## Message from Management

We concluded the fourth quarter of 2025 with consistent results and progress in key operational indicators, reinforcing the resilience of our business model even in the face of a challenging economic environment.

The consolidated order backlog posted growth compared to the same quarter of the previous year, mainly driven by the B+W Machines business unit. According to Company data, the order backlog reached R\$750.4 million at the end of 4Q25, representing a 15.1% increase compared to the same period of 2024 – an expansion that reflects strong demand for high-complexity, customized solutions.

The diversification strategy – with a focus on the machine rental business and the fintech PRODZ – has proven to be sound and increasingly relevant in the composition of our results. In 4Q25, 37 new machines were rented, consolidating this front as an important pillar of value generation for our customers.

The consolidated adjusted operating margin in 4Q25 increased by 1.9 percentage points compared to the same period last year, reflecting operational efficiency and the diversification of solutions mentioned above.

In Germany (B+W), the projects scheduled for 4Q25 were delivered on time, while new order intake during the quarter reached R\$36.3 million, with an order backlog of R\$494.6 million to be executed in 2026 and 2027, confirming the effectiveness of our approach focused on customized and high-complexity technological solutions.

The Castings and Machining unit continues to face challenges related to demand in the wind and automotive sectors. We remain focused on the gradual recovery of productivity, supported by process review initiatives and the development of higher value-added solutions.

We are confident that our competitive advantages and constant pursuit of excellence will allow us to maintain a sustainable business pace. We will continue investing in innovation, digital technologies, and the training of our team, aware that the success of ROMI is directly linked to the success of our customers, employees, and partners.

**Luiz Cassiano Rando Rosolen** - Chief Executive Officer

**Santa Bárbara d'Oeste – São Paulo, February 03, 2026**

ROMI S.A. ("ROMI" or "Company") (B3: ROMI3), domestic market leader in the Machine Tools and Plastic Processing Machines markets, as well as an important producer of Rough and Machined Cast Iron Parts, announces its results for the third quarter of 2025 ("4Q25"). Except where otherwise stated, ROMI's operating and financial information is presented on a consolidated basis, in accordance with the International Financial Reporting Standards (IFRS).

Statements contained in this release related to ROMI's business outlook, projections of operating and financial results and references to the Company's growth potential are mere forecasts and have been based on Management's expectations regarding its future performance. These expectations are highly dependent upon market behavior, the economic situation in Brazil, the industry and international markets. Therefore, they are subject to changes.

## Corporate Profile

Founded in 1930, ROMI is a leader in the Brazilian market for industrial machines and equipment, and a key manufacturer of cast and machined parts.

Notably, ROMI is publicly listed on the B3 exchange's prestigious "New Market" segment, which is dedicated to companies with a strong commitment to corporate governance. Specializing in an extensive range of machine tools, ROMI manufactures Conventional Lathes, Computerized Numerical Control (CNC) Lathes, Lathing Centers, Machining Centers, Vertical and Horizontal Heavy and Extra-Heavy Lathes, and Drilling Mills. Additionally, ROMI manufactures Plastic Injection and Blow Molding Machines, as well as ductile or CDI gray cast iron parts, both raw and machined. A distinguishing feature of ROMI's products and services lies in its incorporation of Industry 4.0 technologies across its products and services. These advanced capabilities facilitate the intelligent utilization of data generated by ROMI equipment. The data can be processed internally through built-in artificial intelligence or transmitted via networks (connectivity) to a central analysis site. These high-quality equipment and solutions are globally distributed and widely adopted across various industrial sectors. Industries such as agricultural machinery, capital goods, consumer goods, packaging, tooling, hydraulic equipment, sanitation, automotive, and wind energy rely on ROMI's machinery for their operations.

