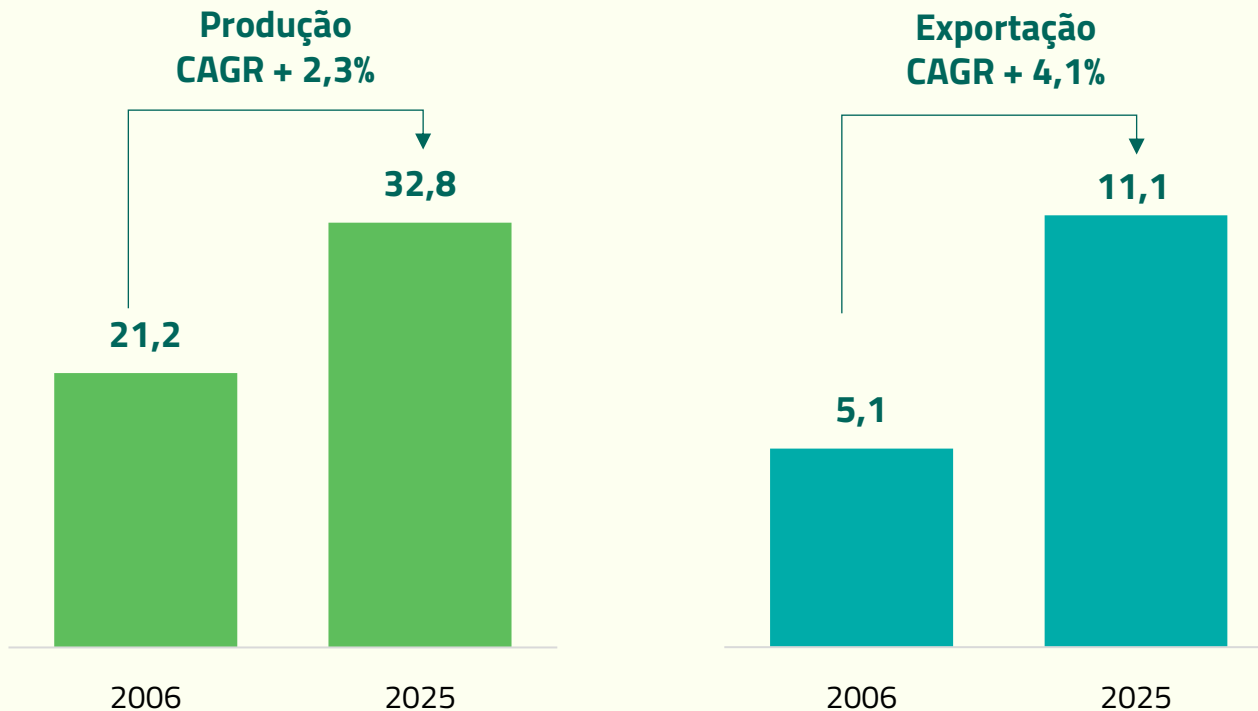

Diretor do Negócio Embalagem

RANI
B3 LISTED NM

O crescimento da produção e exportação de alimentos, especialmente proteínas animais, é um vetor relevante para a demanda por papelão ondulado

Volume brasileiro de carne bovina, suína e de frango (milhões de toneladas)

O avanço do e-commerce **cria demanda estrutural em cadeia** por embalagens de PO e reforça oportunidade de crescimento do setor

Número de pedidos *via e-commerce* no Brasil

Milhões

Fontes: Abcomm/Abiacom; Mobiloud.