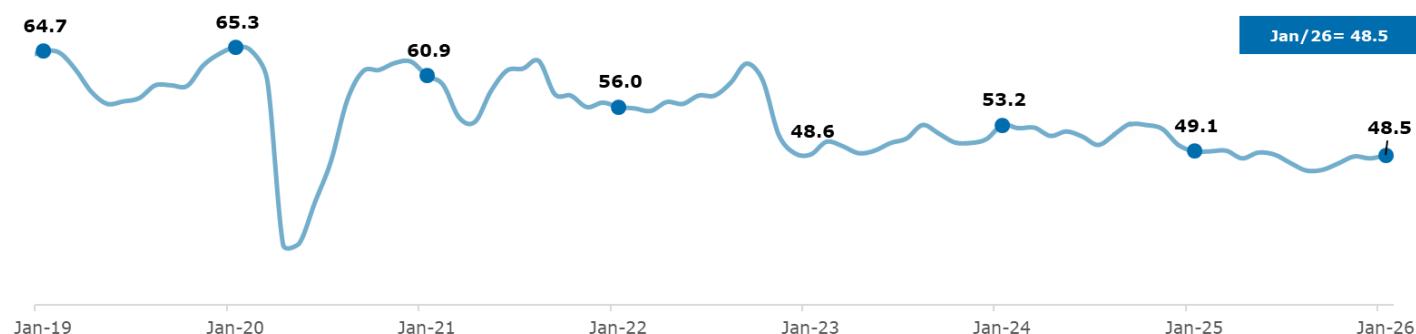

ROMI operates a network of thirteen manufacturing units. These units encompass four facilities dedicated to the final assembly of industrial machinery, two foundries, four units for machining mechanical components, two units for manufacturing steel sheet components, and one unit for the assembly of electronic panels. While eleven units are based in Brazil, two are located in Germany. The Company's production capacity amounts to approximately 2,900 industrial machines and 50,000 metric tons of castings per year.

## Current Economic Scenario

Throughout 2025, the Industrial Entrepreneur Confidence Index (ICEI) showed a slowdown and remained below the 50-point threshold for most months, reinforcing a cautious stance among industrial entrepreneurs, influenced by uncertainties in the economic environment and expectations that the benchmark interest rate will remain at elevated levels in the short term. Historically, readings below 50 indicate a more cautious perception among industrialists, signaling that uncertainties regarding the consolidation of the economic recovery still persist.

The external environment remains a point of attention due to growth challenges in major global economies, adjustments in monetary policies, recent uncertainties regarding increases in import tariffs, and persistent geopolitical tensions. Despite the need for caution, especially in investment decisions, we have strengthened our commercial and after-sales service structures at our overseas subsidiaries in order to continue expanding our presence in the markets where we operate and, above all, to consistently enhance customer experience. During the first months of the year, we achieved our initial objectives and remain focused on ROMI's growth in foreign markets.

## Average Installed Capacity Utilization (UCI)

According to data from the National Confederation of Industry (CNI), the Installed Capacity Utilization Index (UCI) for Brazilian industry reached 66% in December 2025, a decline of 4 percentage points compared to November, when it stood at 70%. Although such a contraction is common for the period, the December result represents the lowest level for the month since 2017 (64%), signaling a slight cooling in industrial activity.

The capital goods industry is dynamic, requiring careful production management by companies to keep up with demand fluctuations. With this in mind, we reorganized our operations to make them more agile and responsive to market changes. In recent years, we have implemented several initiatives focused on optimizing indirect resources, as well as automating and digitalizing internal processes. These actions enable us to respond quickly and efficiently to transformations, strengthening our adaptability in an ever-evolving environment.

The Company has strategically prioritized the development of new product generations aligned with the technological advancements of Industry 4.0. This strategic focus has yielded significant advancements in technological content, resulting in a successful market reception of our recent product launches, both domestically and internationally. Looking ahead, ROMI remains committed to launching new machine generations and integrating cutting-edge technologies into our product portfolio, ensuring our continued relevance and competitiveness in the industry. In mid-2020, we also launched a solution for our customers, the rental of ROMI machines. This solution has proven to be highly competitive and has provided our customers with more business opportunities. With the aim of financially supporting our customers, in 2022 we created PRODZ, a company which offers credit lines for the purchase of machines, directly from ROMI, in an easy, agile, digital and uncomplicated way. Since 2022, PRODZ has supported 496 businesses, totaling R\$188 million in credits granted to our customers. These new solutions have supported a large number of customers on their journeys of growth and success, demonstrating ROMI's strategic purpose of taking care of the success of its customers.

In the foreign market, we have continuously worked to improve our customer service structures, aiming to provide an increasingly satisfactory experience. We are convinced that this ongoing commitment is essential to consolidate our presence and promote sustainable and consistent international growth.

## Market

The Company's main competitive advantages in the market – continuous investments in product development and cutting-edge solutions, a direct domestic distribution network, in-house and ongoing technical assistance, machine rental services, attractive local-currency financing for customers, and short product delivery times – are widely recognized, reinforcing the ROMI brand's traditional and prestigious reputation.

In 4Q25, the ROMI Machines Unit recorded a 36.5% decline in order intake compared to the same period of 2024, reflecting a higher level of uncertainty in the domestic market. In this context, the Company maintained its focus on initiatives aimed at prospecting new business, expanding its presence across different markets and continuing to invest in technology and innovation, reinforcing its commitment to competitiveness, value creation and the success of its customers.

As previously mentioned, the new generations of products – featuring significant technological advances in mechatronics, thermal compensation and connectivity – have also enabled the Company to pursue competitive alternatives to support new business for customers, such as machine rental. In 4Q25, 37 new machines were rented or 45 new contracts were signed (43 machines in 4Q24 or 53 new contracts), totaling approximately R\$12.4 million (R\$19.8 million in 4Q24).

In 2025, the German subsidiary B+W continued to demonstrate its expertise in developing competitive technological solutions with a high degree of complexity and customization. As a result, order intake increased by 53.8% compared to 2024.

The Castings and Machining Unit recorded a 30.0% decline in order intake in 4Q25 compared to the same period of 2024, reflecting the slowdown in the commercial automotive and agricultural segments.

\* The informed amounts related to order intake and order backlog do not include parts and services.

In 4Q25, the consolidated order backlog increased by 15.1% compared to the same period of 2024, with emphasis on the German subsidiary B+W.

During the same period, the subsidiary continued to demonstrate its solid capability in developing advanced technological solutions characterized by a high level of complexity and customization, which contributed to the expansion of its order backlog to R\$494.6 million, representing growth of 39.0% compared to the same period last year. It is worth noting that the order backlog recorded at the end of 2025 includes contracts related to projects scheduled for delivery in 2026 and the first half of 2027.

## Net Operating Revenue by Business Unit

The Company's net operating revenue in 4Q25 totaled R\$388.2 million, representing a decrease of 15.3% compared to 4Q24. This performance mainly reflects lower revenue from cast and machined parts, as well as the greater concentration of B+W machine deliveries in the fourth quarter of 2024, compared to 2025, when this revenue was more evenly distributed throughout the year.

### ROMI MACHINES

The net operating revenue of this Business Unit reached R\$242.4 million in 4Q25, showing a slight decrease of 6.9% compared to the same period in 2024.

It is important to highlight that revenue from the machine rental business has become increasingly relevant to this Unit's total revenue and is recognized monthly in accordance with rental values. Therefore, the growth in this Unit's revenue derived from rentals will be reflected gradually over time.