Gap de 10 p.p. em relação à média global

% de penetração do e-commerce no total do varejo

O mercado de embalagens está em evolução e seguimos como **protagonistas** dessa transformação

De um insumo na
linha produtiva

Para uma
solução
completa
construída
em parceria

Nossos diferenciais competitivos nos habilitam para crescer e **duplicar nossa participação de mercado**

Foco DO Cliente

Nos posicionamos ao lado do cliente para identificar oportunidades reais

P&D com Rentabilização

Pesquisa, desenvolvimento e reengenharia que geram retorno concreto

Inteligência de Mercado

Decisões orientadas por dados, antecipando tendências e movimentos

André Carvalho

Diretor de Administração, Finanças e RI

RANI
B3 LISTED NM

Estamos **entre os IPOs de melhor desempenho** na última grande janela de emissões

Dos 62 IPOs realizados em 2020 e 2021, **apenas 15 (24%)** apresentaram **desempenho positivo...**

... e apenas 6 (10%) apresentaram **desempenho superior ao índice Ibovespa e ao CDI.**

Retorno Total ao Acionista (valorização + proventos)

De 24/07/2020 até 30/04/2026

O nosso retorno acumulado desde o Re-IPO supera amplamente o desempenho da bolsa

Combinamos dividendos e recompra de ações como instrumentos de remuneração ao acionista

Distribuição de 50% do lucro em todos os anos desde o Re-IPO

Valores em R\$ por ação

R\$ 3,21 de dividendos pagos por ação desde 2020

Proventos por ação (R\$) Dividend Yield (%)

Redução da base emitida no Re-IPO ao longo dos programas de recompra

Valores em milhões de ações

O nível de alavancagem orienta nossa **disciplina de alocação de capital** permitindo conciliar crescimento, retorno ao acionista e segurança financeira

Buscaremos manter **alavancagem em níveis saudáveis, abaixo de 2,5x**, durante e após os investimentos anunciados

Alavancagem: Dívida Líquida / EBITDA Ajustado

Payout 25%
 ↑
Política de Distribuição de Dividendos
 ↓
 Payout 50%

3,5x
 Pós-investimento
Política de Gestão Financeira
2,5x
 alvo

Alavancagem abaixo de 2,50x suportada por:

- Execução faseada de Neos
- Acesso a variadas fontes de financiamento
- Nível de *rating* elevado (AA)
- Disciplina na alocação de capital

Reduzimos o *spread* da dívida sobre o CDI, levando a uma maior geração de valor para os acionistas

Disciplina de alocação de capital aliada ao constante *liability management* = redução do Kd

Custo médio da dívida (Kd) (em CDI + % a.a.)

Modelo de negócio favorece acesso a linhas com prazo e custo diferenciados

Financiamento Gaia V

Debêntures Verdes Incentivadas - Lei 12.431

15 anos de prazo total

CDI - 1,13% a.a.¹

Financiamento Gaia XI

BNDES FINEM e Mais Inovação

20 anos de prazo total

TR + 2,70% a.a. e Selic + 1,33% a.a.

¹ Considerando swap troca de taxa da operação

Nosso retorno sustenta o **crescimento futuro**

O retorno gerado com Gaia **sustenta e garante robustez para o crescimento projetado com Neos**

Acesso a linhas de menor custo e ciclo de redução da Selic **reduzem o Kd, aumentando a geração de valor (EVA)**

Construímos uma trajetória de forte geração própria de caixa, que **sustenta nossa estratégia de crescimento aliada a dividendos**

Fontes e alocações de capital acumulados de 2020 a 2025

em R\$ milhões

1. Geração própria de caixa após impostos, capex de manutenção, capital de giro e juros.

2. Valor líquido após despesas. Captação bruta de R\$ 405 milhões.

O **crescimento orgânico** orientado pela demanda é o alicerce da geração de retorno ao acionista (TSR)

Decomposição do TSR para empresas "vencedoras" do S&P 500 (% , 2014-2024)

O principal caminho para um TSR sustentável é o **crescimento orgânico com demanda real.**

Nota: "Vencer" refere-se a estar no quartil superior do TSR de 10 anos dentro de um setor, superando o TSR médio do setor em 7 dos últimos 10 anos e fazendo isso em mais de 3 dos últimos 3 períodos móveis de 10 anos. \\ STRATEGIC PLANNING

Every three years, we revisit our strategic planning to ensure the execution of a **consistent long-term vision**

We reaffirmed our commitment to the strategy
that brought us here:

we announced **Gaia XII Project** and the **Neos Platform**

We are ready for the **new cycle**

plataforma
gaia

2020-2028

optimization

plataforma
neos

2026-2034

growth

We will continue investing in what we believe in:
sustainable packaging and the circular economy

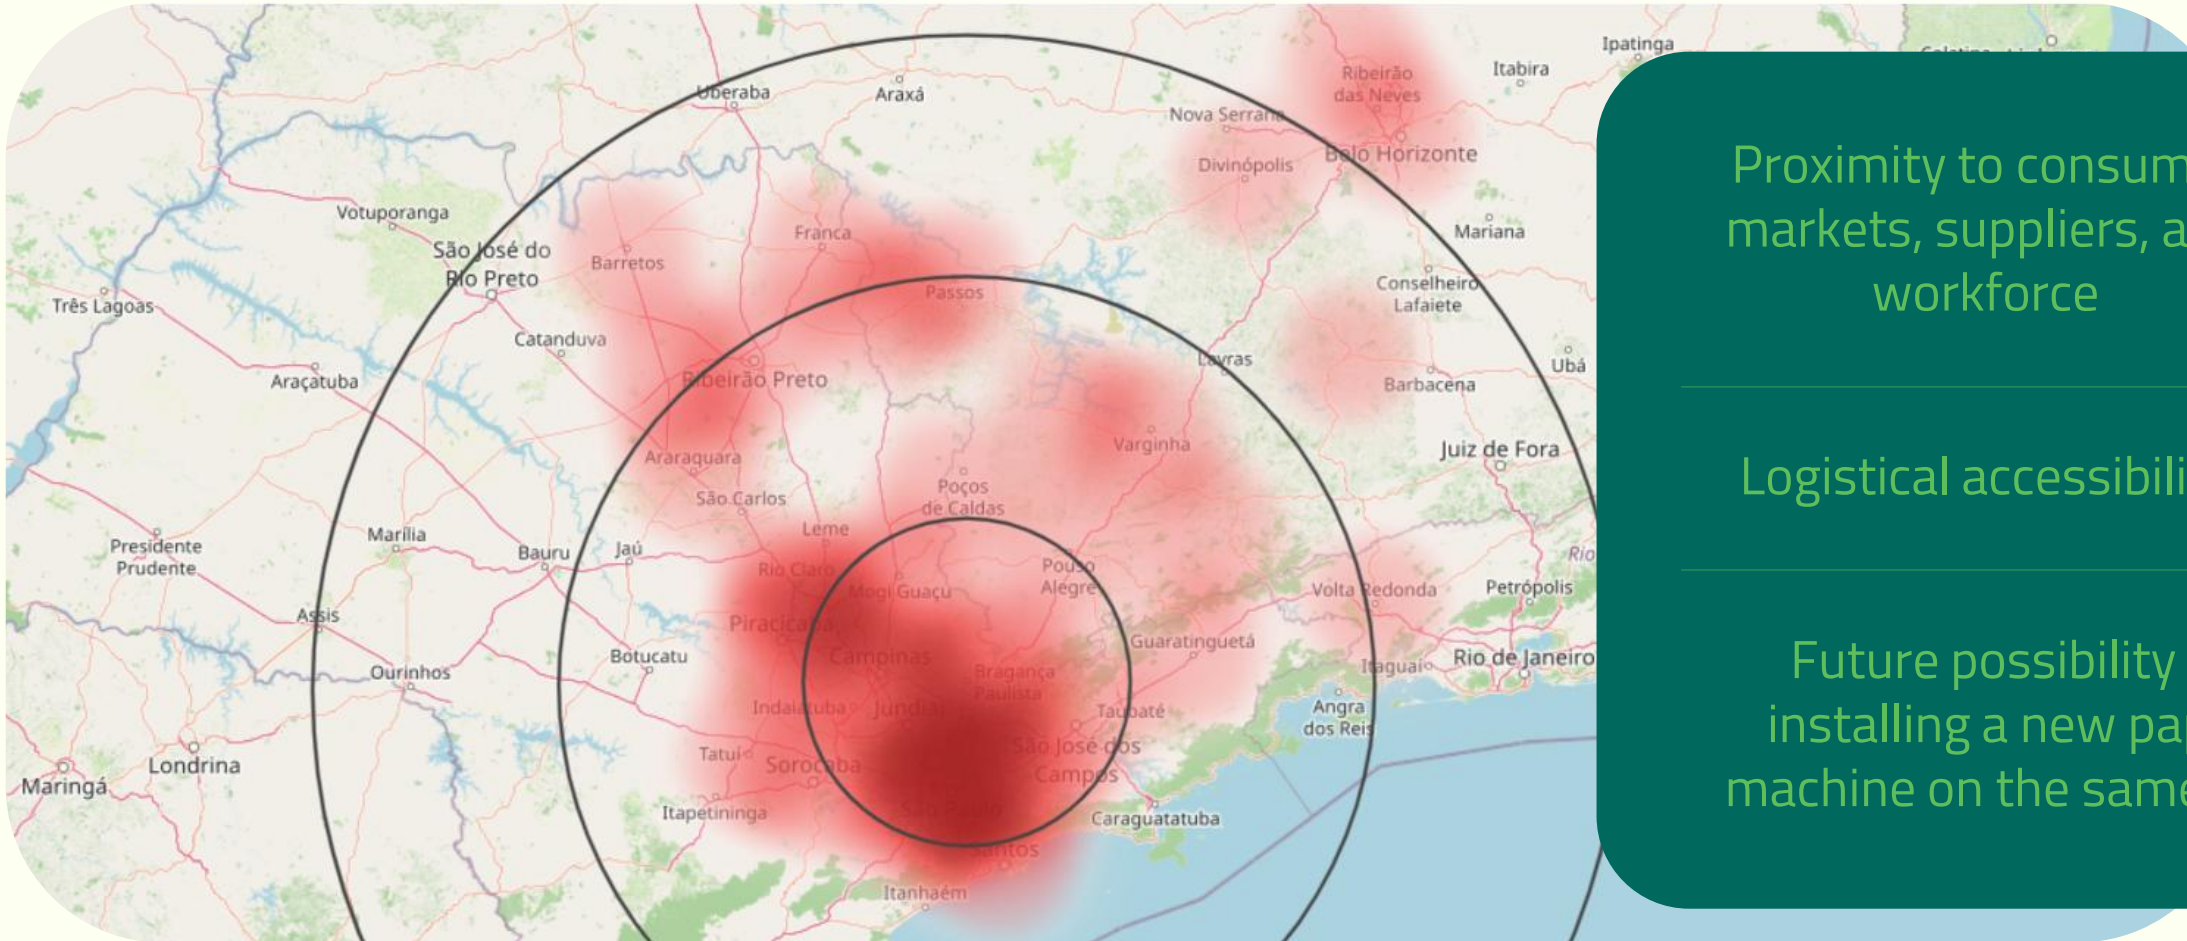

Investment approved by the Board at the meeting held on May 27, 2026

Strategic concept approved by the Board at the meeting held on May 27, 2026

The timing of Neos projects assumes maintaining leverage below 2.50x and execution through cash generation and debt. It does not consider the issuance of new shares.

¹ The Neos Platform originally included forest expansion and the pulp line in Santa Catarina, integrated with a new paper machine for kraftliner production.

The southern region of Minas Gerais or the southeastern region of São Paulo offers ideal conditions for our next corrugated packaging plant.

Proximity to consumer markets, suppliers, and workforce

Logistical accessibility

Future possibility of installing a new paper machine on the same site

■ Concentration of corrugated board demand

The historical average market growth supports our expansion with value creation

National corrugated board shipments (thousand tons)

The sustainable packaging sector has **growing demand**, with clear sustainability drivers for the future

Food production and exports, especially proteins

Growing demand for sustainable packaging solutions

Growth of e-commerce

We operate in a capital-intensive industry, with a **long-term consolidation trend** and few winners.

Market share of the 10 largest corrugated board players

There are **challenging structural factors** that reinforce this trend.

High
Capex

Long
execution
cycles

Innovation
Capacity

Brazilian
Tax System
Reform

Return on
invested capital
(high interest
rates)

We have structural competitive advantages that are **difficult to replicate**, enabling us to overcome challenges and capture opportunities

Modernized
plants

Own renewable
energy generation

Motivated, engaged,
and proud people

Excellence
in project
execution

Owned forests

Customer-Centric
Approach as a
differentiator

Access to capital markets

Through value-driven relationships, we transform people's lives with sustainable attitudes and solutions, creating **shared prosperity**

Irani Day 2026

Packaging Business

Lindomar Lima

Packaging Business Officer

RANI
B3 LISTED NM

The growth in food production and exports, especially meat proteins, is a significant **driver of demand for corrugated cardboard**

Brazilian volumes of beef, pork, and chicken (millions of tons)

The growth of e-commerce **creates structural demand throughout the supply chain** for CC packaging and reinforces growth opportunities for the sector.

Number of orders via e-commerce in Brazil

million

Source: Abcomm/Abiacom; Mobiloud;

A gap of 10 percentage points compared to the global average

Percentage of e-commerce penetration in total retail

The packaging market is evolving, and we continue to be **key players** in this transformation.

RANI
B3 LISTED NM

Historically, we have grown at a **rate higher** than the market

Our paper portfolio serves different market applications and demands

Planted Forests

OCC Recycling

Papers with weights from 30 to 200 g/m²

Flexible Paper
104 thousand tons
in 2025

Certificates for **safe contact** with food used in **baking**.

With **structure** and **strength suitable** for delivery bags and retail shopping bags.

Rigid Paper
213 thousand tons
in 2025

High-performance papers for **conversion into corrugated board**.

We offer complete solutions that generate value for the client and strengthen **lasting partnerships**

R&D

Innovation and continuous development in partnership with our client.

We offer complete solutions that generate value for the client and strengthen **lasting partnerships**

R&D

Innovation and continuous development in partnership with our client.

Quality and performance

High technical performance generating perceived value.

Customer focus

We position ourselves alongside the client to identify real opportunities.

Strong alliances

Stable trade policy and reliable supply.

And customer feedback confirms the strength of our relationships and the consistency of the Irani experience.

Irani Day 2026

Gaia XII – Paper MG Expansion

RANI
B3 LISTED NM

The paper produced on **PM#7**, a paper machine at the MG unit, is destined for SP Packaging Unit.

PM#7 was launched in 1980

The Papel MG unit was acquired by Irani in 2013

The quality of the paper produced directly affects the performance of the Indaiatuba Unit

Discipline in capital allocation to maximize efficiency and return

4 FINANCIAL RETURN

Rate of Return (IRR)
above the Cost of Capital (WACC)

3 SUSTAINABILITY

Increase in OCC recycling

Reduction in specific water and wastewater consumption

Reduction of CO₂e emissions

2 EFFICIENCY

Increase in production

Reducing the cost of steam and energy

Improvement in paper quality

Performance gains on cardboard

1 INVESTMENTS

Gross Capex
BRL 514 mi

Net Capex
BRL 453 mi

Replacement of the natural gas boiler with biomass: one of the most important steps in our **Decarbonization Plan**

OPPORTUNITY 3
S1 E S2

Self-sufficiency in renewable electricity generation

Project with potential eligibility under carbon credit generation methodology.

Current vs. future boiler emissions

tons CO₂e /year

Note: boiler image for illustrative purposes.

New level of **productivity and quality** in the papers produced

Irani Day **2026**

Generating **differentiated** economic **value**

André Carvalho

Chief Administrative, Financial and
Investor Relations Officer

RANI
B3 LISTED NM

We are among the best-performing IPOs from the last major issuance window

Of the 62 IPOs carried out in 2020 and 2021, **only 15 (24%) delivered positive performance...**

...and only 6 (10%) outperformed both the Ibovespa Index and CDI

Total Shareholder Return (share price appreciation + shareholder remuneration)

From 24/07/2020 to 30/04/2026

Our cumulative return since the Re-IPO has significantly outperformed the stock market

Note: Of the 75 IPOs carried out during the period, 13 were no longer listed on the stock exchange as of the analysis date, resulting in 62 companies considered in the calculation. Analysis reference date: April 30, 2026.

We combine dividends and share buybacks as shareholder remuneration instruments

Distribution of 50% of net income in every year since the Re-IPO

Amounts in BRL per share

BRL 3.21 in dividends paid per share since 2020

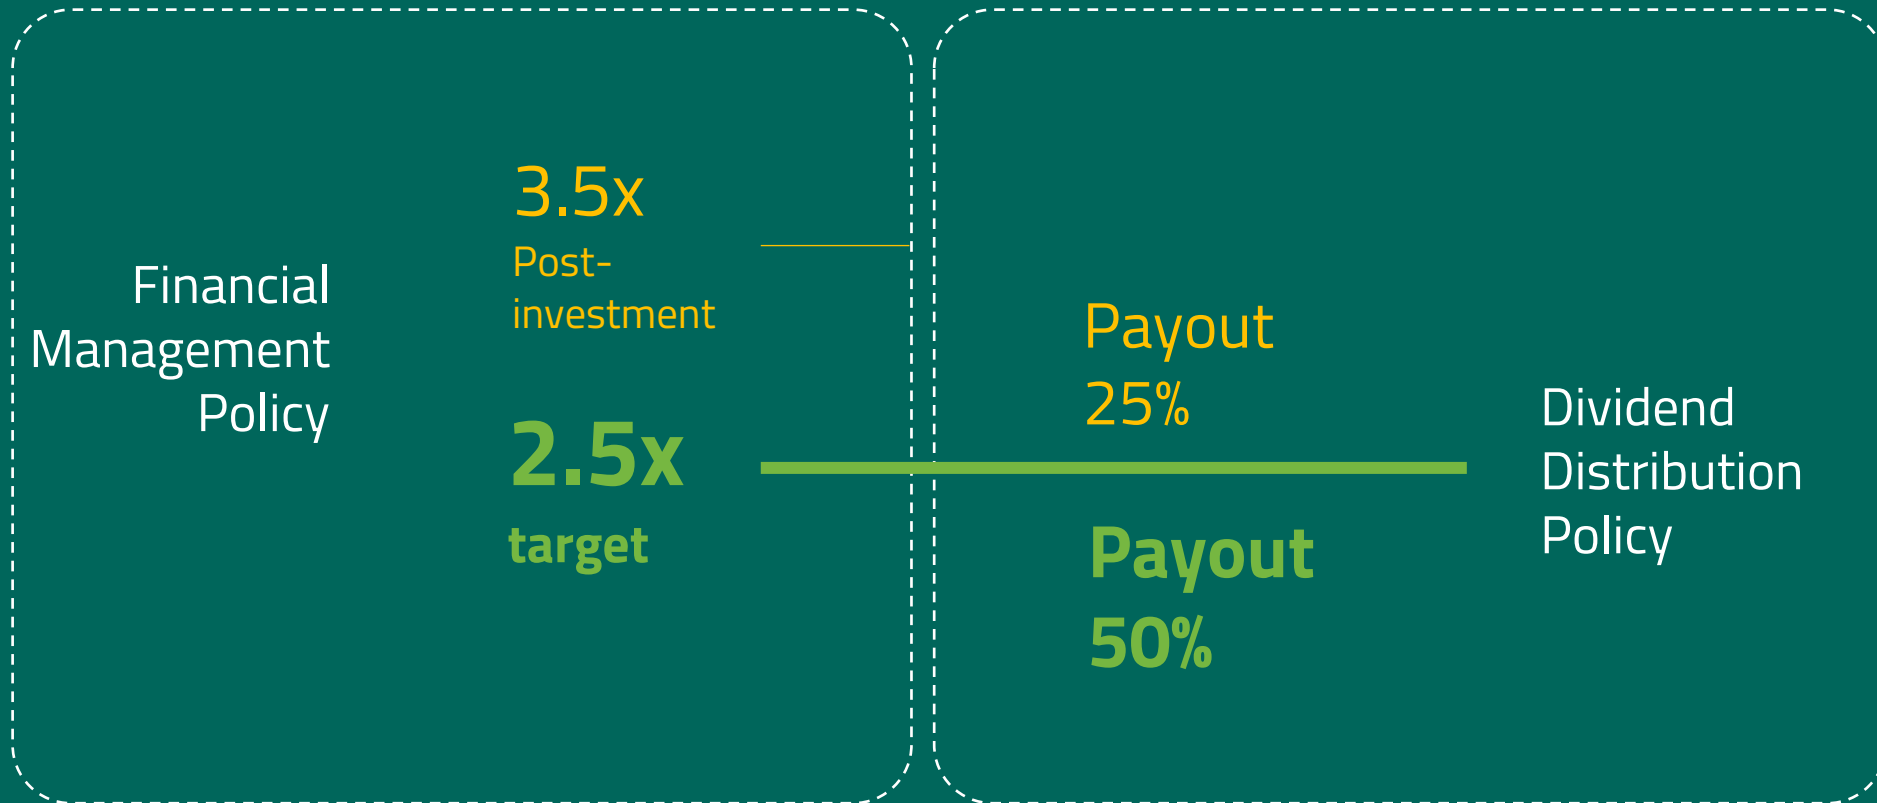

Shareholder Remuneration per Share (BRL) Dividend Yield (%)

Reduction of the share base issued at the Re-IPO through the buyback programs

Amounts in millions of shares

The leverage level guides our **capital allocation discipline** enabling the balance between growth, shareholder returns, and financial strength

We intend to maintain **leverage at healthy levels**, below 2.5x, during and after the announced investments

Leverage: Net Debt / Adjusted EBITDA

Payout 25% ↑
Dividend Distribution Policy
 ↓ Payout 50%

Financial Management Policy

3.5x Post-investment
 2.5x Target

Leverage below 2.50x supported by:

- Phased execution of Neos
- Access to multiple funding sources
- High credit rating level (AA)
- Capital allocation discipline

We reduced the debt spread over CDI, leading to greater value generation for shareholders

Capital allocation discipline combined with continuous liability management = lower Kd

Average Cost of Debt (Kd) (CDI + % p.y.)

The business model supports access to funding lines with differentiated terms and costs

Gaia V Financing

Incentivized Green Debentures – Law No. 12,431

15-year total term

CDI – 1.13% p.y.¹

Gaia XI Financing

BNDES FINEM and More Innovation

20-year total term

TR + 2.70% p.y. and Selic + 1.33% p.y.

¹ Considering the swap rate conversion of the transaction

Our returns support future growth

The returns generated by Gaia **support and provide a solid foundation for the projected growth with Neos**

Access to lower-cost funding lines and the Selic **rate reduction cycle reduce Kd, increasing value generation (EVA)**

ROIC: Adjusted Operating Cash Flow / Adjusted Invested Capital.

Average Cost of Debt LTM (Kd) after Income Tax and Social Contribution on Net Income (IR/CSLL): LTM interest divided by the average gross debt over the last four quarters, net of 34% IR/CSLL.

Includes capitalized interest and guarantees related to the financing of investments under the Gaia Platform.

We have built a strong track record of cash generation,
 growth strategy combined with dividend distribution

Sources and allocations of accumulated capital from 2020 to 2025
 in BRL million

1. Free cash flow generation after taxes, maintenance Capex, working capital, and interest.
 2. Net proceeds after expenses. Gross proceeds of BRL 405 million..

Organic growth driven by demand is the foundation of shareholder return generation (TSR)

TSR Breakdown for "Winning" S&P 500 Companies (% , 2014–2024)

The main path to sustainable TSR is **organic growth driven by real demand.**

Note: "Winning" refers to being in the top quartile of 10-year TSR within an industry, outperforming the industry's average TSR in 7 of the last 10 years and doing so in more than 3 of the last 3 rolling 10-year periods.