**BURKHARDT+WEBER MACHINES**

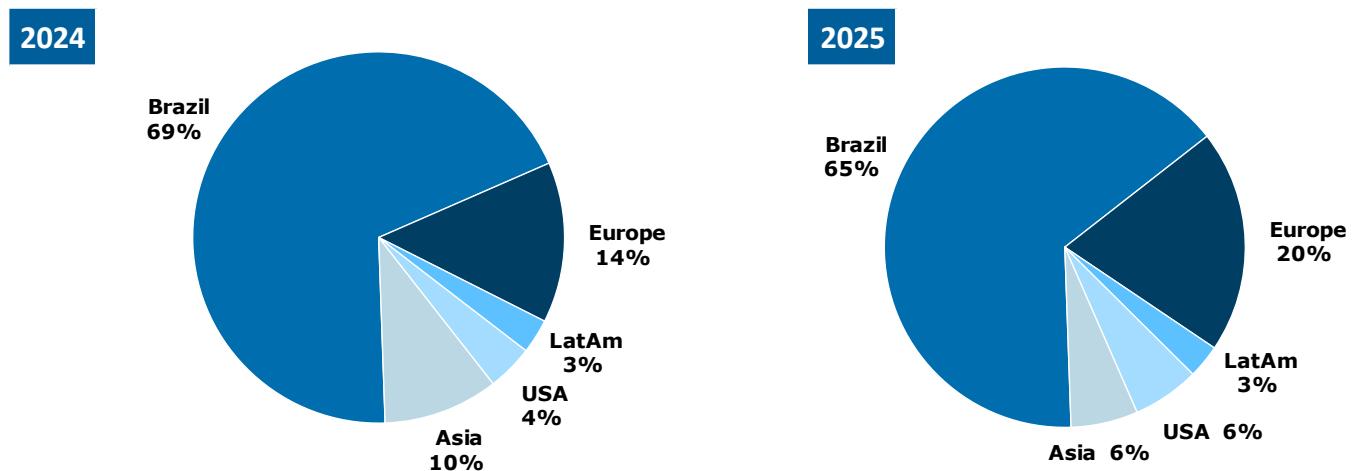

The German subsidiary B+W recorded net operating revenue of R\$113.7 million in the fourth quarter of 2025, representing a decrease of 25.6% compared to the same period of the previous year. Historically, this Business Unit's revenue had been more concentrated in the last quarter of the year; however, in 2025, due to a more balanced distribution of orders throughout the year, this seasonality was mitigated. As a result, this business unit's net operating revenue in 2025 increased by 46.6% compared to 2024.

**ROUGH AND MACHINED CAST IRON PARTS**

The net operating revenue of this Business Unit totaled R\$32.2 million in 4Q25, representing a volume 29.3% lower than in 4Q24, mainly due to the reduction in business volume.

***Net Operating Revenue per Geographical Region***

The domestic market accounted for 65% of ROMI's consolidated revenue in 2025 (69% in 2024). When considering the revenue generated from foreign markets, which includes sales by ROMI subsidiaries abroad (Germany, China, Spain, United States, France, Italy, Mexico and United Kingdom) as well as direct sales to other markets, the distribution of ROMI's consolidated revenue by geographical region was as follows:

The following shows the foreign market revenue, in Reais (R\$) and in US dollars (US\$):

## Gross and Operating Margins

The gross margin obtained in 4Q25 was 32.1%, representing an increase of 1.9 percentage points compared to 4Q24. Operating margin (EBIT) in the same period reached 15.6%. For the year, gross margin declined by 1.6 percentage points, while adjusted operating margin (adjusted EBIT) posted a slight decrease of 0.6 percentage points.

## ROMI MACHINES

The gross margin of this Business Unit was 38.2% in 4Q25, representing a decrease of 2.9 percentage points compared to the same quarter of 2024. Despite this slight reduction, this business unit's operating margins remain at solid levels, even in a more challenging macroeconomic environment. This can be observed on a full-year basis, in which gross margin and EBIT increased by 0.1 percentage points and 1.2 percentage points, respectively, driven by the agile adjustment of the production structure to new demand levels.

## BURKHARDT+WEBER MACHINES

The gross and operating margins of this Business Unit in 4Q25 increased by 7.8 percentage points and 3.0 percentage points, respectively, compared to the same period of 2024, mainly driven by improved capacity utilization and better margins negotiated on projects. On a full-year basis, gross margin and EBIT rose by 2.4 percentage points and 4.1 percentage points, respectively, demonstrating the consistent improvement in this business unit's operating margins.

## ROUGH AND MACHINED CAST IRON PARTS

The gross margin of this Business Unit posted a slight decrease of 0.9 percentage points compared to 4Q24, as did operating margin (EBIT), which declined by 7.7 percentage points in the same period. The variation reflects lower production volumes resulting from a slowdown in business activity, combined with the high level of fixed costs in this unit. On a full-year basis, gross margin and EBIT fell by 9.9 percentage points and 10.8 percentage points, respectively.

### ***EBITDA and EBITDA Margin***

In 4Q25, the operating cash generation as measured by adjusted EBITDA amounted to R\$66.2 million, representing an adjusted EBITDA margin of 17.0% in the quarter, as shown in the table below:
